# BOSCH Air 4000 Air Purifier Replacement Filter User Manual

Model: 7733703205

## 1. INTRODUCTION

---

This manual provides essential information for the proper installation and maintenance of your BOSCH Air 4000 Air Purifier Replacement Filter. This 3-in-1 filter is designed to maintain optimal air quality in your BOSCH Air 4000 Air Purifier.

## 2. PRODUCT OVERVIEW

---

The BOSCH Air 4000 Replacement Filter is a comprehensive 3-in-1 filtration system engineered to capture a wide range of airborne particles and odors. It consists of three distinct layers:

- **Pre-filter:** Captures larger particles such as dust, lint, and pet dander, extending the life of the subsequent filters.
- **Activated Carbon Filter:** Effectively absorbs odors from cooking, pets, smoke, and volatile organic compounds (VOCs).
- **HEPA Layer:** Removes over 99% of fine particles down to 0.3 microns, including pollen, viruses, smoke, and other allergens.

### 3. INSTALLATION (FILTER REPLACEMENT)

---

Follow these steps to replace the filter in your BOSCH Air 4000 Air Purifier. Always refer to your air purifier's main instruction manual for specific model details and safety precautions.

1. **Power Off and Unplug:** Before beginning, ensure the air purifier is turned off and unplugged from the power outlet to prevent electrical hazards.
2. **Access Filter Compartment:** Locate the filter compartment on your BOSCH Air 4000 Air Purifier. This is typically at the bottom or back of the unit. Open the cover or panel as instructed in your air purifier's manual.
3. **Remove Old Filter:** Carefully remove the used filter. It may be dusty, so handle it over a waste bin. Dispose of the old filter according to local regulations.
4. **Unpack New Filter:** Remove the new BOSCH Air 4000 Replacement Filter from its protective packaging. Ensure all plastic wrapping is removed before installation.
5. **Insert New Filter:** Place the new filter into the compartment, ensuring it is oriented correctly. There may be an arrow or specific alignment guides. Gently push it into place until it fits snugly.
6. **Close Compartment:** Securely close the filter compartment cover or panel.
7. **Reset Filter Indicator:** Plug the air purifier back in and turn it on. If your air purifier has a filter replacement indicator light, follow the instructions in your air purifier's manual to reset it. This usually involves pressing and holding a specific button for a few seconds.

## 4. MAINTENANCE

---

Regular filter replacement is crucial for maintaining the performance and efficiency of your BOSCH Air 4000 Air Purifier.

- **Replacement Frequency:** The lifespan of the filter depends on usage and air quality. As a general guideline, it is recommended to replace the filter every 6-12 months. Your air purifier's filter indicator light will also signal when a replacement is due.
- **Cleaning:** The 3-in-1 filter is not washable. Attempting to wash the filter will damage its structure and filtration capabilities.
- **Storage:** Store new, unused filters in their original sealed packaging in a cool, dry place away from direct sunlight and extreme temperatures.

## 5. TROUBLESHOOTING

---

If you encounter issues after replacing your filter, consider the following:

- **Reduced Airflow:** Ensure the new filter is installed correctly and the compartment cover is fully

closed. Check for any obstructions around the air intake or outlet of the air purifier.

- **Persistent Odors:** Verify that all plastic packaging has been removed from the new filter. If odors persist, it may indicate a need for more frequent filter changes due to high levels of pollutants in the environment.
- **Filter Indicator Light Remains On:** After installing a new filter, you must manually reset the filter life indicator on your air purifier. Refer to your air purifier's main manual for specific instructions on how to perform this reset.
- **Unusual Noises:** Ensure the filter is seated properly and not loose within the compartment. If noises persist, consult your air purifier's main manual or contact customer support.

## 6. SPECIFICATIONS

Specification	Detail
Brand	Bosch Thermotechnology
Model Number	7733703205
Compatible Device	BOSCH Air 4000 Air Purifier
Filter Type	3-in-1 (Pre-filter, Activated Carbon, HEPA)
Material Type	Cotton
Item Weight	2.59 pounds
Product Dimensions	9.06 x 8.99 x 8.99 inches
UPC	052575090085

## 7. WARRANTY AND SUPPORT

This replacement filter is designed for use with the BOSCH Air 4000 Air Purifier. For warranty information regarding your air purifier or this replacement part, please refer to the original air purifier's instruction manual or visit the official Bosch Thermotechnology website.
