## MAINTENANCE

To ensure the longevity and optimal performance of your CUIIUC Dual Portable Monitor, follow these general maintenance guidelines:

- **Cleaning the Screen:** Use a soft, lint-free cloth lightly dampened with water or a non-abrasive screen cleaner. Avoid harsh chemicals or abrasive materials.
- **Cleaning the Casing:** Wipe the exterior with a soft, dry cloth.
- **Storage:** When not in use, fold the monitor and store it in a dry, cool place away from direct sunlight and extreme temperatures.

- **Handling:** Always handle the monitor with care to avoid dropping or impacting the screens.

## TROUBLESHOOTING

If you encounter issues with your CUIUIC Dual Portable Monitor, refer to the following common solutions:

- **No Signal / Display Issues:**
  - Ensure all cables (USB-C, HDMI, power) are securely connected to both the monitor and your device.
  - Verify that your laptop or PC's display settings are configured to detect and extend/duplicate the display.
  - Confirm that the monitor is receiving adequate power. It is recommended to connect the power supply for a better experience.
  - If using USB-C, ensure your device's USB-C port supports video output (DisplayPort Alternate Mode).
  - Try using different cables or ports if available, as a faulty cable can cause connection issues.
- **Short USB-C Power Cord:** The included USB-C power cord is 3 ft. If you require a longer reach, a separate 10 ft USB-C cable can be purchased for more flexible setup options.
- **Screen Mirroring Instead of Extending:** Adjust your operating system's display settings to 'Extend' rather than 'Duplicate' or 'Mirror' if you desire separate content on each screen.
