5. MAINTENANCE AND CARE

Proper care will ensure the longevity and appearance of your AMERLIFE bed frame.

- **Cleaning:** Wipe the bed frame with a dry cloth to remove dust and debris. Avoid using liquid-based cleaning products, harsh chemicals, or abrasive materials, as these can damage the wood finish.
- **Inspection:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Placement:** Avoid placing the bed frame in direct sunlight or near heat sources, which can cause wood to dry out, crack, or fade.

6. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common solutions:

Squeaking or Noisy Operation:

- **Check Connections:** Ensure all bolts and screws are fully tightened. Loose connections are a common cause of noise.
- **Verify Assembly:** Review the assembly instructions to confirm that all parts are correctly installed. Improper assembly can lead to instability and noise.
- **Inspect Slats:** Ensure all wooden slats are properly seated and secured. Unevenly distributed slats can cause movement and noise.

Mattress Sliding:

- **Footboard Function:** The integrated footboard is designed to prevent mattress sliding. Ensure the mattress is properly aligned within the frame.
- **Anti-Slip Pads:** Consider placing anti-slip pads or a non-slip mattress grip mat between the mattress and the slats for added stability.
