

DIFEINI 88079BG

DIFEINI 3-Handle Shower Faucet Set with Tub Spout

Model: 88079BG | Finish: Brushed Gold

Manufacturer: DIFEINI

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your DIFEINI 3-Handle Shower Faucet Set with Tub Spout. Please read this guide thoroughly before installation and retain it for future reference. This product features a 5-inch shower head with 6 spray modes and a tub spout designed for quick filling.

SAFETY INFORMATION

- Always turn off the main water supply before beginning any installation or maintenance.
- Wear appropriate personal protective equipment, such as safety glasses and gloves.
- If you are unsure about any part of the installation process, consult a qualified plumber.
- Ensure all connections are secure to prevent leaks.
- Do not use harsh chemicals or abrasive cleaners on the brushed gold finish.

PACKAGE CONTENTS

Verify that all components are present before beginning installation.

- Shower Head (5 inches, 6 modes)
- Tub Spout
- Main Shower Valve (Brass)
- Three Handles (Hot, Cold, Diverter)
- Installation Accessories (including decorative covers)

SETUP AND INSTALLATION

This shower faucet set uses a U.S. standard 1/2" NPT connection. The main shower valve is made of high-quality brass for durability.

Important Compatibility Note:

This product is not compatible with other brands of valves and cartridges. The old shower valve must be removed if installing this kit.

Installation Steps:

- 1. Prepare Wall Piping:** Ensure your wall piping is configured for a three-handle system. Refer to the provided diagram for correct pipe installation and connections.
- 2. Install Main Valve:** Securely install the brass main shower valve into the wall, ensuring proper alignment with the hot, cold, and diverter lines.
- 3. Connect Shower Head Arm:** Install the shower head arm into the wall connection.
- 4. Attach Shower Head:** Thread the 5-inch shower head onto the shower arm. Ensure a tight seal.
- 5. Install Tub Spout:** Attach the tub spout to its designated wall connection.
- 6. Install Handles:** Mount the three handles (hot, cold, and diverter) onto their respective valve stems. Secure with screws and cover with decorative plates.
- 7. Test for Leaks:** Turn on the main water supply and check all connections for leaks.

OPERATING INSTRUCTIONS

The DIFEINI 3-handle system allows for precise control over water temperature and flow direction.

Handle Functions:

- **Left Handle:** Controls hot water flow. Turn to adjust hot water intensity.
- **Right Handle:** Controls cold water flow. Turn to adjust cold water intensity.
- **Middle Handle:** Acts as a diverter. Turn to switch water flow between the shower head and the bathtub spout.

Shower Head Spray Modes:

The 5-inch shower head offers 6 distinct spray modes for a customized showering experience. Rotate the outer ring of the shower head to cycle through the different spray patterns.

MAINTENANCE

Proper care will ensure the longevity and appearance of your DIFEINI shower faucet set. The brushed gold surface is designed to be easy to clean and fingerprint-resistant.

- **Regular Cleaning:** Clean the faucet regularly with a soft cloth and mild soap or a non-abrasive cleaner specifically designed for brushed finishes.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, scouring pads, or cleaners containing ammonia, bleach, or alcohol, as these can damage the finish.
- **Drying:** After cleaning, wipe the faucet dry with a soft cloth to prevent water spots and mineral buildup.
- **Handle Tightness:** Periodically check the handles for tightness. If they become loose, gently tighten the set screws.

TROUBLESHOOTING

If you encounter issues with your shower faucet set, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Water leaks from handles or spout.	Loose connections, worn O-rings, or faulty cartridge.	Ensure all connections are tightened. Inspect and replace O-rings or cartridge if necessary.
Low water pressure.	Clogged shower head, partially closed shut-off valve, or debris in the system.	Clean shower head nozzles. Ensure shut-off valves are fully open. Flush the system to remove debris.

Problem	Possible Cause	Solution
Handles are loose.	Set screws on handles are loose.	Tighten the set screws on the handles.
Water temperature is inconsistent.	Improper adjustment of hot/cold handles or issues with water heater.	Adjust hot and cold handles for desired temperature. Check water heater settings.
