YITAHOME MAYIHTu3bZ

YITAHOME Resin Storage Shed Shelves Instruction Manual

Model: MAYIHTu3bZ

INTRODUCTION

Thank you for choosing YITAHOME Resin Storage Shed Shelves. These shelves are designed to provide ample, organized storage within your compatible YITAHOME horizontal storage shed. Crafted from durable, waterproof HDPE material, they offer reliable support for various items, ensuring your outdoor space remains tidy and functional. This manual provides essential information for safe installation, operation, and maintenance of your new shelves.

SAFETY INFORMATION

Please read and understand all safety information before installation and use. Failure to follow these instructions may result in injury or damage to the product.

- **Weight Capacity:** Do not exceed the maximum weight capacity of 44 pounds per shelf. Overloading can cause the shelf to sag, break, or detach, leading to potential injury or damage to stored items.
- **Proper Installation:** Ensure proper installation to prevent the shelves from falling or tipping. Follow all assembly steps carefully.
- **Stability:** Always distribute weight evenly on the shelves to maintain stability. Avoid placing heavy items on one side only.
- **Environmental Conditions:** While the shelves are rust and water-resistant, avoid using them in extreme weather conditions that could compromise the shed's or shelf's structural integrity.

PACKAGE CONTENTS

Please verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- YITAHOME Resin Storage Shed Shelves (2 PCS)
- Screws (8 PCS)
- Instruction Manual (this document)

SETUP AND INSTALLATION

The YITAHOME storage shed shelves are designed for effortless setup. Follow these steps for seamless installation.

1. **Prepare Your Shed:** Ensure your YITAHOME 35 cu ft horizontal storage shed is clean and free of obstructions where the shelves will be installed. The shelves are compatible with all 35 cu ft YITAHOME storage sheds (rear panel only).
2. **Identify Mounting Points:** Locate the designated protrusions or slots on the interior rear panel of your storage shed where the shelves will snap into place.
3. **Position the Shelf:** Align one shelf with the desired mounting points. The shelf dimensions are 47.2 inches (119.8 cm) in length, 12.6 inches (32 cm) in width, and 1.2 inches (3 cm) in height.
4. **Snap into Place:** Gently but firmly snap the shelf onto the cabinet's protrusions. You should hear a click or feel it securely engage.
5. **Secure with Screws:** Use the provided screws to further secure the shelves to the shed's interior, if applicable to your shed model. This enhances stability and load bearing.
6. **Repeat for Second Shelf:** If installing both shelves, repeat steps 3-5 for the second shelf, positioning it at your desired height.

CONVENIENT INSTALLATION

Snap the partition onto the cabinet's protrusion to complete installation

OPERATING INSTRUCTIONS

Once installed, your YITAHOME shelves are ready for use. Follow these guidelines for optimal performance and longevity.

- **Loading Items:** Place items onto the shelves, ensuring the weight is distributed evenly across the surface.
- **Weight Limit:** Do not exceed the maximum weight capacity of 44 pounds (20 kg) per shelf. Refer to the specifications section for details.
- **Organized Placement:** Utilize the shelves to organize gardening tools, camping gear, and other outdoor essentials, keeping your shed tidy and accessible.

ORDERLY PLACEMENT

The beauty and utility of being neat and organized

STABLE LOAD BEARING

The stable structural design prevents swaying when loaded

Image: Stable load bearing capacity of 44 lbs per shelf.

MAINTENANCE

Regular maintenance will help prolong the life and appearance of your shelves.

- **Cleaning:** The high-density polyethylene (HDPE) resin material is easy to clean. Simply wipe the shelves with a damp cloth to remove dust or dirt. For tougher stains, a mild soap solution can be used.
- **Weather Resistance:** The shelves are designed to be rust and water-resistant. However, for optimal longevity, ensure the shed itself provides adequate protection from prolonged exposure to extreme weather.
- **Inspection:** Periodically inspect the shelves and their mounting points for any signs of wear, damage, or loosening. Re-tighten screws if necessary.

EASY TO CLEAN

TROUBLESHOOTING

If you encounter any issues with your YITAHOME shelves, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Shelf sags or bows in the middle.	Overloaded shelf; weight not evenly distributed.	Reduce the weight on the shelf, ensuring it does not exceed 44 lbs. Redistribute items to balance the load.
Shelf feels unstable or loose.	Improper installation; screws not fully tightened; shelf not fully snapped into place.	Re-check installation steps. Ensure the shelf is fully engaged with the shed's protrusions. Tighten all screws securely.
Difficulty snapping shelf into place.	Misalignment; obstruction.	Ensure the shelf is correctly aligned with the mounting points. Check for any debris or obstructions preventing a proper fit. Apply firm, even pressure.

SPECIFICATIONS

Feature	Detail
Brand	YITAHOME
Model Number	MAYIHTu3bZ
Product Dimensions (L x W x H)	47.2" x 12.6" x 1.2" (119.8 cm x 32 cm x 3 cm)
Material	High-Density Polyethylene (HDPE) Plastic
Item Weight	10.91 Pounds (per 2-pack)
Weight Limit (per shelf)	44 Pounds (20 kg)
Color	Gray
Water Resistance Level	Waterproof
Assembly Required	Yes
