Gevi Household GIMN-1000B

Gevi Household V2.0 Countertop Gemi Nugget Ice Maker User Manual

Model: GIMN-1000B

PRODUCT OVERVIEW

The Gevi Household V2.0 Countertop Gemi Nugget Ice Maker produces soft, chewable nugget ice, also known as pellet or Chewblet ice. This machine is designed for convenience and efficiency, providing up to 30 pounds of ice per day with a 4.8-pound ice basket and a 2.8-liter water reservoir. Its sleek stainless steel housing and compact design allow it to fit under most wall cabinets.

WHAT'S IN THE BOX

Upon unpacking your Gevi Nugget Ice Maker, please ensure all components are present and in good condition.

- Gevi Household V2.0 Countertop Gemi Nugget Ice Maker Unit

- Ice Scoop
- Ice Basket
- 10ft 1/4" Hose (for auto water refill)
- User Manual

SETUP AND INSTALLATION

1. Placement

Place the ice maker on a stable, level surface away from direct sunlight and heat sources. Ensure there is adequate ventilation around the unit. The compact design, measuring 17.3" (D) x 9.7" (W) x 16.7" (H), allows it to fit conveniently under most standard wall cabinets.

Image: Diagram showing the dimensions of the Gevi Nugget Ice Maker: 9.7 inches wide, 17.3 inches deep, and 16.7 inches high, illustrating its compact size for countertop placement.

2. Water Refill Options

The Gevi ice maker offers two convenient methods for water input:

- **Manual Refill:** Open the top lid and pour water directly into the 2.8-liter (3 quarts) water reservoir. The anti-drip design helps prevent spills.
- **Auto Refill:** For continuous ice production, connect the included 10ft 1/4" hose to a water supply line. This provides automatic water replenishment.

Two Ways to Add Water

Manual Refill

- Open and Pour
- Anti-drip Design

Auto Refill

- Easy Installation
- Hose Included

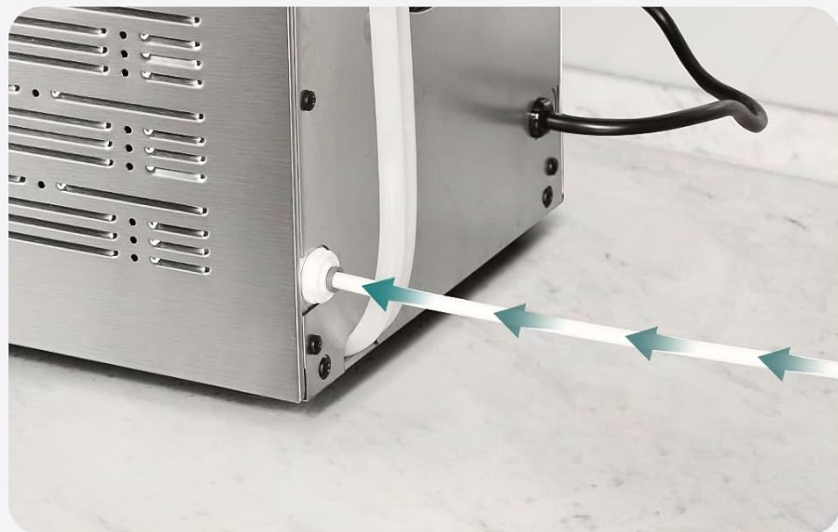

Image: Illustration demonstrating the two methods of adding water: manually pouring water into the top reservoir and connecting a hose for automatic water refill.

3. Initial Cleaning

Before first use, it is recommended to perform an initial cleaning cycle. Refer to the "Maintenance" section for detailed instructions on using the self-cleaning function.

OPERATING INSTRUCTIONS

1. Power On and Ice Production

Plug the ice maker into a grounded electrical outlet. Press the power button on the touch control panel to begin ice production. The machine is designed to produce ice quickly, with the first batch ready in approximately 15 minutes. It can produce up to 30 pounds of nugget ice in 24 hours.

Image: Infographic highlighting the ice maker's performance: 15 minutes for quick ice making, 30 lbs daily production, 2.8L water reservoir, and 4.8 lbs ice basket capacity.

2. Ice Basket and Storage

The ice maker features a 4.8-pound capacity ice basket. Once ice is produced, it will drop into this basket. The unit has extra thick insulation and double-layer space insulation, providing an 85% ice retention rate at 80°F ambient temperature for 12 hours. **Note: The ice basket does not have a refrigeration system. For long-term storage, transfer the ice to a freezer.**

Image: Cross-section view of the Gevi ice maker highlighting its 1-inch thick material insulation and double-layer space insulation for ice retention.

3. Low Noise Operation

Equipped with a high-performance compressor and muted exhaust fan, the Gevi ice maker operates with low noise, ensuring a quiet environment.

MAINTENANCE

1. Auto Self-Cleaning Function

The ice maker features an auto self-cleaning function to ensure fresh ice and maintain hygiene. This function helps to remove impurities and keep the internal components clean. Refer to the control panel for the "Clean" button or mode.

Image: Diagram illustrating the internal water circulation during the auto self-cleaning process, emphasizing its role in ensuring fresh ice, maintaining health, and removing limescale.

2. Descaling

To prevent mineral buildup and ensure optimal performance, descale your machine once a month. If you live in an area with hard water, more frequent descaling may be necessary. A descaler is required for effective limescale removal.

- **Moderately Hard Water Areas:** Descal monthly.
- **Hard to Very Hard Water Areas:** Descal every two to three weeks.

Descal Your Machine Once A Month

More frequently if you live in an area with hard water.

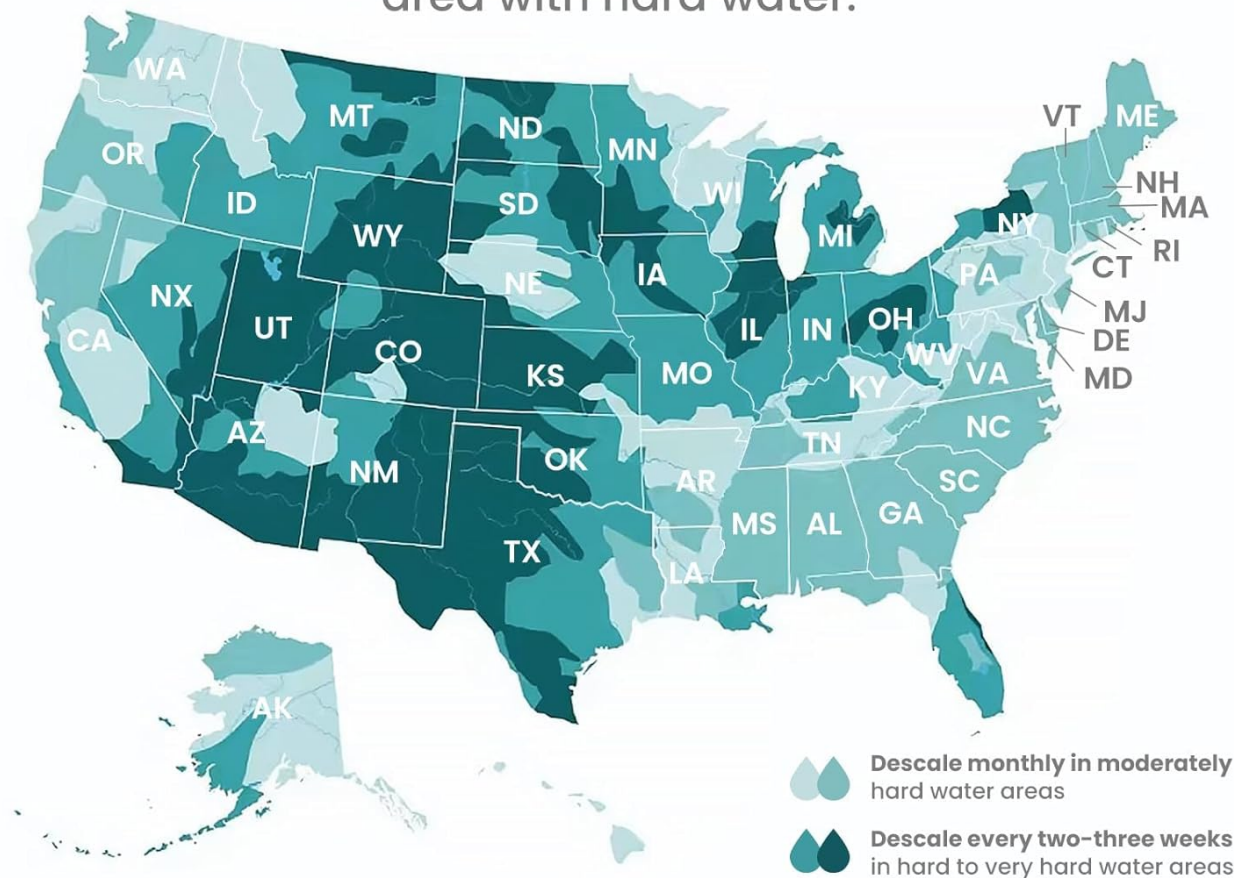

Image: Map of the United States indicating regions with varying water hardness levels (Slightly Hard, Moderately Hard, Hard, Very Hard) and corresponding recommended descaling frequencies for the ice maker.

3. General Cleaning

Regularly wipe down the exterior of the unit with a soft, damp cloth. Ensure the ice basket and scoop are cleaned periodically with mild soap and water, then rinsed thoroughly.

TROUBLESHOOTING

This section provides solutions to common issues you might encounter with your Gevi Nugget Ice Maker. For problems not listed here, please contact customer support.

• No Ice Production:

- Check if the unit is properly plugged in.
- Ensure the water reservoir is filled or the auto-refill hose is connected and water supply is on.
- Verify that the power button is pressed and the machine is in operation mode.

- **Ice Production is Slow:**

- Ensure the ambient temperature is not excessively high.
- Check for proper ventilation around the unit.
- Perform a descaling cycle if mineral buildup is suspected.

- **Unusual Noise:**

- Ensure the unit is on a stable, level surface.
- Check for any obstructions in the ice chute or water lines.

- **Ice Tastes Off:**

- Perform a self-cleaning cycle.
- Descal the machine.
- Use filtered water.

SPECIFICATIONS

Feature	Detail
Product Dimensions (D x W x H)	17.3" x 9.7" x 16.7" (44CM x 24.6CM x 42.5CM)
Weight	38 Pounds
