6. TROUBLESHOOTING

If you encounter any issues with your AEOCKY Pandora Air Purifier, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Air purifier does not turn on.	Not plugged in; power outlet malfunction; damaged power cord.	Ensure the power adapter is securely plugged into both the unit and a working outlet. Check for damage to the cord.
Poor airflow or purification.	Blocked air inlets/outlets; dirty filter; filter still in plastic packaging.	Ensure nothing is obstructing the air inlets or outlets. Clean the washable pre-filter or replace the entire filter. Verify plastic packaging is removed from the filter.
Unusual noise during operation.	Loose filter; foreign object inside; unit not on a stable surface.	Check if the filter is securely installed and the base cover is locked. Inspect for any foreign objects. Place the unit on a flat, stable surface.
Aroma not diffusing.	No essential oil added; aroma box tray not fully inserted.	Add essential oil to the felt pad in the aroma box. Ensure the aroma box tray is fully pushed in.
Difficulty removing the base cover for filter access.	Cover is tightly secured or misaligned.	Ensure the unit is unplugged. Apply firm, even pressure while twisting the base cover counter-clockwise. If it feels stuck, try gently wiggling it while twisting. Do not force it excessively to avoid damage.

If the problem persists after trying these solutions, please contact AEOCKY customer support.
