

DBKWT F6

DBKWT Language Translator Device (Model F6) User Manual

Instant Translation for Travel, Business, and Study

1. INTRODUCTION

The DBKWT Language Translator Device, Model F6, is a compact and portable tool designed to facilitate communication across language barriers. It supports a wide array of languages for online and offline translation, making it suitable for various scenarios including travel, business meetings, and language learning.

Key features include:

- **Extensive Language Support:** Offers 139 languages for high-accuracy online translations, 18 offline voice translations, and 57 online photo translations.
- **Real-Time Interpretation:** Capable of real-time speech-to-text interpretation with recording functionality.
- **Two-Way Voice Translation:** Equipped with dual noise-canceling microphones for clear communication in both online and offline modes.
- **Photo Translation:** Utilizes a high-definition camera to translate text from images.
- **Compact Design:** Lightweight and easy to carry, designed for convenient one-hand operation.

2. SETUP

2.1. Charging the Device

Before first use, fully charge the device using the provided USB-C charging cable. Connect the cable to the USB-C port located at the bottom of the device and plug the other end into a compatible USB power adapter (not included). The device uses a standard USB-C port for charging.

2.2. Powering On/Off

To power on the device, press and hold the power button located on the side until the screen illuminates. To power off, press and hold the power button again and select "Power Off" from the on-screen options.

2.3. Initial Setup and Wi-Fi Connection

Upon first power-on, the device may guide you through an initial setup process. This typically includes selecting your preferred system language and connecting to a Wi-Fi network. A stable Wi-Fi connection is required for online translation features and software updates.

Navigate to the settings menu to connect to Wi-Fi. Select your network and enter the password if prompted. The device is

designed to connect to standard Wi-Fi networks.

2.4. Fingerprint Sensor

The device features a fingerprint sensor for quick unlocking. While the device may allow access without a specific fingerprint setup, it is recommended to configure your fingerprint for enhanced security. Refer to the device's settings for fingerprint management options.

3. OPERATING INSTRUCTIONS

3.1. Voice Translation (Online & Offline)

The device supports both online and offline voice translation. For online translation, ensure you are connected to Wi-Fi. For offline translation, the device has 18 built-in languages that do not require an internet connection.

- Select the "Voice" or "Offline" translation mode from the main menu.
- Choose the source and target languages. The device typically displays two languages, one on the left and one on the right.
- To speak in the left-side language, press and hold the **red button** located below the screen. Speak clearly into the microphone. Release the button when finished.
- To speak in the right-side language, press and hold the **blue button** located below the screen. Speak clearly into the microphone. Release the button when finished.
- The translated text will appear on the screen, and the device will speak the translation aloud. You can toggle the languages using the back-and-forth button on the screen.

Offline voice translation in 18 languages

Built-in offline translation engine, accurate translation even without internet connection

3.2. Photo Translation

The photo translation feature allows you to translate text from images. This supports up to 57 languages online.

- Select the "Photograph" icon from the main menu.
- Position the device's camera over the text you wish to translate.
- Tap the screen to capture the image. The device will process the image and display the translated text.

3.3. Real-Time Interpretation

This function allows for real-time speech-to-text interpretation and recording. It can record speech for up to 1 minute and save recordings for up to 60 minutes on the device.

- Select the "Interpret" icon.
- Begin speaking. The device will transcribe and translate your speech.
- Recordings can be synchronized to a mobile phone by scanning a QR code displayed on the device, allowing for viewing, downloading, and copying of content.

3.4. Audio Recording and Translation

The device supports voice recording in 10 languages, with the ability to translate and save audio recordings for up to 60 minutes.

- Select the "Recording" icon.
- Follow the on-screen prompts to start and stop recordings.
- Recorded audio can then be translated.

3.5. Input Translation

For text-based translation, use the "Input" function. This allows you to type in words or phrases for translation.

- Select the "Input" icon.
- Use the on-screen keyboard to enter text.
- The device will provide the translation.

Figure 3: The compact design allows for easy one-hand operation.

4.1. Cleaning the Device

To maintain the device's appearance and functionality, regularly wipe it with a soft, dry, lint-free cloth. Avoid using abrasive cleaners, solvents, or aerosol sprays, as these can damage the device's surface or internal components.

4.2. Software Updates

Periodically check for software updates in the device's settings menu. Updates can improve performance, add new features, and enhance language accuracy. Ensure the device is connected to Wi-Fi and has sufficient battery life before initiating an update.

4.3. Battery Care

To prolong battery life, avoid exposing the device to extreme temperatures. Charge the device regularly, but avoid leaving it fully charged or fully depleted for extended periods. The device contains one Lithium Ion battery.

5. TROUBLESHOOTING

If you encounter issues with your DBKWT Language Translator Device, refer to the following common troubleshooting steps:

- **Device Not Powering On:** Ensure the device is fully charged. Connect it to a power source and wait a few minutes before attempting to power on again.
- **Translation Inaccuracy:** Ensure you are speaking clearly and directly into the microphone. Verify that the correct source and target languages are selected. For online translation, check your Wi-Fi connection strength.
- **Wi-Fi Connection Issues:** Confirm that your Wi-Fi network is active and that you have entered the correct password. Try restarting both the translator device and your Wi-Fi router.
- **Screen Unresponsive:** If the screen is unresponsive, try restarting the device by holding down the power button. If the issue persists, allow the battery to fully drain and then recharge it.
- **Offline Translation Not Working:** Ensure that the desired offline language packs have been successfully downloaded to the device.

For persistent issues not covered here, please refer to the manufacturer's official support channels.
