3. SETUP AND INSTALLATION

Professional installation is recommended. Ensure the vehicle's power is disconnected before beginning installation. Refer to the wiring diagram provided with your unit for specific connections.

Installation Steps (General):

1. **Preparation:** Gather all necessary tools and ensure you have all components listed in the packing list.
2. **Remove Old Unit:** Carefully remove your vehicle's existing car radio.
3. **Connect Wiring:** Connect the power cable, RCA cables, USB cables, GPS antenna, and radio antenna to the new SIXWIN unit. Ensure all connections are secure.
4. **CANBUS Connection:** If your vehicle requires a CANBUS decoder for steering wheel controls or other vehicle data, connect it as per the wiring diagram.
5. **Test Functionality:** Before fully securing the unit, temporarily connect the vehicle's power and test basic

functions like power on/off, audio, and touchscreen response.

6. **Secure Unit:** Once tested, carefully mount the SIXWIN car radio into the dashboard.

7. **Final Checks:** Reconnect all vehicle panels and perform a comprehensive test of all features.

4. OPERATING INSTRUCTIONS

4.1 Android 13 System

The unit runs on Android 13, offering a fast and smooth user experience. Navigate through applications and settings using the responsive 9-inch touchscreen. Access millions of applications via the Google Play Store when connected to Wi-Fi.

Image: The main screen of the SIXWIN Android 13 Car Radio, displaying a grid of application icons such as EnBW, LINE, Pandora, WhatsApp, Stitcher, Tidal, Spotify, VOX, and YouTube Music, alongside a digital clock and signal strength indicator.

4.2 Wireless CarPlay & Android Auto

Connect your iPhone or Android smartphone wirelessly to access CarPlay or Android Auto. This allows for seamless integration of your phone's features, including navigation, music, calls, and messages, controllable via voice or touch on the unit's screen.

Image: This image shows the car radio displaying both Apple CarPlay and Android Auto interfaces. CarPlay is shown with icons for Phone, Music, Maps, Messages, Now Playing, Car, Podcasts, and Audiobooks. Android Auto is shown with Google Maps, YouTube Music, and Phone icons. A smartphone is also depicted, indicating wireless connection.

4.3 Mirror Link

Use Mirror Link to display your smartphone's screen directly on the car radio via a Wi-Fi connection. This feature allows you to view apps, music, and videos from your phone on the larger display.

4.4 Bluetooth Connectivity

Pair your mobile phone or other Bluetooth-enabled devices to the unit for wireless audio streaming, hands-free calling, and file transfer. This enhances safety by allowing you to manage calls without distraction.

Image: The car radio screen displays a Bluetooth interface, showing music playback controls and an incoming call screen. A smartphone is also shown, illustrating the wireless Bluetooth connection for audio and calls.

4.5 WiFi Connection

Connect the unit to the internet via a Wi-Fi hotspot or tethering from your smartphone. This enables online browsing, streaming content, and downloading applications directly to the device.

Image: The car radio screen shows a central Wi-Fi symbol surrounded by various app icons, indicating internet connectivity. Below, smaller screens display Google search results and a map, demonstrating online functionality.

4.6 GPS Navigation

Utilize the integrated GPS module for precise navigation. The unit supports both online and offline maps, providing voice guidance and real-time traffic information to help you reach your destination efficiently.

4.7 FM/RDS Radio

Enjoy clear reception of various radio stations with the built-in FM/RDS tuner. The Radio Data System (RDS) provides additional information such as station name, program type, and traffic announcements.

4G+64G

9-inch 4G RAM + 64G ROM large memory space

Image: This image displays the FM/RDS radio interface of the car radio, showing different frequency selections and the RDS logo. It also illustrates the equalizer settings for audio customization.

4.8 Dual USB Ports

Connect USB flash drives or external hard drives to the dual USB ports to play music, videos, or view photos. The USB ports also support charging for your mobile devices.

4.9 Split Screen Functionality

The split-screen feature allows you to run two applications simultaneously on the display. You can customize the size and position of each app and easily switch between them with a swipe gesture.

4.10 Steering Wheel Control

The unit supports learning functions for your vehicle's original steering wheel buttons. This enables convenient control of various functions directly from your steering wheel, enhancing driving safety.

4.11 Audio Equalizer (32 EQ) and AI DSP

Customize your audio experience with the 32-band equalizer, offering precise control over sound frequencies

for a rich and clear sound. An optional AI DSP (Digital Signal Processor) provides advanced sound effects and optimization for various car environments.

Image: The car radio screen displays a detailed 32-band equalizer interface, allowing users to adjust audio frequencies for optimal sound quality. Various preset sound modes are also visible.

5. MAINTENANCE

To ensure the longevity and optimal performance of your SIXWIN Android 13 Car Radio, follow these maintenance guidelines:

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. Avoid abrasive cleaners or harsh chemicals that could damage the screen.
- **Software Updates:** Periodically check for software updates to ensure you have the latest features and security enhancements. Updates can typically be performed via Wi-Fi.
- **Avoid Extreme Temperatures:** Do not expose the unit to extreme heat or cold, as this can affect its performance and lifespan.
- **Cable Connections:** Ensure all cables are securely connected and free from damage. Loose

connections can lead to intermittent issues.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your SIXWIN Android 13 Car Radio. If the problem persists, please contact customer support.

Problem	Possible Cause	Solution
Unit does not power on.	Loose power connection, blown fuse, vehicle power issue.	Check power cable connections. Inspect vehicle fuses. Consult a professional for vehicle power diagnostics.
No sound or distorted audio.	Speaker wiring issues, incorrect audio settings, volume too low.	Verify speaker connections. Check audio settings (EQ, balance, fader). Adjust volume.
Poor radio reception.	Antenna not connected, weak signal, antenna amplifier issue.	Ensure radio antenna is securely connected. Check for antenna damage. Consider an antenna signal booster if in a weak signal area.
CarPlay/Android Auto not connecting or unstable.	Incorrect phone settings, Wi-Fi/Bluetooth interference, software glitch.	Ensure Wi-Fi and Bluetooth are enabled on your phone. Restart both phone and car radio. Check for software updates. Forget and re-pair the device.
Touchscreen unresponsive or inaccurate.	Screen protector interference, software issue, physical damage.	Remove any screen protectors to test. Restart the unit. If persistent, contact support.
Steering wheel controls not working.	CANBUS not connected or configured, learning function not performed.	Verify CANBUS connection. Perform the steering wheel control learning procedure in the unit's settings.
