Panana OB-245

Panana Personal Drink Mixer Blender

Model OB-245 User Manual

INTRODUCTION

Welcome to the Panana Personal Drink Mixer Blender user manual. This guide provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your new blender. Please read all instructions carefully before first use and retain this manual for future reference.

Your Panana Personal Drink Mixer Blender (Model OB-245) is designed for preparing smoothies, shakes, food purees, and blending frozen ingredients with ease. Its compact design and powerful 250W motor make it suitable for daily use.

PRODUCT OVERVIEW AND INCLUDED COMPONENTS

Before using your blender, ensure all components listed below are present and undamaged.

- High-Torque Power Base (Blender Base)
- 4-Leaf Knife Holder (Blending Blade Assembly)
- Juice Cup 520ml with Handle (approx. 17.5 oz)
- Juice Cup 540ml (approx. 18 oz)
- Short Cup 340ml (approx. 11.5 oz)
- Black Travel Cup Lid
- Black Flat Lids (2 included)
- Black Water Cup Rings (2 included)

IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electric shock, or injury, always follow these basic safety precautions:

- **Read all instructions** before operating the appliance.
- **Keep out of reach of children.** This appliance is not intended for use by children.
- **Electrical Safety:** Do not immerse the motor base in water or other liquids. Unplug from the outlet when not in use, before assembling or disassembling parts, and before cleaning. Do not operate any appliance with a damaged cord or plug.
- **Blade Safety:** The blades are sharp. Handle the blade assembly with extreme care to avoid injury. Never touch the blades directly.
- **Usage Precautions:** Do not blend hot liquids, as pressure buildup can cause the cup to burst, resulting in injury. Ensure cups and blade assembly are securely attached before operating. Do not operate the blender empty.

- **Accessories:** Use only Panana approved accessories and attachments. Using non-approved accessories may cause fire, electric shock, or injury.
- **Placement:** Place the blender on a stable, flat, and dry surface during operation.

SETUP

Follow these steps to set up your Panana Personal Drink Mixer Blender for first use:

1. **Unpack:** Carefully unpack all components and remove any packaging materials.
2. **Initial Cleaning:** Wash all cups, lids, and the blade assembly in warm, soapy water. Rinse thoroughly and dry completely before first use. The motor base should only be wiped with a damp cloth.
3. **Position:** Place the motor base on a stable, flat, and dry countertop or surface.
4. **Prepare Ingredients:** Fill the blending cup with your desired ingredients. Do not exceed the MAX fill line indicated on the cup. For optimal blending, cut larger ingredients into smaller pieces.
5. **Attach Blade:** Screw the blade assembly onto the open end of the blending cup until it is securely tightened. Ensure there are no gaps.
6. **Assemble:** Invert the cup with the attached blade assembly and place it onto the motor base. Align the tabs on the cup with the slots on the base.

Very simple operation

Press the cup down to start the work
Mix food and grind

OPERATING INSTRUCTIONS

Your Panana Personal Drink Mixer Blender features a simple one-touch operation:

1. **Plug In:** After completing the setup steps, plug the blender into a standard electrical outlet.
2. **Blend:** Press down firmly on the blending cup to activate the motor and begin blending. The blender will operate as long as continuous pressure is applied to the cup.
3. **Achieve Desired Consistency:** Blend until your desired consistency is achieved. For best results and to prevent overheating, especially with tougher ingredients or ice, blend in short pulses (press down, release, repeat) rather than continuous operation.
4. **Stop Blending:** Once blending is complete, release pressure on the cup to stop the motor. Unplug the blender from the power outlet.
5. **Serve:** Carefully remove the cup and blade assembly from the motor base. Invert the cup and unscrew the blade assembly. You can then attach a drinking lid or flat lid to the cup for immediate consumption or storage.

MAINTENANCE AND CLEANING

Proper cleaning and maintenance will ensure the longevity and optimal performance of your blender.

Daily Cleaning:

1. **Unplug:** Always unplug the blender from the power outlet before cleaning.
2. **Disassemble:** Disassemble the cup, blade assembly, and lids from the motor base.
3. **Wash Cups and Lids:** Wash the cups and lids with warm, soapy water. They are also dishwasher safe (top rack recommended).
4. **Clean Blade Assembly:** Carefully rinse the blade assembly under running water. Use a small brush to clean around the blades if necessary. **Avoid touching the sharp edges directly.**
5. **Clean Motor Base:** Wipe the motor base with a damp cloth. **Never immerse the motor base in water or any other liquid.**
6. **Dry and Store:** Ensure all parts are completely dry before reassembling or storing.

Self-Cleaning Method:

For a quick clean, especially after blending liquids:

1. Fill the blending cup with warm water and add a drop of dish soap.
2. Attach the blade assembly and place it onto the motor base.
3. Pulse the blender for 10-20 seconds.
4. Rinse the cup and blade assembly thoroughly under running water.

Easy to Clean & Disassemble

TROUBLESHOOTING

If you encounter any issues with your Panana Personal Drink Mixer Blender, refer to the following troubleshooting guide:

Problem	Possible Cause	Solution
Blender does not turn on.	Not plugged in; cup/blade not assembled correctly.	Ensure the blender is properly plugged into a working outlet. Verify the cup and blade assembly are securely attached and pressed down onto the motor base.
Ingredients are not blending smoothly.	Insufficient liquid; ingredients too large; overfilled cup.	Add more liquid if the mixture is too thick. Cut larger ingredients into smaller pieces. Do not overfill the cup beyond the MAX line. Pulse the blender instead of continuous blending to allow ingredients to settle.
Leaking from the cup.	Blade assembly not tightened; damaged gasket; overfilled.	Ensure the blade assembly is tightly screwed onto the cup. Check if the rubber gasket on the blade assembly is properly seated and not damaged. Do not overfill the cup.
Unusual noise or odor.	Obstruction; motor strain; internal damage.	Immediately stop operation and unplug the blender. Check for any obstructions or damage to the blade or motor base. If the issue persists, contact customer support.

SPECIFICATIONS

Key technical specifications for the Panana Personal Drink Mixer Blender (Model OB-245):

Brand	Panana
Model Number	OB-245
Power	250 Watts
Main Cup Capacity	18 oz (540ml)
