

## Qaba 330-175V00BN

# Qaba Ride on Horse Instruction Manual

MODEL: 330-175V00BN

## Introduction

Thank you for choosing the Qaba Ride on Horse. This plush riding toy is designed to provide an engaging and active play experience for children aged 3 to 5 years, supporting up to 132 pounds. It features a realistic design, smooth-rolling wheels, and interactive neighing sounds. Please read this manual thoroughly before assembly and use to ensure safe and proper operation.

## Safety Information

No specific warnings are applicable beyond general toy safety guidelines. Always supervise children during play. Ensure the product is assembled correctly and all parts are secure before use. Keep small parts away from young children to prevent choking hazards.

## Package Contents

- Qaba Ride on Horse (Main Body)
- Footrests (pre-attached or requiring minor assembly)
- Handlebars (pre-attached or requiring minor assembly)
- Instruction Manual

**Note:** 2 AA batteries are required for the sound feature (not included).

## Setup

The Qaba Ride on Horse requires minimal assembly. Follow these steps to prepare the toy for use:

1. **Unpacking:** Carefully remove all components from the packaging. Retain the packaging for future storage or transport.
2. **Handlebar Attachment:** Ensure the handlebars are securely attached to the horse's head. If not already attached, insert them firmly into the designated slots until they click into place or are tightened with provided fasteners.

3. **Footrest Check:** Verify that the footrests are securely attached and can move freely up and down.

4. **Battery Installation (for sound feature):**

- Locate the battery compartment, typically found near the ear or under the plush fabric.
- Using a screwdriver (not included), open the battery compartment cover.
- Insert 2 AA batteries, ensuring correct polarity (+/-).
- Close the battery compartment cover and secure it with the screw.

5. **Final Inspection:** Before allowing a child to ride, double-check all connections and ensure the horse is stable on a flat surface.

## Operating Instructions

The Qaba Ride on Horse is designed for intuitive and active play:

1. **Riding Forward:** To make the horse move forward, the child should sit on the saddle and place their feet on the footrests. By gently moving their body up and down, the child can propel the horse forward. The internal mechanism translates the up-and-down motion into forward movement.
2. **Steering:** The handlebars located on the horse's head allow the child to steer the toy left and right.
3. **Activating Sounds:** Press the ear of the horse to activate realistic neighing sounds, enhancing the imaginative play experience.

## Maintenance

---

To ensure the longevity and safe operation of your Qaba Ride on Horse, follow these maintenance guidelines:

- **Cleaning:** Wipe the plush surface with a damp cloth and mild soap. Do not immerse the toy in water. For deeper cleaning, spot clean with a gentle fabric cleaner.
- **Wheel Care:** Regularly check the wheels for any debris or hair that may hinder smooth movement. Clean as necessary. The wheels are designed to be wear-resistant and anti-slip.
- **Battery Replacement:** If the neighing sound becomes faint or stops working, replace the 2 AA batteries as described in the Setup section.
- **Storage:** Store the toy in a cool, dry place away from direct sunlight when not in use.

### Troubleshooting

Problem	Possible Cause	Solution
Horse does not move forward.	Insufficient up-and-down motion or child's weight.	Ensure the child is actively bouncing on the saddle and pressing down on the footrests. The child may need to be heavier to effectively engage the mechanism.
No neighing sound.	Dead or incorrectly installed batteries.	Check battery polarity and replace with fresh 2 AA batteries. Ensure the ear button is pressed firmly.
Wheels are stiff or not rolling smoothly.	Debris caught in wheels.	Inspect wheels and remove any hair, lint, or other obstructions.

### Specifications

Feature	Detail
Model Number	330-175V00BN
Overall Dimensions	27.6" L x 11" W x 27.6" H
Seat Height	19.7" H
Item Weight	14 pounds
Maximum Load	132 lbs
Recommended Age	36 months - 5 years
Batteries Required	2 AA batteries (for sound)
Material	Steel frame, polypropylene cotton plush
