## MAINTENANCE

---

Regular maintenance will help preserve the quality and extend the lifespan of your OLEVS bed frame.

- **Cleaning:** Wipe down metal and wood surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners. For the upholstered headboard, spot clean with a mild fabric cleaner if necessary.
- **Fastener Check:** Periodically check all bolts and screws to ensure they are tight. Re-tighten if any looseness is detected to maintain stability and prevent squeaking.
- **Weight Capacity:** Do not exceed the maximum weight capacity of 1000 lbs to prevent damage to the frame.

## TROUBLESHOOTING

---

If you encounter any issues with your OLEVS bed frame, refer to the following common problems and solutions:

- **Issue:** Bed frame is squeaking or making noise.  
**Solution:** Ensure all bolts and screws are securely tightened. The frame includes a mute sponge bar on the middle beam to reduce friction; verify it is correctly positioned.
- **Issue:** LED lights are not working or are flickering.  
**Solution:** Check the power connection of the LED strip to the main power source. Ensure the remote control

batteries are not depleted. If using the app, verify Bluetooth connection. If the issue persists, contact customer support.

- **Issue:** Charging station outlets/ports are not providing power or charging slowly.  
**Solution:** Ensure the bed frame's main power cord is securely plugged into a functioning wall outlet. For USB/Type-C ports, note that charging speed may vary depending on the device and cable; for faster charging, use the AC outlets with your device's original power adapter. If no power is detected, check the charging station's connection within the headboard.
- **Issue:** Difficulty with assembly.  
**Solution:** Refer to the detailed assembly instructions provided. Ensure all parts are correctly oriented and that you are using the correct fasteners for each step. If a step is unclear, review the diagrams carefully or seek assistance from a second person.
