

AROMAPLAN DAP PRO 2025

AromaPlan 2025 Waterless HVAC Scent Diffuser Instruction Manual

MODEL: DAP PRO 2025

Brand: AROMAPLAN

Introduction

The AromaPlan DAP PRO 2025 is an advanced waterless scent diffuser designed to provide a consistent and luxurious aroma experience for spaces up to 2,000 sq ft. Utilizing cold-air diffusion technology, it transforms fragrance oils into ultra-fine, dry microparticles, ensuring efficient and mess-free scent distribution. This device offers flexible control via a sleek LED touch panel or a dedicated mobile application, allowing for customized scheduling and intensity adjustments. It is suitable for various environments, including homes, offices, and commercial spaces, and can be used as a standalone unit or integrated with an HVAC system.

The diffuser is engineered for use with AromaPlan fragrance oils or other cold-air diffuser compatible scents.

Traditional water-based essential oils are not recommended for optimal performance and device longevity.

Setup

- 1. Unboxing and Placement:** Carefully remove all components from the packaging. The diffuser can be placed on a flat surface, wall-mounted using the integrated keyholes on the back, or connected to an HVAC system. Ensure the device is placed in a stable location with adequate ventilation.
- 2. Power Connection:** Plug the power adapter into the designated port on the diffuser and then into a standard wall outlet. A blue blinking light will indicate the device is ready for pairing.
- 3. App Download and Pairing:**
 - Download the official AromaPlan mobile application from the Google Play Store or Apple App Store.
 - Ensure Bluetooth is enabled on your smartphone.

- Open the AromaPlan app and follow the on-screen instructions to connect to your DAP PRO 2025 diffuser. The app will guide you through the pairing process.

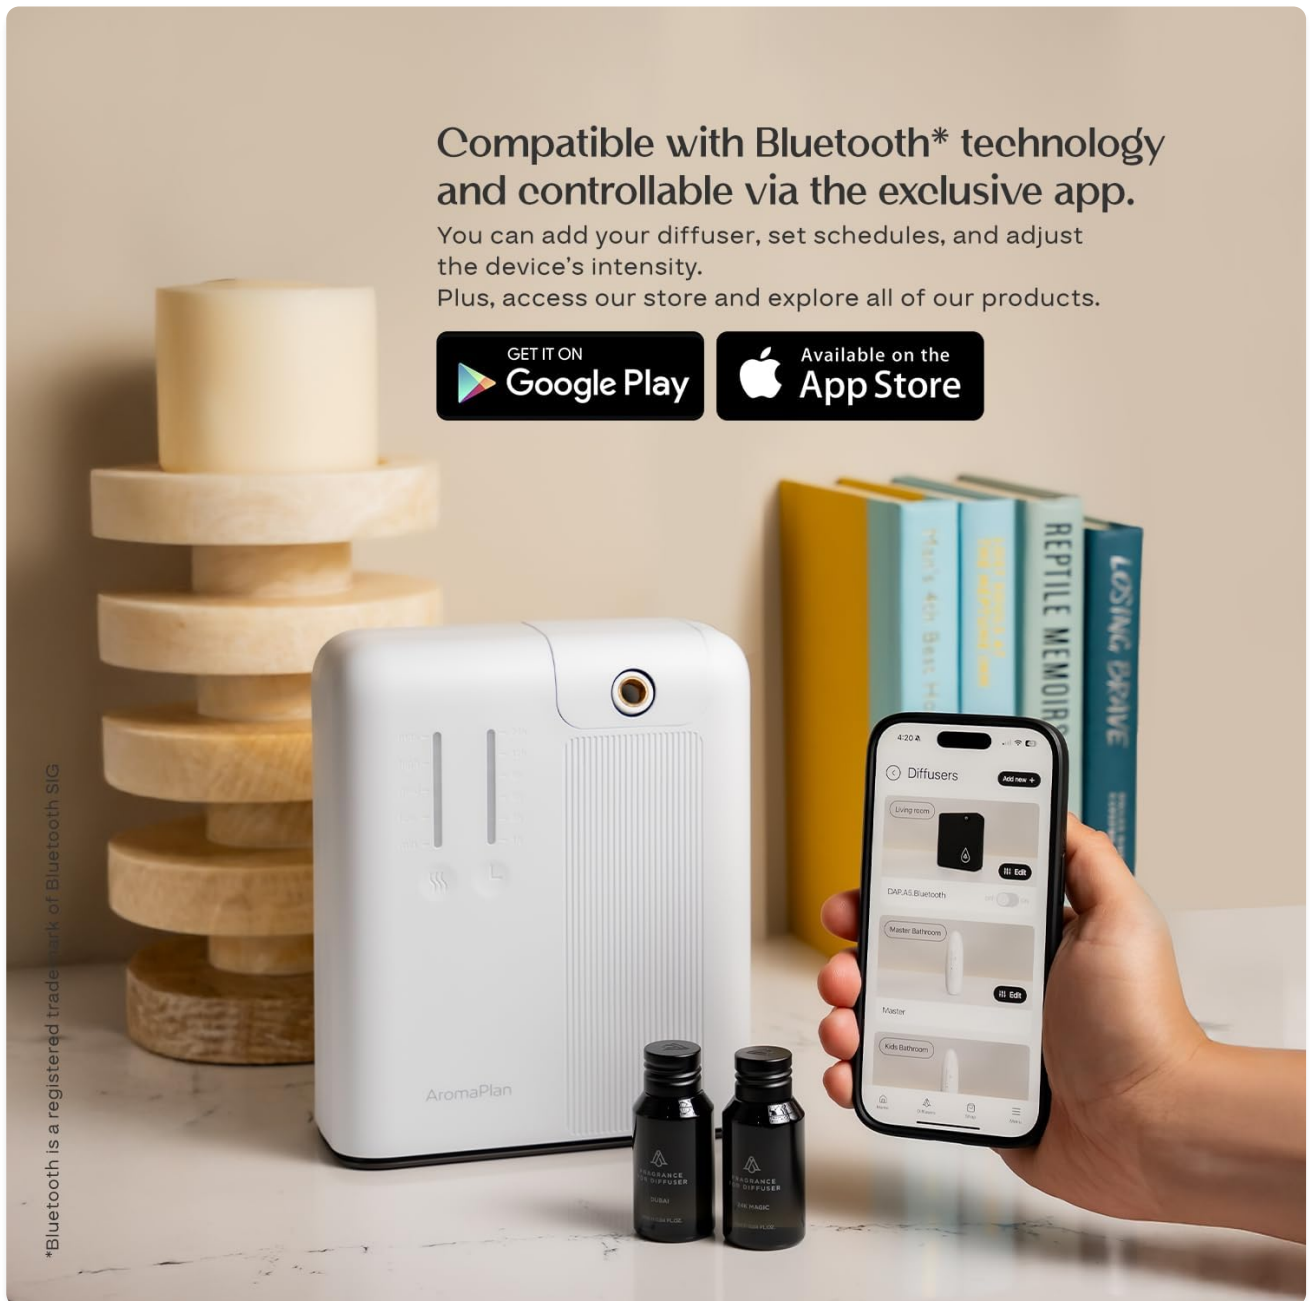

Figure 2: App download and pairing process.

4. Filling with Fragrance Oil:

- Use the provided key to unlock and open the dispenser compartment on the top of the diffuser.
- Carefully insert your AromaPlan fragrance oil bottle into the designated slot. Ensure the wicking tube is fully submerged in the oil.
- Close and lock the dispenser compartment.

5. **HVAC Integration (Optional):** The AromaPlan DAP PRO 2025 can be seamlessly connected to your HVAC system using the included adapter and hose for whole-home scent distribution. Refer to the detailed HVAC integration guide provided separately for specific installation instructions.

Operating Instructions

The AromaPlan DAP PRO 2025 offers both manual touch panel control and comprehensive app control for managing your scent experience.

App Control

The AromaPlan app provides full control over your diffuser's settings:

- **Scheduling:** Set up to 5 customizable scheduling options. You can define specific start and end times for diffusion, and select which days of the week the schedule applies.
- **Fragrance Intensity:** Adjust the scent intensity across 10 levels to suit your preference and room size. This

controls the duration of active diffusion and pause intervals.

- **On/Off:** Remotely turn the diffuser on or off.

Manual Touch Panel Control

The sleek LED touch panel allows for basic manual adjustments:

- **Power Button:** Press to turn the diffuser on or off.
- **Intensity Adjustment:** Use the dedicated buttons on the panel to cycle through preset intensity levels (e.g., min, low, med, high, max).
- **Time Period:** Select from preset time periods for continuous diffusion (e.g., 1h, 3h, 6h, 12h, 24h).

Figure 4: Key features of the AromaPlan diffuser.

Maintenance

Regular maintenance ensures optimal performance and longevity of your AromaPlan diffuser.

Refilling Fragrance Oil

When the fragrance oil level is low, follow these steps to refill:

1. Unlock and open the dispenser compartment using the provided key.
2. Carefully remove the empty fragrance oil bottle.
3. Insert a new AromaPlan fragrance oil bottle, ensuring the wicking tube is fully submerged.
4. Close and lock the dispenser compartment.

Cleaning the Diffuser

To clean the diffuser and prevent oil residue buildup, especially when changing scents, follow these steps:

1. Remove the fragrance oil bottle from the diffuser.
2. Replace the oil with a small amount of rubbing alcohol (isopropyl alcohol).
3. Run the diffuser at intensity level 10 for approximately 10 minutes using the mobile app. This will clear any residual oil from the internal components.
4. Remove the alcohol and allow the system to air dry before inserting a new fragrance oil bottle.

For optimal performance of your AromaPlan diffuser, use our exclusive collection of oil fragrances

We offer various sizes to perfectly match your diffuser

Troubleshooting

If you encounter any issues with your AromaPlan DAP PRO 2025 diffuser, please refer to the following common troubleshooting steps:

- **No Mist/Scent Output:**
 - Ensure the power adapter is securely plugged into both the diffuser and a working electrical outlet.
 - Check if the fragrance oil bottle is correctly inserted and the wicking tube is fully submerged in the oil.
 - Verify that the diffuser is turned on via the touch panel or the mobile app.
 - Perform a cleaning cycle with rubbing alcohol as described in the Maintenance section to clear any blockages.
- **App Connectivity Issues:**
 - Ensure Bluetooth is enabled on your smartphone and the diffuser is within range.
 - Restart the AromaPlan app and try reconnecting.
 - Unplug the diffuser from the power outlet for 30 seconds, then plug it back in to reset the device.
- **Weak Scent Output:**
 - Increase the fragrance intensity level through the app or touch panel.
 - Adjust the working period and pause second settings in the app to allow for more frequent diffusion.
 - Ensure the room size is within the recommended coverage area (up to 2,000 sq ft).
 - Consider the age of the fragrance oil; older oils may have reduced potency.
- **Unusual Noise:**
 - Ensure the diffuser is placed on a stable, flat surface.
 - Check that the fragrance oil bottle is securely seated and not vibrating against the internal components.
 - A very low humming sound is normal during operation. If the noise is loud or unusual, contact customer support.

If these steps do not resolve the issue, please contact AromaPlan Customer Support for further assistance.
