GETTING STARTED: BASIC WEAVING TECHNIQUES

The FUNiOi kit provides a cat-shaped weaving comb and a hook tool to create various bracelet designs. The included instruction booklet details several patterns, from simple to more complex. Below are general steps and examples of common weaving techniques.

General Weaving Steps:

1. **Prepare the Loom:** Place the first rubber band on the loom pegs according to the desired pattern (e.g., in an 'X' shape for a single weave).
2. **Add More Bands:** Add additional rubber bands onto the pegs, typically stacking them.
3. **Looping:** Use the hook tool to pick up the bottom-most band(s) from a peg and loop it over the top band(s) and off the peg.
4. **Repeat:** Continue adding bands and looping until the desired length of the bracelet is achieved.
5. **Secure the End:** Once the bracelet is long enough, secure the ends using the provided plastic rings/clasps.

Example Weave Patterns:

The instruction booklet illustrates various patterns such as Single, Fishtail, Inverted Fishtail, Double Cross, Wristband, Bunny Ears Knotted, and Double Bands Knotted. Refer to the booklet for step-by-step visual guides for each pattern.

CARE AND MAINTENANCE

- **Storage:** Always store rubber bands and tools in the provided organizer case to prevent loss and keep them clean.
- **Cleaning:** The plastic loom and hook can be wiped clean with a damp cloth if necessary. Avoid harsh chemicals.
- **Rubber Band Longevity:** Keep rubber bands away from direct sunlight and extreme temperatures to maintain their elasticity and prevent degradation.

TROUBLESHOOTING

- **Bands Breaking:** If rubber bands frequently break, ensure you are not overstretching them or using excessive force with the hook. Ensure bands are not old or brittle.
- **Difficulty Looping:** If looping is difficult, ensure only the correct number of bands (usually the bottom-most) are being picked up by the hook. Practice with simpler patterns first.
- **Uneven Bracelet:** An uneven bracelet can result from inconsistent tension or skipping steps. Review the instructions for your chosen pattern and try to maintain even tension throughout the weaving process.
