2. IMPORTANT SAFETY INFORMATION

WARNING: For your safety, the information in this manual must be followed to minimize the risk of fire or explosion, or to prevent property damage, personal injury, or death.

- This appliance is designed for Natural Gas (NG) use only and is not convertible to Liquid Propane Gas. Ensure your gas supply matches the appliance requirements.
- Always ensure proper ventilation when operating gas appliances.
- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- Never use the oven for space heating.
- The stainless steel band across the bottom of the oven door can become hot during operation. Exercise caution, especially around children and pets.
- The low-E glass window allows monitoring of cooking progress without opening the door, which helps maintain oven temperature and reduces exposure to hot steam.

3. PRODUCT FEATURES

Your Empava Gas Wall Oven is equipped with advanced features designed for optimal cooking performance and user convenience:

- **5 Cooking Functions:** Offers versatile cooking modes including Bake, Broil, Convection, Rotisserie, and Convection Rotisserie to meet diverse culinary needs.
- **Superior Convection Cooking:** A powerful convection system circulates heated air for fast preheating and uniform cooking, ensuring even baking and eliminating cold spots.

7. TROUBLESHOOTING

If you encounter issues with your Empava oven, please refer to the following general troubleshooting advice. For persistent problems, contact customer support.

- **Oven not heating:** Check if the oven is properly connected to the gas supply and electrical outlet. Ensure the control knobs are set correctly for the desired function and temperature.
- **Uneven cooking:** Ensure food is placed centrally on the rack and that the convection fan is operating correctly. Avoid overcrowding the oven.
- **Digital display not working:** Check the power supply. If the issue persists, a service technician may be required.
- **Gas sensor alarm activates during heating:** If a gas sensor alarm sounds when the oven is turned on, ensure there is no gas leak when the oven is off. This could indicate an issue with the oven's gas ignition or ventilation. Immediately turn off the oven and gas supply, ventilate the area, and contact a qualified technician.
