# Multiple Ports And Easy Connection

Illustration of the projector's versatile connectivity options, highlighting its HDMI and USB ports for connecting various devices such as gaming consoles, laptops, and external storage.

## SETUP GUIDE

### 1. Initial Power On

1. Connect the power adapter to the projector's power input port and then plug it into a wall outlet.
2. Press the power button on the projector or the remote control to turn on the device.
3. The projector will boot up and display the Android TV home screen.

### 2. Positioning and Image Adjustment

- Placement:** Position the projector on a stable, flat surface. Utilize the 180-degree rotatable stand to adjust the projection angle as needed for ceiling, wall, or floor projection.
- Focus:** Adjust the focus ring on the projector lens until the image appears clear and sharp.
- Keystone Correction:** The projector features automatic keystone correction. If the image appears trapezoidal, the projector

will automatically adjust it to a rectangular shape. Manual adjustments may also be available in the settings menu if needed.

- **Zoom Function:** Use the zoom function (35%-100%) in the settings to adjust the screen size without moving the projector.

### 3. Network and Bluetooth Connection

- **Wi-Fi Connection (WiFi 6):** Navigate to the 'Settings' menu on the Android TV interface, select 'Network & Internet', choose your Wi-Fi network, and enter the password.
- **Bluetooth Connection (BT5.2):** In 'Settings', select 'Connected Devices' or 'Bluetooth'. Turn on Bluetooth and pair with your desired external speakers or headphones for enhanced audio.

### 4. Connecting External Devices

- **HDMI:** Connect gaming consoles (e.g., PS5), TV sticks, laptops, or other HDMI-enabled devices to the projector's HDMI port using the provided HDMI cable. Select the HDMI input source from the projector's input menu.
- **USB:** Insert a USB disk into the USB port to play media files directly.
- **Audio Output:** Connect external speakers or headphones via the audio output port if not using Bluetooth.

## OPERATING INSTRUCTIONS

---

### 1. Navigating Android TV

- Use the remote control or the included wireless mouse to navigate the Android TV interface. The mouse provides a more intuitive experience for certain applications.
- The home screen provides access to installed apps, settings, and input sources.

### 2. Using Streaming Applications

- The projector comes with pre-installed apps like YouTube, Netflix, and Prime Video.
- Log in to your accounts within each application to access content.
- You can download additional apps from the Google Play Store.

### 3. Media Playback

- For USB media, select the USB input source or use a file manager app to browse content.
- The projector supports various video, audio, and image formats.

### 4. Screen Mirroring (if applicable)

- If your device supports screen mirroring (e.g., Miracast, AirPlay), you can cast your phone or tablet screen to the projector. Refer to your device's instructions for screen mirroring setup.

## MAINTENANCE

---

- **Lens Cleaning:** Use a soft, lint-free cloth specifically designed for optical lenses to gently wipe the projector lens. Do not use abrasive cleaners or cloths.
- **Ventilation:** Ensure the projector's ventilation vents are clear and unobstructed to prevent overheating. Do not place the projector on soft surfaces that may block airflow.
- **Storage:** When not in use, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures. Use the original packaging or a protective case for storage and transport.
- **General Cleaning:** Wipe the exterior of the projector with a soft, dry cloth. Avoid using liquid cleaners directly on the device.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
No image on screen	Power cable disconnected; Incorrect input source; Projector off.	Check power connection; Select correct input source (HDMI, USB); Turn on projector.
Image is blurry	Focus not adjusted; Projector too far/close to screen.	Adjust focus ring; Reposition projector or use zoom function.
No sound	Volume too low; External audio device not connected/paired; Incorrect audio output selected.	Increase volume; Check Bluetooth connection or audio cable; Select correct audio output in settings.
Wi-Fi connection issues	Incorrect password; Router too far; Network interference.	Re-enter password; Move projector closer to router; Restart router and projector.
