7. MAINTENANCE

7.1 Battery Care

The device is equipped with a 1500mAh lithium battery. To maximize battery life:

- Avoid fully discharging the battery frequently.
- Use a standard charger (5V/1A or 5V/2A) for optimal charging. Fast chargers may cause issues if the battery is completely drained.
- Store the device in a cool, dry place when not in use for extended periods.

Figure 11: Battery life performance, indicating up to 25 hours for music and 5 hours for video playback.

7.2 Cleaning

Wipe the device with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials that could damage the screen or casing.

8. TROUBLESHOOTING

- **Device will not power on after full discharge:** If the device does not turn on after being fully discharged, try using a lower amperage charger (e.g., a standard 5V/1A charger) for a few minutes before attempting to power it on again.
- **Music skipping or inconsistent audio:** Ensure the device's software is up to date. If playing from an SD card, try reformatting the card or using a different one.
- **Cannot connect to Wi-Fi/Bluetooth:** Verify that Wi-Fi/Bluetooth is enabled in settings. Ensure you are within range of the network/device and that the password is correct.
- **Apps not working correctly:** Try clearing the app's cache or data in **Settings > Apps & Notifications > [App Name] > Storage**. If issues persist, consider uninstalling and reinstalling the app (if applicable) or performing a factory reset (note: this will erase all data).
