EIGIIS KE5

EIGIIS KE5 Military Smart Watch User Manual

Model: KE5

PRODUCT OVERVIEW

The EIGIIS KE5 Military Smart Watch is a rugged and versatile device designed for outdoor enthusiasts and daily use. It combines advanced smart features with military-grade durability, offering comprehensive health monitoring, extensive sports modes, and essential outdoor tools.

SETUP AND INITIAL PAIRING

To begin using your EIGIIS KE5 Smart Watch, follow these steps for initial setup and pairing with your smartphone:

1. **Charge the Watch:** Before first use, fully charge the watch using the provided charging cable. Connect the magnetic end to the watch's charging points and the USB end to a compatible power adapter.
2. **Download the App:** Scan the QR code in the user manual or search for "FitCloudPro" in your phone's app store (compatible with Android 8.0+ and iOS 12.0+).
3. **Enable Bluetooth:** Ensure Bluetooth is enabled on your smartphone.
4. **Open FitCloudPro App:** Launch the FitCloudPro application on your phone.
5. **Add Device:** In the app, navigate to the "Device" or "Add Peripheral" section and select "KE5" from the list of available devices.
6. **Confirm Pairing:** A pairing request will appear on your phone. Confirm the pairing.
7. **Grant Permissions:** Allow the app to access necessary permissions, such as notifications, contacts, and location, for full functionality.

8. **Enable Call Audio:** Within the app settings, ensure "Call Audio" is enabled for Bluetooth calls directly from the watch.

CARE AND MAINTENANCE

Proper care ensures the longevity and optimal performance of your EIGIIS KE5 Smart Watch:

- **Cleaning:** Regularly wipe the watch screen and strap with a soft, dry, lint-free cloth. For stubborn dirt, dampen the cloth slightly with water. Avoid harsh chemicals or abrasive materials.
- **Water Exposure:** While 3ATM waterproof, avoid prolonged submersion in water, especially hot water or saltwater, as this can degrade seals over time. Always dry the watch thoroughly after exposure to water.
- **Temperature Extremes:** Do not expose the watch to extreme temperatures (very hot or very cold) or sudden temperature changes, as this can affect battery life and internal components.
- **Charging:** Use only the provided charging cable. Ensure the charging contacts on the watch and cable are clean and dry before charging.
- **Storage:** When not in use for extended periods, store the watch in a cool, dry place. It is recommended to charge the watch to about 50% before long-term storage to preserve battery health.

TROUBLESHOOTING

If you encounter issues with your EIGIIS KE5 Smart Watch, refer to the following common solutions:

Problem	Possible Cause / Solution
Watch not turning on/charging	• Ensure the charging cable is securely connected to both the watch and a power source. • Check if the charging contacts on the watch and cable are clean and free of debris. • Try a different USB port or power adapter. • Allow the watch to charge for at least 30 minutes before attempting to turn it on.
Bluetooth connection issues	• Ensure Bluetooth is enabled on your phone and the watch. • Make sure the watch is within the Bluetooth range of your phone. • Restart both your phone and the watch. • Forget the device in your phone's Bluetooth settings and re-pair it through the FitCloudPro app. • Check if the FitCloudPro app has all necessary permissions enabled.
No notifications received	• Verify that notification permissions are granted to the FitCloudPro app in your phone's settings. • Ensure notifications are enabled for specific apps within the FitCloudPro app. • Check if "Do Not Disturb" mode is active on either your phone or watch. • Confirm the watch is properly connected via Bluetooth.
Inaccurate sensor readings (pedometer, heart rate, etc.)	• Ensure the watch is worn snugly on your wrist, but not too tight. • Clean the sensor area on the back of the watch. • Calibrate sensors if an option is available in the app (e.g., for compass or altimeter). • Environmental factors can affect barometer/altimeter readings; ensure proper calibration for current conditions.
Watch screen unresponsive	• Restart the watch by pressing and holding the power button. • Ensure the screen is clean and dry. • If the issue persists, contact customer support.
