MAINTENANCE

To ensure the longevity and optimal performance of your BRIKSMAX 2.0 Light Kit, consider the following maintenance tips:

- **Cleaning:** Gently dust the lights and wires with a soft, dry cloth. Avoid using liquid cleaners directly on the electronic components.
- **Wire Management:** Periodically check the wire organization to ensure no wires are pinched or exposed, which could lead to damage.
- **Battery Replacement:** If using the AA Battery Box, replace batteries when the lights dim or cease to function.

Always use new batteries of the same type.

- **Storage:** If disassembling the light kit for storage, carefully disconnect components and store them in a dry, cool place away from direct sunlight.

TROUBLESHOOTING

If you encounter any issues with your BRIKSMAX 2.0 Light Kit, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Lights do not turn on.	No power, loose connection, or dead batteries.	Ensure the power source (battery box switch or USB connection) is active. Check all connections between lights, expansion boards, and power source for secure fit. Replace batteries in the AA Battery Box if they are depleted.
Some lights are not working.	Loose connection to a specific light or expansion board, or a damaged light.	Inspect the connections for the non-working lights. Ensure the light is correctly inserted into the expansion board. If a light is damaged, contact customer support for a replacement.
Lights are dim.	Low battery power.	Replace the batteries in the AA Battery Box. If using USB, ensure the USB port provides sufficient power.
Wires are visible or not fitting correctly.	Improper wire routing.	Re-route wires using the provided wire organizing blocks to conceal them within the Lego structure. Refer to the detailed paper instructions for optimal routing.
