## INSTALLATION INSTRUCTIONS

---

Follow these steps carefully to install the knurled insert:

1. **Preparation:** Ensure the Southbend Range equipment is completely cool and disconnected from all power sources. Clear the work area of any obstructions.
2. **Locate the Old Part:** Identify the existing knurled insert or the location where the new insert needs to be placed. Refer to your equipment's specific service manual if necessary.
3. **Remove Old Part (if applicable):** Carefully remove the old insert. This may require specific tools depending on how it was secured. Dispose of the old part responsibly.
4. **Insert New Part:** Align the Generic R2MidW18688 Knurled Insert with the designated opening. Apply gentle, even pressure to seat the insert firmly into place. Ensure it is flush and securely fitted.
5. **Secure (if applicable):** If the design requires additional securing (e.g., with a screw or clip), ensure these are properly fastened according to the equipment's specifications.
6. **Verify Installation:** Once installed, gently test the insert to ensure it is stable and does not wobble.
7. **Reconnect Power:** Reconnect the equipment to its power source only after confirming the insert is correctly installed and all tools are removed from the work area.

## OPERATING (FUNCTION)

---

The R2MidW18688 Knurled Insert functions as a critical component within your Southbend Range equipment, providing a secure and stable connection point. Once correctly installed, it contributes to the

overall structural integrity and operational efficiency of the appliance. No direct user operation is required for the insert itself; its function is passive and integral to the equipment's design.

## MAINTENANCE

To ensure the longevity and optimal performance of your knurled insert:

- **Regular Inspection:** Periodically inspect the insert for any signs of wear, corrosion, or loosening.
- **Cleaning:** If accessible, gently clean the area around the insert with a soft, dry cloth to remove any dust or debris. Avoid harsh chemicals that could damage the material.
- **Replacement:** If the insert shows significant signs of wear or damage, replace it promptly with a new Generic R2MidW18688 part to maintain equipment safety and function.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Insert feels loose after installation.	Improper seating or incorrect part.	Ensure the insert is fully seated and flush. Verify it is the correct part for your equipment. Re-install if necessary.
Difficulty inserting the part.	Misalignment or obstruction.	Check for any debris in the opening. Ensure the insert is perfectly aligned before applying pressure. Do not force the part.
Visible damage or wear shortly after installation.	Defective part or improper use.	Contact customer support for a replacement. Review equipment usage to ensure it's within design parameters.
