## OPERATING INSTRUCTIONS

Follow these guidelines for effective cleaning of your electronic devices.

### Using the Precision Pen Nib (Cleaning Sharp Tip)

- **For Earbuds/Earphone Grilles:** Gently use the sharp tip to dislodge wax, dust, and debris from the speaker grilles and small crevices. Avoid excessive force to prevent damage.
- **For Charging Ports/Jacks:** Carefully insert the tip into charging ports or audio jacks to remove lint and dirt. Ensure the device is powered off before cleaning ports.

### Using the Microfiber Swab

- **For Earbud Cases/Surfaces:** Use the soft microfiber swab to wipe away dust and smudges from the smooth surfaces of earbud cases and other delicate areas.
- **For Camera Lenses (Caution):** While the swab is soft, always ensure it is clean and free of abrasive particles before using on sensitive optics. Use a gentle, circular motion.

### Using the Small Curved Brush (Detailing Brush)

- **For Keyboard Keys:** Sweep the brush between keyboard keys to remove crumbs, dust, and other loose debris.
- **For Speaker Meshes/Vents:** Gently brush over speaker meshes and ventilation openings on phones, tablets, or laptops to clear accumulated dust.

## MAINTENANCE AND STORAGE

Proper care of your cleaning kit ensures its longevity and effectiveness.

- **Cleaning the Tools:** After each use, gently wipe the brush and pen nib with a clean, dry cloth to remove any accumulated debris. The microfiber swab can be hand-washed with mild soap and water, then air-dried completely before storage.
- **Storage:** Always store all components back in the product storage box when not in use. This protects the tools from dust and damage and keeps them organized.
- **Portability:** The compact design and lightweight nature (21 grams) of the kit make it highly portable. It can be easily carried in a bag or attached to a lanyard using the integrated hanging slot.

# Reserve Hanging Role Cards

Conveniently Attach To Lanyards For Easy Access  
& Secure Storage Of Your Important Cards Or Badges

## TROUBLESHOOTING

If you encounter issues while using your cleaning kit, consider the following:

- **Difficulty Removing Stubborn Dirt:** For heavily caked-on dirt, use the precision pen nib with gentle, repeated motions. Avoid excessive force. For very delicate areas, a slightly dampened (with water, not cleaning solution) microfiber swab can be used, followed by a dry wipe.
- **Tools Not Reaching:** Ensure the extension rod is properly attached to the precision pen nib for maximum reach into tight spaces.
- **Tools Seem Ineffective:** Ensure the tools are clean before use. A dirty brush or swab can spread dirt rather than remove it.
