6. MAINTENANCE

To ensure the longevity and appearance of your Aheaplus Garment Rack, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the metal frame and wood surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Fabric Drawers:** The fabric drawers can be spot cleaned with a mild detergent and water. Allow them to air dry completely before returning them to the rack.
- **Regular Checks:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Placement:** Avoid placing the rack in direct sunlight or near heat sources to prevent warping or fading of the wood components.

7. TROUBLESHOOTING

If you encounter any issues with your Aheaplus Garment Rack, refer to the following common solutions:

- **Unit Wobbles:** Ensure all screws are fully tightened. Verify that the unit is placed on a level surface. If wobbling persists, ensure the wall-mounting brackets are properly installed and secured.
- **Parts Don't Fit:** Double-check the assembly instructions and diagrams. Ensure you are using the correct parts for each step and that they are oriented correctly. Sometimes, parts may appear similar but have subtle differences in hole placement.
- **Damaged Components During Assembly:** Avoid overtightening bolts, which can strip threads or crack wood. If a component is damaged, contact customer support for replacement parts.
- **Clothes Drag on Lower Rods:** The rack is designed with specific spacing. For longer adult clothing items, consider using shorter hangers or adjusting the placement of items to prevent dragging.
