SETUP

1. Charging the Device

Before first use, fully charge the device using the provided USB cable and a compatible USB power adapter (not included). The charging indicator will show the battery status.

2. Powering On/Off

- **To Power On:** Press and hold the Power button until the screen lights up.
- **To Power Off:** Press and hold the Power button, then select 'Power Off' from the options on the screen.

3. Initial Setup

Upon first power-on, follow the on-screen prompts to select your language, connect to a Wi-Fi network, and configure basic settings. The device runs on Android 13.0 with an MTK octa-core processor for smooth performance.

Powerful system and chip

Equipped with high-performance Android 13.0 system and MTK 6762 octa-core chip, it runs smoothly without lag, has lower power consumption, better heat control, greatly improved system stability, and brings a long-lasting and smooth user experience.

8. File Transfer

Connect the device to a computer using the USB cable. The device will appear as a removable storage device, allowing you to drag and drop files (music, videos, photos) to and from its internal storage or MicroSD card.

MAINTENANCE

1. Cleaning

Use a soft, dry, lint-free cloth to clean the device. Avoid using abrasive cleaners or solvents that may damage the screen or casing.

2. Software Updates

Periodically check for software updates in **Settings > System > System update** to ensure optimal performance and access to the latest features.

3. Storage Management

Regularly manage your storage by deleting unnecessary files or uninstalling unused applications to maintain device performance. Utilize the MicroSD card for large media files.

TROUBLESHOOTING

- **Device not turning on:** Ensure the battery is charged. Connect to a power source and try again.
- **Screen unresponsive:** Try restarting the device by holding the power button. If unresponsive, perform a forced restart (refer to device specifications for button combination, usually Power + Volume Down).
- **Cannot connect to Wi-Fi/Bluetooth:** Ensure Wi-Fi/Bluetooth is enabled in settings. Check if other devices can connect to the network/accessory. Restart the device and the router/accessory.
- **Apps crashing or slow performance:** Close background applications. Clear app cache (Settings > Apps > [App Name] > Storage & cache > Clear cache). Ensure sufficient storage space.
- **No sound:** Check volume levels. Ensure headphones are properly connected or Bluetooth device is paired and connected.
