Yofidra B0DHKRGG4F

Yofidra Matte Black Kitchen Sink Soap Dispenser User Manual

Model: B0DHKRGG4F

1. Introduction

Thank you for choosing the Yofidra Matte Black Kitchen Sink Soap Dispenser. This manual provides essential information for the safe and efficient installation, operation, and maintenance of your new soap dispenser. Please read these instructions carefully before use and retain them for future reference.

This built-in soap dispenser is designed for convenience and durability, featuring a matte black finish and a 17 oz bottle for various liquid soaps.

2. Product Overview

Key Features:

- **Easy Refill:** Designed for convenient top-fill access without removing the bottle from under the sink.
- **Durable Construction:** Made from brushed nickel stainless steel with a 5-layer anti-corrosion process for longevity and resistance to rust.
- **Versatile Use:** Suitable for hand soap, dish soap, shampoo, shower gel, and other liquid detergents in kitchens, bathrooms, and laundry rooms.
- **360-Degree Rotating Pump Head:** Allows for flexible positioning and ease of use from any angle.
- **Simple Installation:** Engineered for quick and straightforward setup.

Components:

The Yofidra soap dispenser consists of a pump head, a spout, a mounting nut, and a 17 oz liquid bottle.

3. Installation Instructions

Follow these steps for proper installation of your Yofidra kitchen sink soap dispenser.

Required Tools (Not Included):

- Adjustable wrench or pliers
- Drill (if no pre-drilled hole is available)
- Safety glasses

Installation Steps:

1. **Prepare the Sink Hole:** Ensure your sink or countertop has a pre-drilled hole with a diameter between 1 inch (2.54

cm) and 1.57 inches (4 cm). If not, carefully drill a new hole in the desired location, ensuring it is clear of any obstructions underneath.

Image: Diagram illustrating the required sink hole diameter of 1" to 1.57" for installation.

2. **Insert the Pump Head:** From above the sink, insert the pump head and spout assembly through the prepared hole. Ensure the decorative base sits flush on the countertop.
3. **Secure from Below:** From underneath the sink, thread the large plastic nut onto the dispenser's threaded shank. Tighten the nut by hand until snug, then use an adjustable wrench or pliers to gently tighten it further, securing the dispenser firmly to the countertop. Do not overtighten.
4. **Attach the Bottle:** Screw the 17 oz liquid bottle onto the threaded bottom of the dispenser shank. Ensure it is securely attached to prevent leaks.

Image: View from under the sink showing the installed soap dispenser bottle and connection to the pump head.

5. **Initial Fill:** Before first use, fill the bottle with your desired liquid soap. Pump the dispenser several times until soap begins to dispense smoothly.

4. Operating Instructions

Dispensing Soap:

To dispense soap, simply press down on the pump head. The 360-degree rotating pump head allows you to adjust the direction of the spout as needed for convenience.

Image: The soap dispenser pump head shown rotating 360 degrees for flexible use.

Refilling the Dispenser:

When the soap level is low, refilling is easy:

1. Simply pull the pump head assembly upwards from the sink opening.
2. Pour your desired liquid soap directly into the opening.
3. Reinsert the pump head assembly into the opening.

Image: Illustration demonstrating the top-fill feature, allowing refills without accessing the bottle under the sink.

5. Maintenance

Regular cleaning and maintenance will ensure the longevity and optimal performance of your soap dispenser.

- **Cleaning the Exterior:** Wipe the matte black finish with a soft, damp cloth and mild soap. Avoid abrasive cleaners, scouring pads, or harsh chemicals, as these can damage the finish.
- **Cleaning the Pump Mechanism:** If the pump becomes stiff or clogged, remove the pump head and rinse it thoroughly under warm water. You can also pump warm water through the mechanism to clear any residue.
- **Preventing Clogs:** Use liquid soaps that are not excessively thick. If using thicker liquids, dilute them slightly with water to ensure smooth dispensing.
- **Material Care:** The dispenser is made of stainless steel, which is resistant to corrosion. However, prolonged exposure to harsh chemicals or standing water can affect its appearance. Dry the dispenser after use to maintain its finish.

Image: Comparison showing the durability of 304 stainless steel used in the Yofidra dispenser against non-stainless steel materials that are prone to rust.

6. Troubleshooting

Problem	Possible Cause	Solution
Dispenser not pumping soap	Bottle is empty or low on soap. Pump mechanism is clogged. Air in the pump.	Refill the bottle with liquid soap. Remove pump head and rinse thoroughly with warm water. Pump warm water through the mechanism. Prime the pump by pressing it several times until soap dispenses.
Soap dispenses slowly or weakly	Soap is too thick. Partial clog in the pump or spout.	Dilute the soap slightly with water. Clean the pump mechanism as described in Maintenance.
Leaking from the base	Mounting nut is loose. Bottle is not securely attached.	Tighten the mounting nut from underneath the sink. Ensure the bottle is screwed on tightly to the dispenser shank.

7. Specifications

Model: B0DHKRGG4F

Color: Matte Black

Material: Stainless Steel

Product Dimensions (L x W x H): 9" x 5" x 2.5" (approximate overall dimensions)

Bottle Capacity: 17 oz

Shape: Round

Manufacturer: Yofidra
