SETUP AND PAIRING

The USB dongle acts as a replacement receiver for your Logitech G Pro Lightspeed Wireless Gaming Mouse. Proper pairing is essential for functionality.

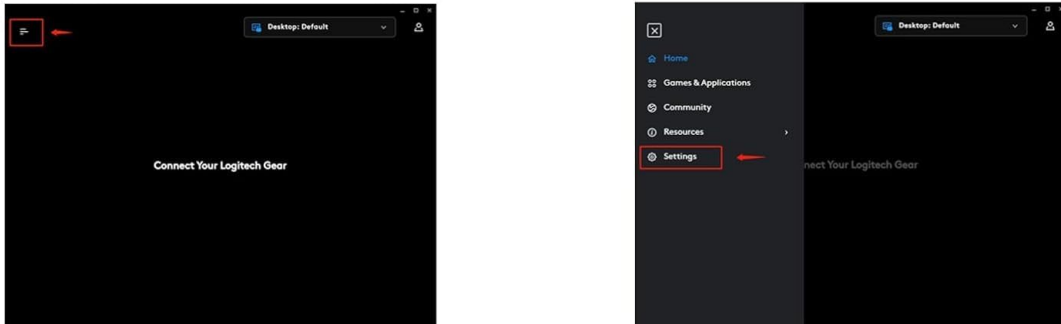

Step-by-Step Pairing Instructions:

1. **Connect the Receiver:** Insert the TALTAW USB dongle into an available USB port on your computer.
2. **Install Logitech G HUB Software:** If you do not already have it, download and install the latest version of Logitech G HUB software from the official Logitech website. This software is crucial for managing and pairing your Logitech devices.
3. **Open Logitech G HUB:** Launch the Logitech G HUB application on your computer.
4. **Access Settings:** In the Logitech G HUB interface, locate and click on the "Settings" icon, typically

found in the top left corner or a similar navigation area.

Receiver pairing steps

1, Open the Logitech G hub, find the settings in the top left corner options to open it.

2, Find the device pairing tool, open it and follow the steps to pair.

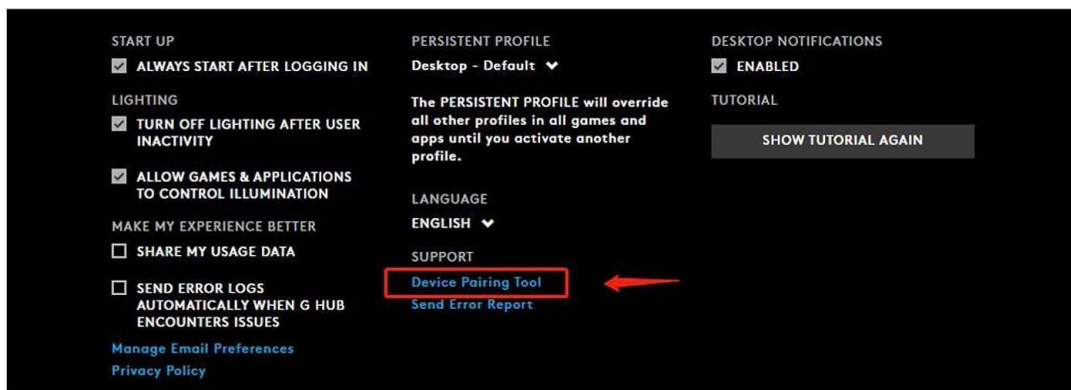

Image: Screenshot showing how to navigate to settings within Logitech G HUB.

5. **Find Device Pairing Tool:** Within the settings menu, look for an option labeled "Device Pairing Tool" or similar. Click on it to open the pairing utility.
6. **Follow On-Screen Prompts:** The Device Pairing Tool will guide you through the process. This typically involves turning your Logitech G Pro mouse off and then on again, or holding specific buttons on the mouse to initiate pairing mode.
7. **Confirm Pairing:** Once the mouse and dongle are successfully paired, the software will confirm the connection. Your mouse should now be fully functional.

Note: Some users have reported success by holding the connect button on their mouse (if applicable) and then cycling the mouse power (Off to On) while holding the button, especially for models like the G604. Refer to Logitech's official support for specific mouse model pairing instructions if issues arise.

Easy Connection

can be used with confidence

OPERATING THE DEVICE

Once successfully paired, the TALTAW USB dongle operates seamlessly with your Logitech G Pro Lightspeed Wireless Gaming Mouse. It provides a stable 2.4 GHz wireless connection, allowing your mouse to function as intended without latency issues.

- Ensure the dongle remains connected to a powered USB port on your computer during use.
- Keep the mouse within the effective range of the dongle for optimal performance.
- The dongle does not require additional drivers beyond what Logitech G HUB provides.

MAINTENANCE

The TALTAW USB dongle is designed for durability and requires minimal maintenance. Following these simple guidelines will help ensure its longevity:

- **Keep Clean:** Periodically wipe the dongle with a soft, dry cloth to remove dust or debris. Avoid using liquid cleaners.
- **Protect from Damage:** Store the dongle in a safe place when not in use to prevent physical damage, especially to the USB connector.
- **Avoid Extreme Conditions:** Do not expose the dongle to extreme temperatures, humidity, or direct sunlight.
- **Proper Insertion/Removal:** Always insert and remove the dongle from USB ports carefully to avoid bending or damaging the connector pins.

TROUBLESHOOTING

If you encounter issues with your TALTAW USB dongle, consider the following troubleshooting steps:

- **Mouse Not Connecting:**

- Ensure the dongle is fully inserted into a working USB port. Try a different USB port.
- Verify that your Logitech G Pro mouse is powered on and has sufficient battery charge.
- Re-attempt the pairing process using the Logitech G HUB software as described in the "Setup and Pairing" section.
- If using a wired connection for the mouse, unplug it before attempting to pair wirelessly.

- **Logitech G HUB Not Recognizing Dongle/Mouse:**

- Ensure Logitech G HUB is updated to the latest version.
- Restart your computer and try again.
- Some users have found success by using the Logitech Connection Utility (a separate tool) if G HUB fails to pair. Search for "Logitech Connection Utility" online.

- **Intermittent Connection/Lag:**

- Move the dongle closer to the mouse, or use a USB extension cable to position the dongle closer to your mouse, especially if your computer is under a desk.
- Ensure there are no major sources of interference (e.g., other 2.4 GHz wireless devices, large metal objects) between the dongle and the mouse.
