This section addresses common questions or issues you might encounter.

- **Issue: Brush head is difficult to detach or reattach.**

Solution: Ensure you are aligning the 'OPEN' and 'CLOSE' indicators correctly. Apply gentle pressure and twist. If the head is wet, dry it first for better grip.

- **Issue: Brush feels too harsh on the skin.**

Solution: Reduce the pressure applied during massage. Ensure sufficient massage oil, gel, or cream is used to allow the brush to glide smoothly over the skin.

- **Issue: Residue remains on the brush after cleaning.**

Solution: Detach the brush head and use a soft brush (like an old toothbrush) with mild soap to thoroughly clean between the silicone nubs. Rinse under running water.
