### 3. PRODUCT OVERVIEW

---

The Yeaki Auto Face Tracking Tripod is constructed from durable aluminum alloy, offering both stability and portability. Its design incorporates a unique four-legged base for enhanced stability when fully extended. The device features a 360° rotating head and 270° tilt angle for flexible positioning.

Image: A close-up view of the tripod's base, highlighting the aluminum alloy pole, anti-slip silicone mat, and umbrella-like skeleton structure for reinforced sturdy construction.

## 4. SETUP

### 4.1 Unfolding the Tripod and Adjusting Height

1. Gently pull the legs of the tripod outwards until they are fully extended and stable. The unique four-legged design provides enhanced stability.
2. Extend the telescopic pole to your desired height. The tripod can extend up to 71 inches and folds down to a compact 13 inches.

### 4.2 Attaching Your Device

- **For Smartphones:** The flexible phone holder accommodates devices with screen sizes from 4.7 to 7 inches. Gently

pull apart the phone holder clamps and insert your smartphone.

- **For Cameras/GoPros/Ring Lights:** The integrated 1/4" screw mount supports various devices. Attach your camera, GoPro, or ring light directly to this screw mount.

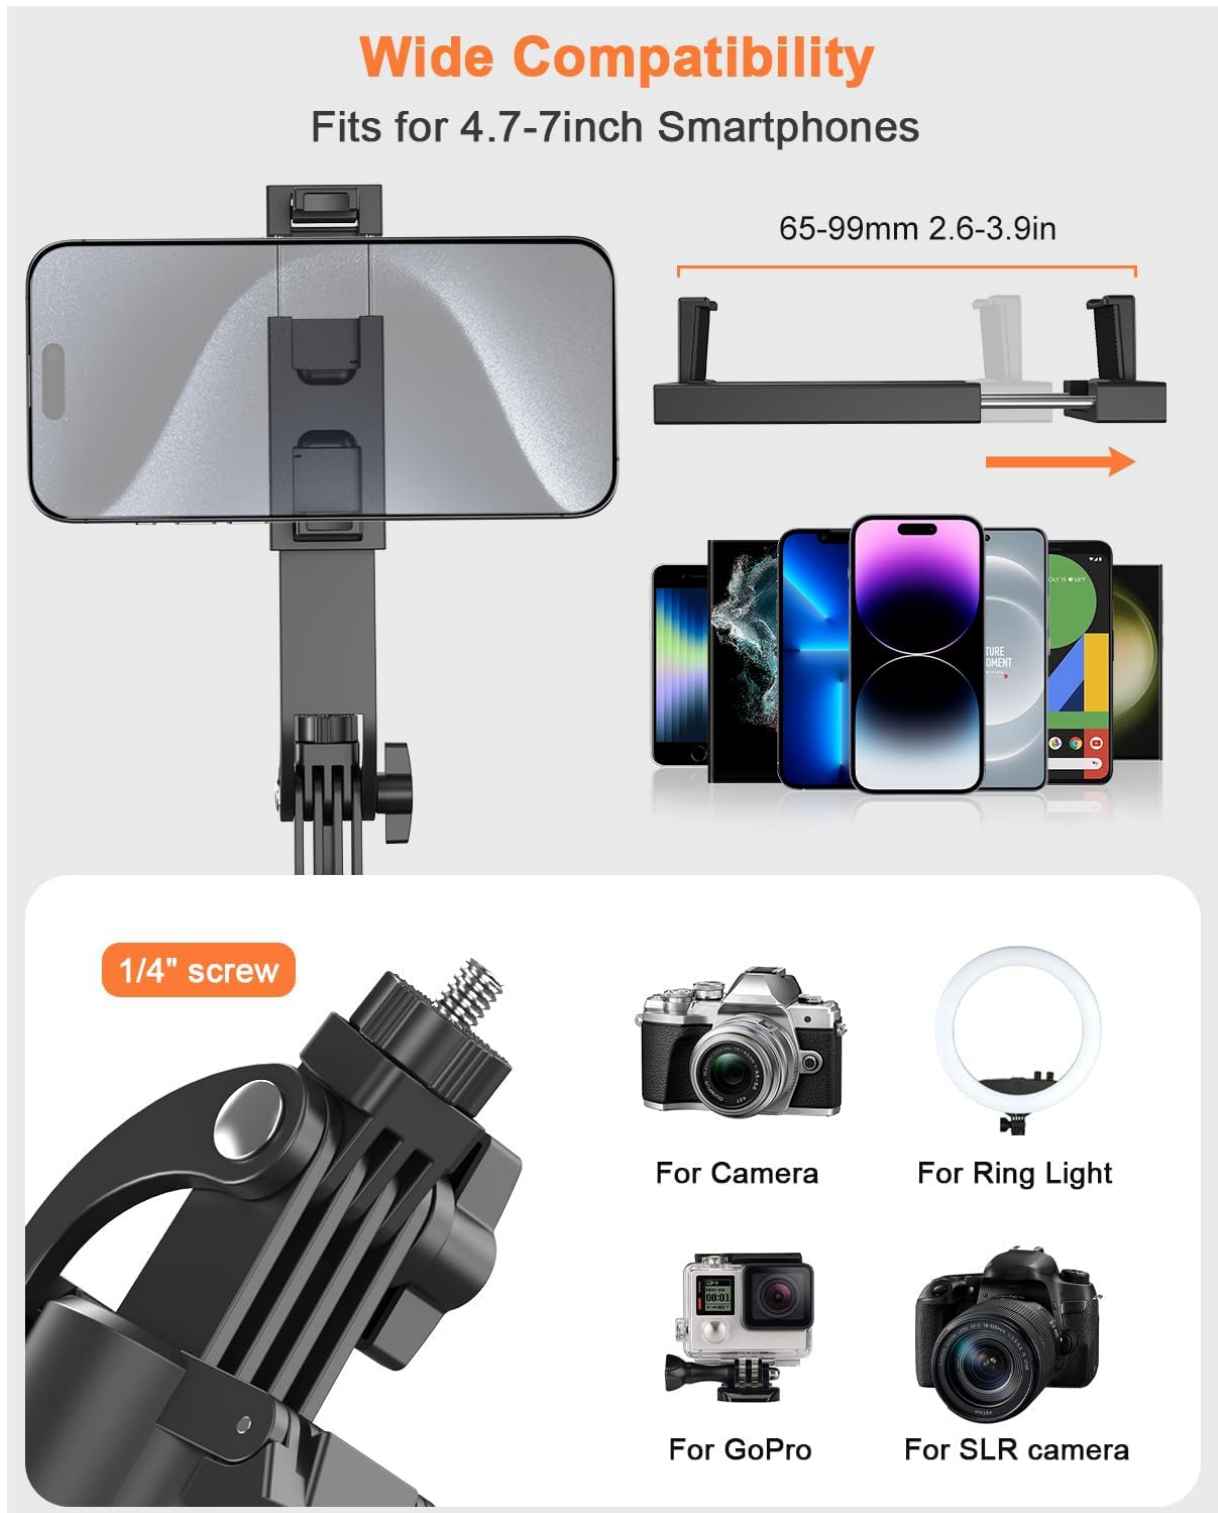

Image: Illustrations showing the phone holder accommodating various smartphone sizes and the 1/4" screw mount for cameras, GoPros, and ring lights.

### 4.3 Attaching LED Fill Lights

The two detachable LED fill lights can be attached to the sides of the phone holder for optimal illumination. Ensure they are securely fastened.

## 5. CHARGING

Use the provided Type-C charging cable to charge the following components:

- **Face Tracking Module:** Locate the Type-C port on the face tracking module and connect the charging cable.
- **Remote Control:** The remote control has a Type-C charging port.
- **LED Fill Lights:** Each LED fill light has its own Type-C charging port.

Ensure all components are fully charged before extended use for optimal performance. The LED lights can be used continuously for approximately 50 minutes at maximum brightness.

## 6. OPERATING INSTRUCTIONS

---

### 6.1 Powering On/Off

Long press the power button on the face tracking module to turn the device on or off.

### 6.2 Auto Face Tracking with Gesture Control

The tripod features advanced 360° automatic face tracking without requiring an app.

1. **Unlock the Head:** Unlock the head when using the face tracking function.
2. **Lift to Unlock Handle:** Lift up to unlock the balance handle.
3. **Power On:** Long press the power button to turn on the face tracking module.
4. **Start Tracking:** Make an "OK" gesture with your hand and hold for 2 seconds in front of the camera to initiate face tracking.
5. **Stop Tracking:** Make a "Palm" gesture with your hand and hold for 2 seconds in front of the camera to stop face tracking.

## How to Use Intelligent Gesture Control

Step①: Unlock the head when using the head

Step②: Lift up to unlock to use the balance handle

Step③: Long press the power button to turn on

Step④: 【Gesture-OK】 Hold for 2s to start tracking

Step⑤: 【Gesture-Palm】 Hold for 2s to stop tracking

## 7. MAINTENANCE

- Keep the tripod clean by wiping it with a soft, dry cloth.
- Avoid exposing the device to extreme temperatures or moisture.
- Store the tripod in its carrying bag when not in use to protect it from dust and damage.

## 8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Face tracking not working.	Device not powered on; incorrect gesture; face not visible to camera.	Ensure device is powered on. Use "OK" gesture clearly. Position yourself within the camera's view.
Remote control not connecting.	Remote not charged; Bluetooth not enabled on phone; remote not paired.	Charge the remote. Enable Bluetooth on your phone. Pair the remote via your phone's Bluetooth settings.
LED lights not turning on.	Lights not charged; power button not pressed.	Charge the LED lights. Press the power button on each light.
Tripod unstable when extended.	Legs not fully spread; uneven surface.	Ensure all four legs are fully extended. Place the tripod on a flat, stable surface.
