PKPOWER 2-Prong AC Cord

PKPOWER 2-Prong AC Power Cord User Manual

For APDOE-M16 Egg Incubator

1. Introduction

This manual provides essential instructions for the safe installation, operation, and maintenance of your PKPOWER 2-Prong AC Power Cord. This cord is specifically designed as a replacement or spare for the APDOE-M16 Egg Incubator, ensuring reliable power delivery. Please read this manual thoroughly before use to ensure proper function and safety.

2. Safety Information

WARNING: To reduce the risk of electric shock, fire, or injury, always follow these basic safety precautions.

- Ensure the power cord is compatible with your device (APDOE-M16 Egg Incubator) and power outlet specifications (100-240V).
- Do not use the cord if it is damaged, frayed, or has exposed wires. Replace immediately.
- Do not overload electrical outlets.
- Keep the cord away from water, heat sources, and sharp objects.
- Always grasp the plug, not the cord, when disconnecting from an outlet or device.
- This cord is for indoor use only.

3. Compatibility

This PKPOWER 2-Prong AC Power Cord is a direct replacement for the power cord used with the **APDOE-M16 Egg Incubator Hatching 12 Eggs Automatic Turner**. It features a standard NEMA 1-15P (US 2-prong) male plug and an IEC C7 (figure-8) female connector.

Image 3.1: Close-up view of the 2-prong male plug and the figure-8 (C7) female connector, illustrating the distinct shapes of each end of the power cord.

4. Setup and Installation

1. **Inspect the Cord:** Before connecting, visually inspect the entire length of the PKPOWER AC cord for any signs of damage, cuts, or fraying. Do not use if damaged.
2. **Connect to Device:** Locate the power input port on your APDOE-M16 Egg Incubator. This port is typically a

figure-8 (C7) receptacle. Align the figure-8 female connector of the PKPOWER cord with the incubator's port and firmly push it in until it is fully seated.

3. **Connect to Power Outlet:** Insert the 2-prong male plug of the PKPOWER cord into a standard 100-240V AC wall outlet. Ensure the outlet is easily accessible and not overloaded.
4. **Verify Connection:** Confirm that both ends of the cord are securely connected. The incubator should now receive power.

Image 4.1: The PKPOWER 2-Prong AC Power Cord, coiled for storage, showing both the male and female connectors.

5. Operating Instructions

Once the PKPOWER AC Power Cord is correctly installed and connected to both the APDOE-M16 Egg Incubator and a power outlet, the incubator will receive electrical power. Refer to your APDOE-M16 Egg Incubator's specific user manual for instructions on operating the incubator itself.

- Ensure the cord is not kinked, pinched, or run under heavy objects.

- Avoid placing the cord in high-traffic areas where it could be tripped over or damaged.

6. Care and Maintenance

- **Cleaning:** Disconnect the cord from both the power outlet and the incubator before cleaning. Wipe the cord with a dry, soft cloth. Do not use liquid cleaners or immerse the cord in water.
- **Storage:** When not in use, coil the cord loosely and store it in a dry, cool place away from direct sunlight and extreme temperatures. Avoid tight coiling or bending that could stress the cable.
- **Regular Inspection:** Periodically inspect the cord for any signs of wear, damage, or discoloration. If any damage is observed, discontinue use immediately and replace the cord.

Image 6.1: A detailed view of the IEC C7 (figure-8) female connector, showing its two pin receptacles.

7. Troubleshooting

If your APDOE-M16 Egg Incubator is not receiving power after connecting the PKPOWER AC Power Cord, consider the following:

- **No Power to Incubator:**

- Ensure both ends of the power cord are fully and securely plugged into the incubator and the wall outlet.
- Check if the wall outlet is functional by plugging in another device.
- Inspect the power cord for any visible damage. If damaged, replace the cord.
- Verify that the incubator's power switch (if any) is in the "ON" position.

- **Loose Connection:** If the cord feels loose, gently push it in further. If it consistently comes loose, the cord or the device's port may be worn.

8. Product Specifications

Feature	Specification
Cable Length	5 feet (approx. 1.5 meters)
Input Voltage	100-240V AC
Connector Type (Male)	NEMA 1-15P (US 2-Prong)
Connector Type (Female)	IEC C7 (Figure-8)
Color	Black
Item Weight	2 ounces (approx. 57 grams)
Product Dimensions (Packaging/Item)	3 x 2 x 0.5 inches

9. Warranty and Support

PKPOWER stands behind the quality of its products. If you encounter any issues or have questions regarding your 2-Prong AC Power Cord, please contact our customer support team. Refer to your purchase documentation or the PKPOWER official website for specific warranty terms and contact information.
