# yAyusi Dual-lamp Video Conference Lighting Instruction Manual

Model: F-663

Brand: yAyusi

## INTRODUCTION

Thank you for choosing the yAyusi Dual-lamp Video Conference Lighting kit. This product is designed to enhance your video calls, streaming, and content creation by providing optimal illumination. Its dual-lamp design ensures brighter and more even lighting, helping you present your best self in any virtual environment. This manual provides detailed instructions for setup, operation, and maintenance to ensure you get the most out of your new lighting system.

## WHAT'S IN THE Box

Please verify that all components are present in your package:

- 2 x Video Conference Lights
- 2 x Light Stands
- 1 x Remote Control

- 1 x Adapter
- 1 x Cable
- 1 x Wire Tie
- 4 x Wire Buckles
- 1 x User Manual

Figure 2: All components included in the package.

## SETUP

Follow these steps to set up your yAyusi Dual-lamp Video Conference Lighting:

1. **Attach Light to Stand:** Connect each video conference light to its respective stand. The lights feature a screw mount for secure attachment.
2. **Choose Installation Mode:** The stands support two usage modes:
  - **Clip-on Mode:** For monitors or laptops, position the stand on top of your screen. The adjustable clip ensures a secure fit without scratching your device, thanks to built-in sponge pads.

- **Desktop Mode:** Fold the stand to create a stable base for desktop use. This allows you to place the lights on any flat surface.

- Connect Power:** Use the provided USB cable and adapter to connect the lights to a power source. The Y-cable allows both lights to be powered from a single USB connection.
- Adjust Angle:** The webcam lighting features a rotatable design, supporting 360° horizontal and 180° vertical rotation. Adjust the angle to achieve optimal lighting for your setup.

## OPERATING INSTRUCTIONS

Your yAyusi lighting kit offers flexible control options and customizable settings:

- Power On/Off:** Use the touch control button on the light bar or the power button on the remote control to turn the lights on or off.
- Adjust Brightness:** The lights offer 10 levels of brightness (0-100%). Use the '+' and '-' buttons on the light bar or the remote control to adjust the intensity.
- Change Color Mode:** Select from 3 color modes (3000K Warm Light, 4500K Neutral Light, 6500K Cool Light) to match your environment or preference. Use the 'M' button on the light bar or the remote control to cycle through the modes.

## MAINTENANCE

To ensure the longevity and optimal performance of your lighting kit, follow these simple maintenance guidelines:

- **Cleaning:** Gently wipe the light bars and stands with a soft, dry cloth. Avoid using abrasive cleaners or solvents that could damage the surface.
- **Storage:** When not in use, store the lights in a cool, dry place away from direct sunlight and extreme temperatures.
- **Cable Care:** Avoid bending or crimping the USB cable excessively to prevent internal damage. Use the provided wire tie and buckles for neat cable management.

## TROUBLESHOOTING

If you encounter any issues with your yAyusi lighting kit, please refer to the following common solutions:

- **Lights not turning on:** Ensure the USB cable is securely connected to both the light bars and the power

adapter/USB port. Verify that the power source is active.

- **Remote control not working:** Check if the remote control's battery (1 A battery, included) is properly inserted and has sufficient charge. Ensure there are no obstructions between the remote and the lights.
- **Uneven lighting:** Adjust the angle and position of both light bars to ensure even illumination. Experiment with different brightness levels and color modes.

If the problem persists after attempting these solutions, please contact customer support.
