SETUP GUIDE

1. Initial Charging

Before first use, fully charge your MP3 player. Connect the provided USB-C cable to the device's charging port and the other end to a compatible USB power adapter (not included) or a computer's USB port. A full charge typically takes approximately 2 hours. The device is equipped with a 1500mAh lithium battery.

2. Powering On/Off

- To power on: Press and hold the power button located on the side of the device until the screen illuminates.
- To power off: Press and hold the power button until a power-off menu appears on the screen. Select 'Power off'.

3. Connecting to Wi-Fi

The MP3 player supports dual-band 2.4GHz and 5GHz Wi-Fi for stable wireless connectivity. To connect:

1. Go to 'Settings' from the home screen.
2. Select 'Network & Internet'.
3. Toggle Wi-Fi 'On'.
4. Select your desired Wi-Fi network from the list.
5. Enter the network password if prompted and tap 'Connect'.

Strong Network Connect

Built-in dual-band 2.4GHz and 5GHz Wi-Fi provides stronger resistance to interference and a more stable wireless signal.

4. Connecting to Bluetooth Devices

The device features a Bluetooth chip for two-way sending and receiving, allowing connection to headphones, speakers, or car audio systems.

1. Ensure the Bluetooth device you wish to connect is in pairing mode.
2. On your MP3 player, go to 'Settings' and select 'Connected devices'.
3. Tap 'Pair new device'.
4. Select your Bluetooth device from the list of available devices.
5. Confirm the pairing on both devices if prompted.

MAINTENANCE

1. Battery Care

To maximize battery lifespan:

- Avoid extreme temperatures.
- Do not allow the battery to fully deplete frequently.
- If the device is completely discharged and does not turn on with a standard charger, try using a lower amperage charger for a few minutes to initiate charging.

Long Battery Life

Low-power solutions ensure your continuous enjoyment of music and movies

Video  5 Hours

Music  25 Hours

2. Cleaning

Use a soft, lint-free cloth to clean the screen and body of the device. Avoid abrasive materials or harsh chemicals.

TROUBLESHOOTING

Device Does Not Turn On After Full Discharge

- If the device has completely run out of battery and won't power on with your usual charger, try connecting it to a lower amperage charger (e.g., a standard USB port on a computer or a less powerful wall adapter) for a few minutes. This can sometimes initiate the charging process when a fast charger might not.
- Ensure the USB-C cable is securely connected to both the device and the power source.

Music Files Not Appearing

- Verify that the music files are in a supported format (MP3, WAV, FLAC, AAC, APE, OGG, M4A, WMA, MP2).

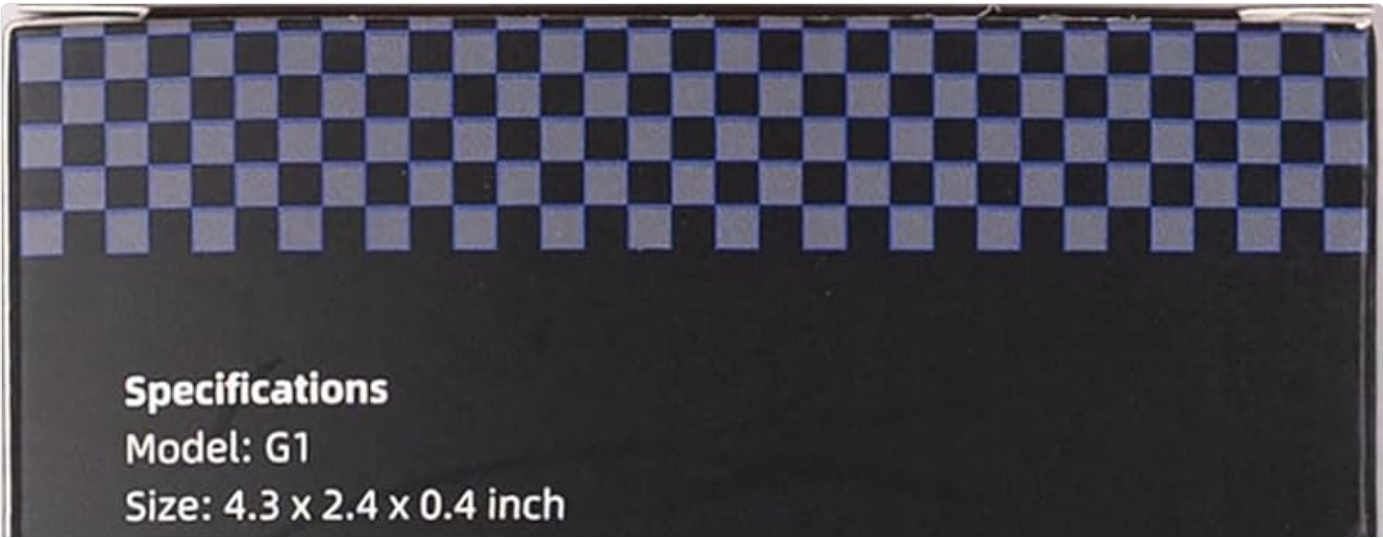

- Ensure files are placed in the correct directories on the device's internal storage or SD card for the music app to detect them.
- Use the 'Music Scan' feature within the music app to refresh the library.

Device is Sluggish or Unresponsive

- Close any background applications that may be consuming resources.
- Restart the device.
- If issues persist, consider a factory reset (Note: This will erase all data and settings. Back up important files first. Be aware of parental control reset locks).
