

HUTT W9PAD

HUTT W9 Window Cleaning Robot Replacement Pads User Manual

Model: W9PAD

1. INTRODUCTION

Thank you for choosing HUTT W9 Window Cleaning Robot Replacement Pads. These original microfiber cleaning cloths are designed to ensure optimal performance and streak-free cleaning with your HUTT W9 Window Cleaning Robot. This manual provides essential information on how to properly install, use, and maintain your cleaning pads.

2. PRODUCT OVERVIEW

The HUTT W9 Replacement Pads are high-density microfiber cloths engineered for strong water absorption and effective cleaning. Each box contains 4 pieces, ensuring you have spares for continuous cleaning. These pads are reusable and designed for both wet and dry cleaning applications.

Key Features:

- **Microfiber Material:** Designed for streak-free cleaning on glass surfaces.
- **High Density Nanofibers:** Ensures strong water absorption and effective dirt removal.
- **Reusable:** Can be washed and reused multiple times.
- **Original Accessory:** Specifically designed for the HUTT W9 Window Cleaning Robot.
- **Quantity:** Includes 4 pieces in one box.

3. INSTALLATION AND REPLACEMENT

To ensure optimal cleaning performance, regularly replace your HUTT W9 cleaning pads. Follow these steps to install or replace the pads on your HUTT W9 Window Cleaning Robot:

1. **Power Off Robot:** Ensure your HUTT W9 robot is powered off and disconnected from any power source before handling.

- 2. Remove Used Pads:** Gently peel off the used cleaning pads from the bottom of the robot. They are typically attached with hook-and-loop fasteners.
- 3. Prepare New Pads:** Take a fresh, clean HUTT W9 replacement pad. For wet cleaning, you may lightly dampen the pad with water or a recommended window cleaning solution before attachment.
- 4. Attach New Pads:** Align the new cleaning pad with the designated cleaning area on the robot's underside. Press firmly to ensure it adheres securely to the hook-and-loop fasteners. Ensure the pad is flat and covers the entire cleaning surface without wrinkles.
- 5. Verify Attachment:** Double-check that the pads are securely attached and will not detach during operation.

4. USAGE GUIDELINES

These cleaning pads are designed to work seamlessly with your HUTT W9 Window Cleaning Robot. For best results:

- Always use clean pads for each cleaning session to prevent streaks and ensure maximum effectiveness.
- For heavily soiled windows, consider performing an initial dry clean to remove loose dirt, then follow with a wet clean using a fresh, slightly dampened pad.

- Do not oversaturate the pads, as this can lead to excessive moisture on the window and potential streaking.
- Ensure the pads are properly attached before starting the robot.

5. CARE AND MAINTENANCE

Proper care of your HUTT W9 cleaning pads will extend their lifespan and maintain cleaning performance.

- **Washing:** After each use, remove the pads from the robot. Hand wash them with mild detergent and warm water, or machine wash on a gentle cycle with similar colors. Do not use bleach or fabric softeners, as these can degrade the microfiber material and reduce its cleaning efficacy.
- **Drying:** Air dry the pads by laying them flat or hanging them. Avoid using a tumble dryer on high heat, as excessive heat can damage the fibers. Ensure pads are completely dry before storing or reusing.
- **Storage:** Store clean, dry pads in a cool, dry place away from direct sunlight.
- **Replacement:** Replace pads when they show signs of wear, such as thinning fibers, reduced absorbency, or if they no longer clean effectively.

6. TROUBLESHOOTING

If you encounter issues related to the cleaning pads, consider the following:

- **Streaking:** Ensure pads are clean and not oversaturated. If using a cleaning solution, verify it is suitable for windows and used sparingly. Replace old or worn pads.
- **Pads Detaching:** Ensure pads are firmly pressed onto the robot's hook-and-loop fasteners. If the fasteners on the robot are worn, contact HUTT support for assistance.
- **Poor Cleaning Performance:** Use fresh, clean pads. For very dirty windows, pre-clean or perform multiple passes.

7. SPECIFICATIONS

Attribute	Detail
Brand	HUTT
Model Name	Window Cleaning Robot Pad
Item Model Number	W9PAD
Special Feature	Wet/Dry Cleaning
Color	Gray
Product Dimensions	9.5" L x 9.5" W x 0.6" H
