Portronics My Buddy Air 5

Portronics My Buddy Air 5 Laptop Cooling Pad User Manual

Model: My Buddy Air 5 (POR-2643)

INTRODUCTION

The Portronics My Buddy Air 5 is a laptop cooling pad designed to enhance laptop ventilation and prevent overheating. It features dual cooling fans, adjustable height settings for ergonomic use, and a durable ABS construction. This manual provides instructions for the proper setup, operation, maintenance, and troubleshooting of your cooling pad.

PRODUCT OVERVIEW

The My Buddy Air 5 cooling pad is equipped with several features to optimize your laptop's performance and user comfort.

- **Dual Cooling Fans:** Two high-speed fans operating at up to 1200 RPM provide efficient airflow to dissipate heat from your laptop.
- **Adjustable Height:** Seven adjustable height levels allow for customizable positioning to improve posture and viewing angles.
- **Durable Construction:** Built with robust ABS plastic for longevity and stability.
- **Laptop Compatibility:** Designed to accommodate laptops up to 15.6 inches in size.
- **RGB Lighting:** Features integrated RGB lighting with multiple modes for visual customization.
- **Built-in Smartphone Stand:** A convenient integrated stand to hold your smartphone.
- **USB Passthrough:** Allows for connection of other USB devices.
- **Fan Speed Control:** Dedicated controls for adjusting fan speed.

Enhance Laptop Ventilation

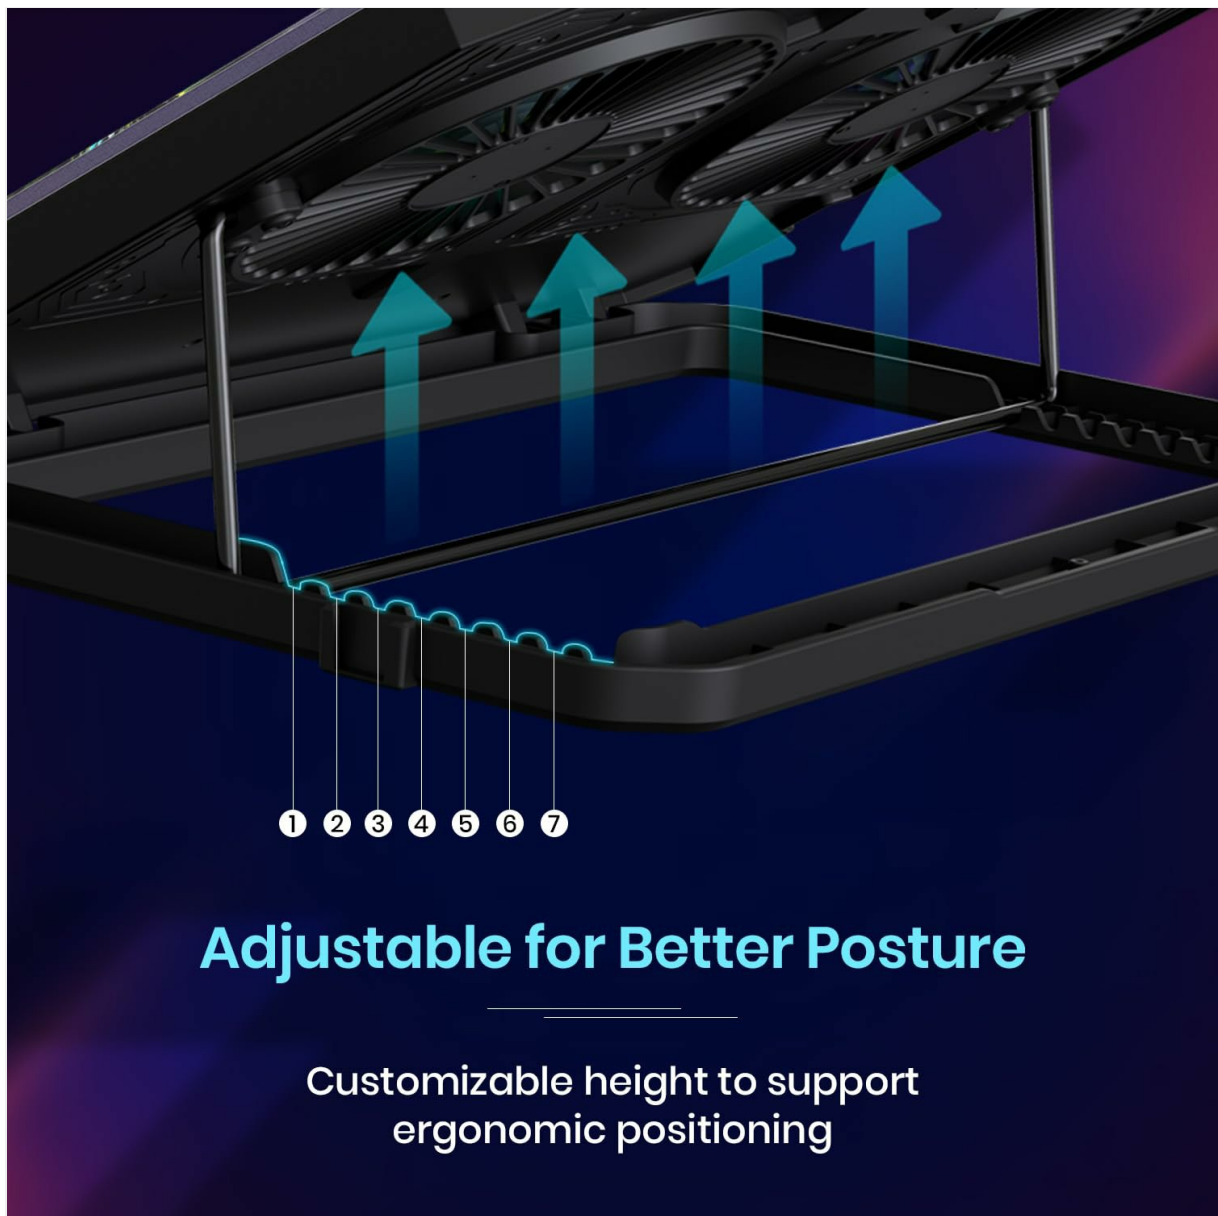

Improves cooling to prevent overheating issues

SETUP

1. **Unpack the Cooling Pad:** Carefully remove the Portronics My Buddy Air 5 from its packaging. Ensure all components are present and undamaged.
2. **Position the Cooling Pad:** Place the cooling pad on a stable, flat surface where you intend to use your laptop.
3. **Adjust Height (Optional):** Lift the rear support stand and select one of the seven available height adjustment levels to achieve your desired ergonomic angle. Ensure both support legs are securely engaged.
4. **Place Your Laptop:** Carefully place your laptop on the cooling pad. Ensure it is centered and stable. The front lip of the cooling pad will help prevent the laptop from sliding.
5. **Connect Power:** Connect the USB cable from the cooling pad to an available USB port on your laptop. The cooling pad draws power directly from the laptop's USB port.

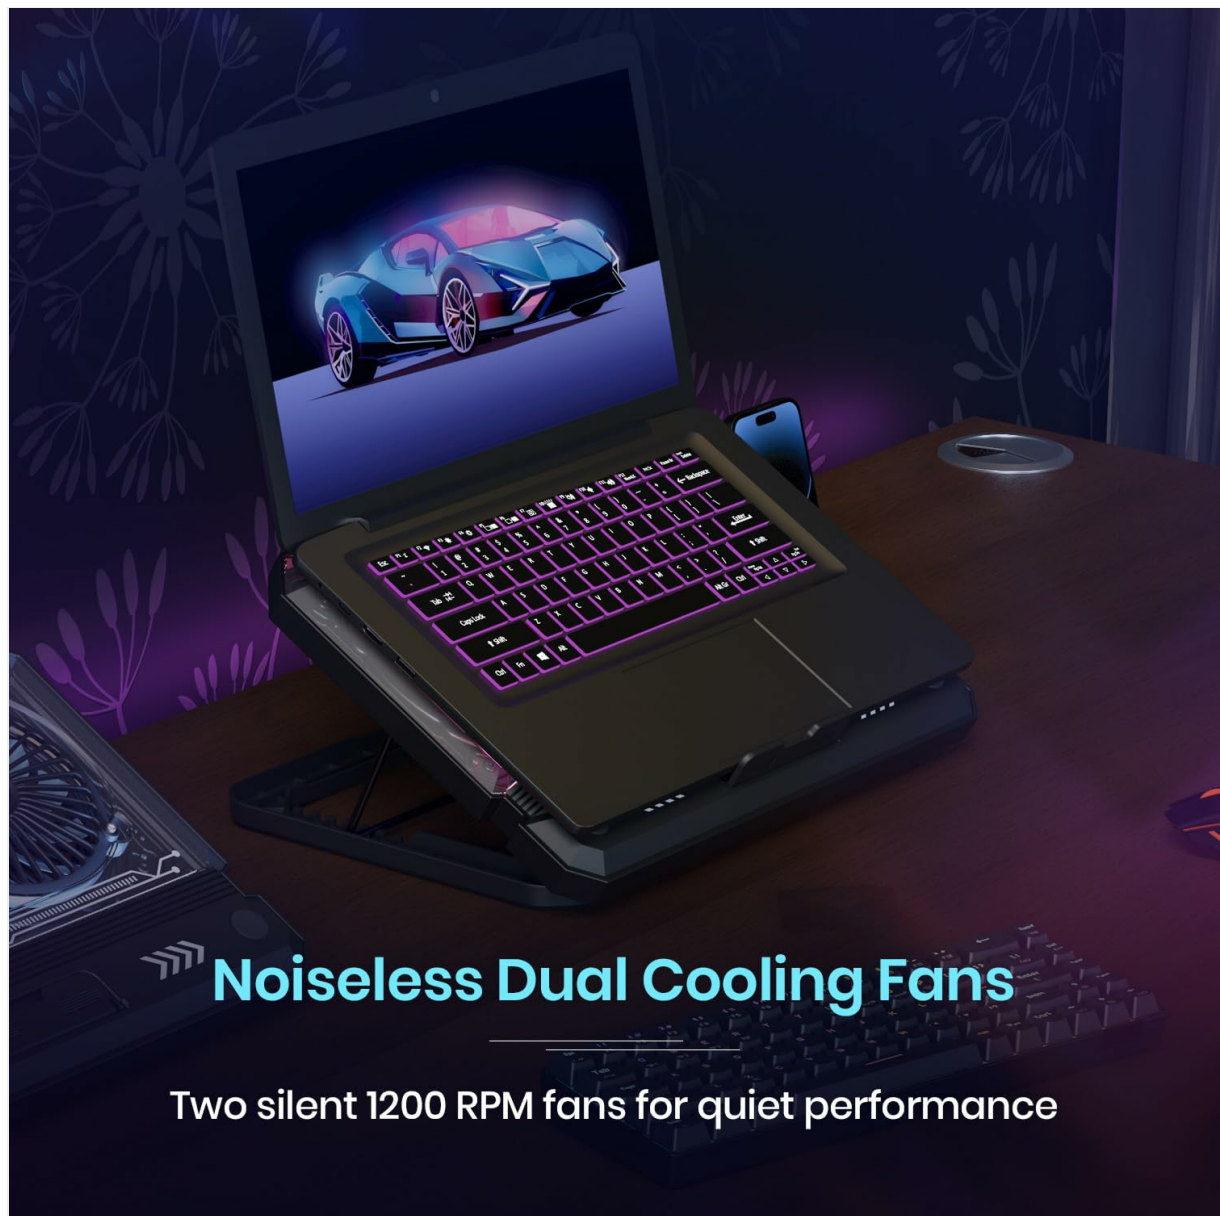

Adjustable for Better Posture

Customizable height to support ergonomic positioning

OPERATING INSTRUCTIONS

1. **Power On/Off:** Once connected to your laptop via USB, the cooling fans will typically start automatically. If there is a dedicated power button, press it to turn the fans on or off.
2. **Adjust Fan Speed:** Use the fan speed control dial or buttons (if present) on the cooling pad to increase or decrease the fan rotation speed. Higher speeds provide more cooling.
3. **Control RGB Lighting:** Locate the RGB lighting control button. Press it to cycle through different lighting modes (e.g., static colors, breathing effects, blinking) or to turn the RGB lights off.
4. **Utilize Smartphone Stand:** Pull out the integrated smartphone stand located on the front of the cooling pad to place your mobile device.

Noiseless Dual Cooling Fans

Two silent 1200 RPM fans for quiet performance

MAINTENANCE

- **Cleaning:** Regularly clean the surface of the cooling pad and the fan grilles with a soft, dry cloth to prevent dust accumulation. Dust can impede airflow and reduce cooling efficiency.
- **Avoid Liquids:** Do not use liquid cleaners or spray directly onto the cooling pad. If necessary, use a slightly damp cloth and ensure the pad is completely dry before reconnecting it to power.
- **Storage:** When not in use, store the cooling pad in a clean, dry environment away from direct sunlight and extreme temperatures.
- **Cable Care:** Ensure the USB cable is not bent sharply or tangled, as this can damage the cable and affect connectivity.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Fans are not spinning.	No power supply; USB cable not connected properly; Faulty USB port.	◦ Ensure the USB cable is securely connected to both the cooling pad and a working USB port on your laptop. ◦ Try connecting to a different USB port. ◦ Check if your laptop is powered on.
Cooling performance is poor.	Dust accumulation on fans/grilles; Laptop vents are blocked; Fan speed is too low.	◦ Clean the fans and grilles of the cooling pad. ◦ Ensure your laptop's intake and exhaust vents are clear of obstructions. ◦ Increase the fan speed using the control dial/buttons. ◦ Ensure the cooling pad is positioned correctly under your laptop's vents.
RGB lighting is not working.	RGB function is turned off; Power issue.	◦ Press the RGB control button to cycle through modes or turn it on. ◦ Ensure the cooling pad is receiving power.

SPECIFICATIONS

Feature	Detail
Brand	Portronics
Model Name	My Buddy Air 5
