KEECOON KC-MH-2301W

KEECOON KC-MH-2301W 13L Hybrid Humidifier Instruction Manual

Model: KC-MH-2301W | Brand: KEECOON

1. Introduction

The KEECOON KC-MH-2301W is a high-capacity hybrid humidifier designed to provide optimal humidity levels in various environments. It combines both ultrasonic and steam (heated) humidification methods, offering versatility for different seasons and needs. Key features include a large 13-liter water tank for extended operation, 100°C high-temperature sterilization, UV light purification, intelligent constant humidity control, and a quiet sleep mode. This manual provides essential information for safe and effective use of your humidifier.

2. Safety Precautions

To ensure safe operation and prevent damage, please read and follow these safety guidelines:

- Always place the humidifier on a stable, flat, and water-resistant surface.
- Do not place the unit near heat sources, direct sunlight, or sensitive electronics.
- Keep the humidifier out of reach of children and pets.
- Use only clean, distilled, or demineralized water to prevent mineral buildup and ensure optimal performance.
- Do not add essential oils directly into the water tank; use the designated aroma case.
- Unplug the humidifier before cleaning, refilling, or when not in use.
- Do not block the mist outlet or air intake vents.
- Do not attempt to repair or disassemble the unit yourself. Contact customer support for assistance.
- The humidifier is equipped with dry-run prevention, which automatically shuts off the unit when the water level is too low.
- This product has obtained PSE certification, ensuring electrical safety standards are met.

3. Package Contents

Please check the box for the following items:

- KEECOON KC-MH-2301W Humidifier Main Unit
- Remote Control
- Aroma Case
- Instruction Manual
- Power Cord (integrated)

4. Product Overview

Familiarize yourself with the components of your KEECOON humidifier:

- **Mist Outlet:** Where the humidified mist is released.
- **Control Panel:** Touch-sensitive display for operating functions.
- **Water Tank:** Large 13L capacity for water storage.
- **Base:** Provides stability and houses internal components.
- **Aroma Case:** Small tray for adding essential oils.
- **Remote Control:** For convenient operation from a distance.

Image: Internal component diagram of the humidifier, showing the ultrasonic vibrator, float sensor, pump outlet, drain outlet, air outlet, heater, and UV light for water purification.

- **Ultrasonic Vibrator:** Generates fine mist through high-frequency vibration.
- **Float Sensor:** Detects water level in the tank, activating dry-run prevention.
- **Pump Outlet:** Draws water from the tank to the main unit.
- **Drain Outlet:** For draining excess water from the main unit's water tray.
- **Air Outlet:** Directs the generated mist upwards.
- **Heater:** Heats water for warm mist and 100°C sterilization.
- **UV Light:** Purifies water to ensure clean mist output.

5. Setup

1. **Unpack:** Carefully remove all packaging materials and ensure all components are present.
2. **Placement:** Place the humidifier on a firm, level surface at least 15 cm (6 inches) away from walls and furniture. Avoid placing it on carpets or near heat sources.
3. **Fill Water Tank:** The humidifier features a convenient top-fill design. Open the top cover and pour clean water directly into the tank. Do not exceed the maximum fill line.
4. **Connect Power:** Plug the power cord into a standard electrical outlet. The unit will enter standby mode.

Image: Demonstrates the easy top-fill method, where water is poured directly into the humidifier's top opening without needing to remove the tank.

6. Operating Instructions

Operate your humidifier using the touch control panel or the remote control.

- **Power On/Off:** Press the power button to turn the unit on or off.
- **Mist Mode Selection (Hybrid):** Choose between cool mist (ultrasonic only) or warm mist (ultrasonic + heated steam). Warm mist provides higher humidification efficiency and 100°C sterilization.
- **Mist Level Adjustment:** Select from 3 mist output levels (Low, Medium, High) to suit your preference and room size. The maximum mist output is 550ml/h.
- **Humidity Setting:** Use the humidity control function to set your desired humidity level between 45% and 95%. The humidifier will automatically maintain this level, pausing mist output when the target is reached and resuming when it drops.
- **Timer Function:** Set an auto-off timer from 1 to 12 hours.
- **Sleep Mode:** Activates quiet operation (approx. 35dB) and dims the display panel for undisturbed sleep.
- **Aroma Function:** Open the aroma case, add a few drops of your preferred essential oil onto the cotton pad, and close the case. Enjoy a fragrant mist.

7. Maintenance

Regular cleaning is crucial for maintaining the performance and longevity of your humidifier. Always unplug the unit before cleaning.

- **Daily Cleaning:** Empty any remaining water from the tank and wipe the interior with a clean cloth.
- **Weekly Cleaning (Water Tank & Base):**
    a. Unplug the unit and remove the water tank.
    b. Pour out any remaining water from the tank and the base.
    c. Fill the tank with a mixture of equal parts white vinegar and water. Let it sit for 30 minutes to an hour to dissolve mineral buildup.
    d. Use a soft brush or cloth to clean the inside of the tank and the ultrasonic vibrator in the base.
    e. Rinse thoroughly with clean water until the vinegar smell is gone.
    f. Wipe all surfaces dry before reassembling.
- **Aroma Case:** Clean the aroma case regularly with a damp cloth and allow it to dry completely. Replace the cotton pad as needed.
- **Storage:** If not using the humidifier for an extended period, clean and dry all parts thoroughly, then store it in a cool, dry place.

8. Troubleshooting

If you encounter issues with your humidifier, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No mist output	Low water level; Power not connected; Mist outlet blocked; Ultrasonic vibrator dirty.	Refill water tank; Check power connection; Clear any blockages; Clean the ultrasonic vibrator.
Weak mist output	Mineral buildup on ultrasonic vibrator; Water quality issues; Mist level set too low.	Clean the ultrasonic vibrator; Use distilled or demineralized water; Increase mist level setting.
Unusual noise	Unit not on a level surface; Foreign object in water tank or base; Fan obstruction.	Place on a flat surface; Remove any foreign objects; Contact support if noise persists.
Water leakage	Water tank not properly seated; Overfilled water tank; Damage to tank or seals.	Ensure tank is correctly positioned; Do not overfill; Contact support for inspection.

If the problem persists after trying these solutions, please contact KEECOON customer support.
