## OTTOCAST LZYUS-AA-CP91

# Ottocast Wireless CarPlay Adapter User Manual

Model: LZYUS-AA-CP91

Brand: OTTOCAST

## Introduction

The Ottocast Wireless CarPlay Adapter (CarPlayClip) is designed to seamlessly convert your vehicle's existing wired CarPlay system into a wireless one. This device enhances your driving experience by providing wireless connectivity, a visual smart screen for displaying useful information, and a compact, multifunctional design. It is compatible with iPhones 6 and later versions and cars from 2016 onwards with built-in wired CarPlay.

The Ottocast Wireless CarPlay Adapter, showcasing its sleek design and integrated screen.

## What's in the Box

Please verify that all items are present in the package:

- Ottocast Wireless CarPlay Adapter (CarPlayClip)
- USB Plug Adapter (Type-A to C)
- Cable Clamp

- Scents Diffuser
- User Manual (this document)

## Setup Guide

1. **Vehicle Compatibility Check:** Ensure your vehicle has factory-wired CarPlay and is from 2016 onwards. This adapter supports iPhones 6 and later versions. It is not compatible with Android phones, Skoda cars (due to call issues), or BMW cars.
2. **Connect the Adapter:** Plug the Ottocast Wireless CarPlay Adapter into your car's USB port that supports wired CarPlay. Use the provided USB Plug Adapter if necessary.

Step 1: Connect the CarPlayClip to your car's wired CarPlay USB port.

3. **Initial Power-On:** Once connected, the adapter's smart screen will power on and display the Ottocast logo, followed by a connection status screen.
4. **Pair with Your iPhone:**
   - On your iPhone, go to **Settings** > **Bluetooth**.
   - Search for and select the Bluetooth device named "CarPlayClip-XXXX" (where XXXX is a unique identifier).
   - Confirm the pairing request on both your iPhone and the car's infotainment system if prompted.

Once paired, your iPhone will connect wirelessly to CarPlay, displaying your apps on the car's screen.

5. **Install OttoPilot App (Optional but Recommended):** Download the "OttoPilot" app from the App Store to customize the adapter's visual smart screen. This app allows you to upload personal photos, display the clock, enhance car information, and sync album art with your music.

## Operating Instructions

### Wireless CarPlay Functionality

After successful setup, your iPhone will automatically connect to wireless CarPlay each time you start your vehicle. You

can access all standard CarPlay features, including navigation, music, calls, and messages, directly from your car's infotainment screen without needing a physical cable connection.

## Using the Visual Smart Screen (1.6")

The CarPlayClip features a 1.6-inch multi-functional screen that can display various information:

- **Digital Clock:** Displays the current time.
- **Music Album Cover:** Shows the album art of the currently playing song.
- **Digital Photo Frame:** Allows you to display personal pictures.

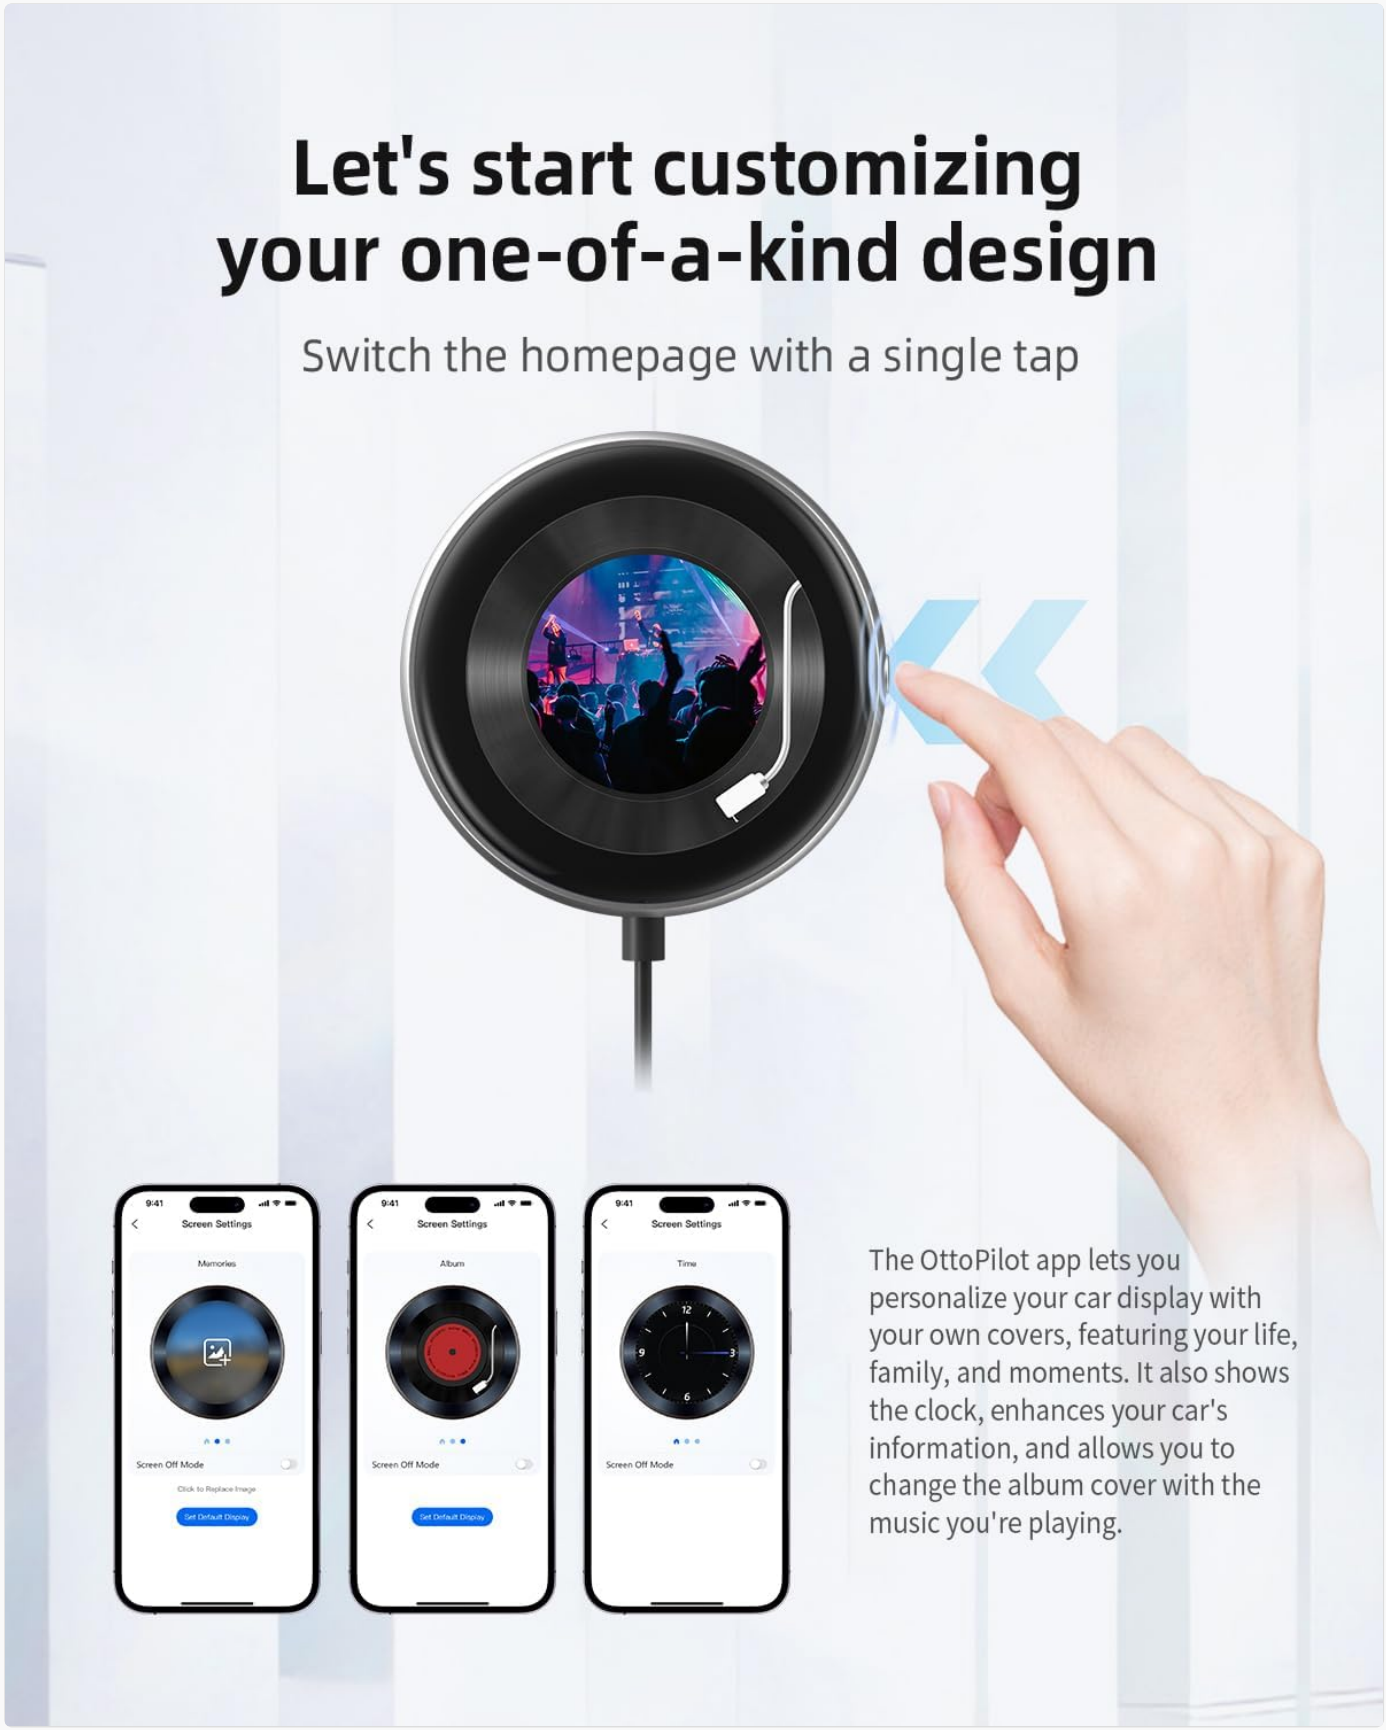

The 1.6" multi-functional screen can be customized to show personalized car photo frames, music album covers, or a digital car vent clock.

## Customization with OttoPilot App

The OttoPilot app provides advanced customization options for the smart screen:

- Upload and manage personal photos for the digital photo frame.
- Configure clock display settings.
- Control album art synchronization with your music.

- Access additional settings and potential firmware updates (FOTA).

The OttoPilot app allows you to personalize the screen with your own designs, including photos, album covers, and clock displays.

## Maintenance

To ensure the longevity and optimal performance of your Ottocast Wireless CarPlay Adapter, follow these simple maintenance guidelines:

- Keep the device clean by wiping it with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- Ensure the USB connection port is free from dust and debris.
- Avoid exposing the device to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.
- Handle the device with care to prevent physical damage.

## Troubleshooting

| Problem | Possible Cause | Solution |
| --- | --- | --- |
| Device does not power on. | Incorrect USB port, loose connection, or insufficient power. | Ensure the adapter is plugged into a USB port that supports wired CarPlay. Check the cable connection. Try a different USB port if available. |
| Cannot connect to wireless CarPlay. | Bluetooth not enabled, incorrect pairing, or vehicle/phone incompatibility. | Verify Bluetooth is enabled on your iPhone.<br>Ensure you have selected the correct "CarPlayClip-XXXX" Bluetooth device.<br>Confirm your car has factory-wired CarPlay and is not a Skoda or BMW model.<br>Restart both the adapter (by unplugging and replugging) and your iPhone. |
| Audio or connection issues (lag, disconnections). | Interference, outdated firmware, or specific car model issues. | Ensure no other Bluetooth devices are causing interference.<br>Check for firmware updates via the OttoPilot app.<br>If you own a Mitsubishi, please note your car model on the cart page for potential future performance improvements.<br>Contact seller support for FOTA upgrade assistance if issues persist. |
| Smart screen not displaying correctly. | App settings, or temporary software glitch. | Check settings within the OttoPilot app. Try cycling the display modes by pressing the button on the side of the device. Restart the device. |

## Specifications

| Feature | Detail |
