

Bosjct B0DHS92MG7

# Bosjct Humping Dog USB Charger for Android Phones (Orange) Instruction Manual

Model: B0DHS92MG7

PRODUCT OVERVIEW

The Bosjct Humping Dog USB Charger is a unique and functional charging cable designed for Android devices. It features an animated dog design that moves during charging, providing a visual indicator of the charging process.

- **Interactive Design:** The dog automatically swings its body when charging and stops when the device is fully charged.
- **Enhanced Durability:** Features an upgraded PVC connector for increased resistance against breakage and prolonged lifespan.
- **Fast Charging Capability:** Constructed with high-quality TPE material and a thicker copper core, enabling up to 50% faster charging speeds.
- **2-in-1 Functionality:** Supports both fast charging and stable data transmission simultaneously.
- **Portable Design:** Small and lightweight, making it easy to carry for charging on the go.

SETUP INSTRUCTIONS

Follow these steps to set up your Bosjct Humping Dog USB Charger:

1. **Unpack the Charger:** Carefully remove the Humping Dog USB Charger from its packaging.
2. **Connect to Power Source:** Insert the standard USB-A end of the cable into a compatible USB wall adapter, power bank, or computer USB port.
3. **Connect to Device:** Insert the Micro-USB (for Android) end of the cable into the charging port of your Android smartphone or other compatible device. Ensure a secure connection.
4. **Verify Charging:** Once connected, the dog figure will begin its swinging motion, indicating that your device is charging.

# TRICKLE CHARGE

Activate the battery, intelligently adapt to different models, and always take care of your phone

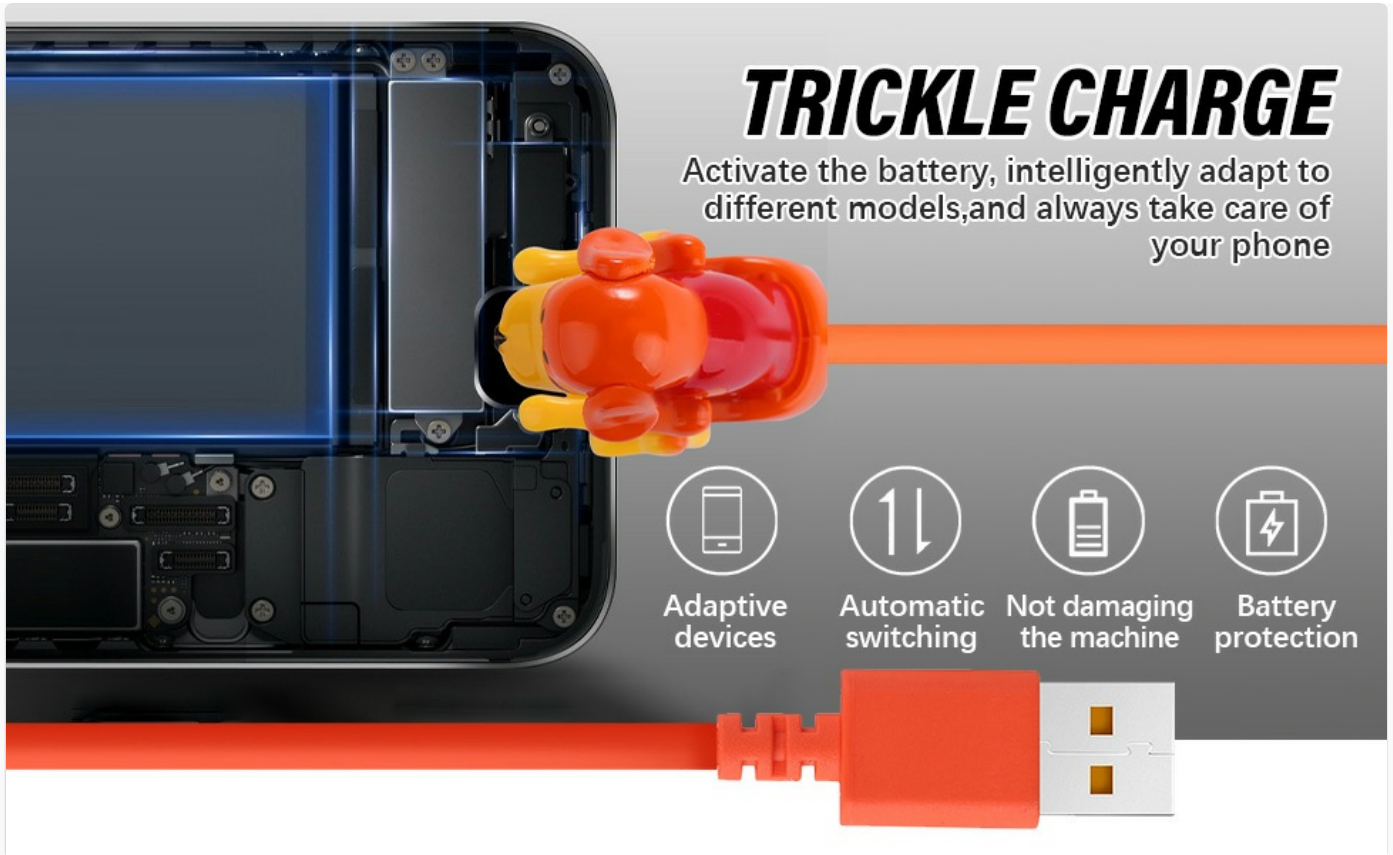

*Image: The reinforced USB connector ensures durability and a stable connection.*

## OPERATING INSTRUCTIONS

The Humping Dog USB Charger operates automatically once connected. The dog's motion serves as a visual cue for the charging status.

- **Charging Indication:** The dog will continuously swing its hips while your device is actively charging.
- **Full Charge Indication:** The dog's swinging motion will automatically cease once your connected device reaches a full charge. This feature helps prevent overcharging.
- **Data Transfer:** In addition to charging, the cable supports data transfer between your device and a computer when connected to a compatible USB port.

# INTERESTING DESIGN

The dog will automatically swing body when charging and will stop by itself when fully charged, an eye-catching reminder that the battery is full

*Image: Illustrates the charger's intelligent features for adaptive charging and battery protection.*

## MAINTENANCE

To ensure the longevity and optimal performance of your charger, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to gently wipe the dog figure and cable. Avoid using harsh chemicals or abrasive materials.
- **Storage:** When not in use, store the charger in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tangling the cable excessively.
- **Handling:** Do not pull the cable by the dog figure or the connector ends. Always grasp the plug itself when disconnecting from a device or power source.
- **Avoid Water:** This product is for indoor use only. Do not expose it to water or high humidity.

## TROUBLESHOOTING

If you encounter issues with your Humping Dog USB Charger, refer to the following common solutions:

| Problem                                 | Possible Cause                                                                         | Solution                                                                                                                                            |
|-----------------------------------------|----------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Dog not moving / Device not charging    | Loose connection, incompatible device, faulty power source.                            | Ensure both ends of the cable are securely plugged in. Verify your device uses a Micro-USB port. Try a different USB wall adapter or power source.  |
| Dog continues to move after full charge | Rare occurrence, possibly due to minor power fluctuations or specific device behavior. | Disconnect the charger once your device indicates a full charge. This feature is designed to stop, but external factors can sometimes influence it. |

| Problem                             | Possible Cause                                         | Solution                                                                                                                              |
|-------------------------------------|--------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Slow charging speed                 | Low-power USB port, damaged cable, device limitations. | Use a high-power USB wall adapter (e.g., 5V/2A). Inspect the cable for any visible damage. Ensure your device supports fast charging. |
| Cable or dog figure appears damaged | Physical stress or manufacturing defect.               | Discontinue use immediately to prevent potential hazards. Contact customer support for assistance.                                    |
