- Step 4: Push Top Center Hub Upward.** Enter through the door and push the roof's center hub upward until it locks into place and the gazebo is fully erect.
- Step 5: Secure with Stakes and Ropes.** Use the provided stakes to anchor the gazebo's base to the ground. Attach wind ropes to the designated loops on the roof and secure them to the ground with additional stakes for enhanced stability.
- Step 6: Install Door Frame Rods.** Insert the two door frame rods into the sleeves at the bottom of the door openings to maintain their shape. Note that door frame rods may be gray or black and installed differently based on color.

5. OPERATION

The COBIZI Pop Up Gazebo is designed for ease of use once assembled.

- **Entry and Exit:** The gazebo features zippered doors for easy access. Ensure zippers are fully closed to keep insects out.
- **Ventilation:** The mesh panels provide excellent ventilation while protecting against mosquitoes and other insects.
- **Privacy/Weather Protection (Optional):** If you have purchased optional sidewalls, attach them using the integrated Velcro fasteners for added privacy or protection from sun and light rain.

6. CARE AND MAINTENANCE

Proper care will extend the lifespan of your COBIZI Pop Up Gazebo.

- **Cleaning:** Clean the fabric with a mild soap solution and a soft cloth. Rinse thoroughly with water and allow to air dry completely before storage. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Always disassemble the gazebo and pack it away during heavy rain, strong winds, or when not in use. Store in the provided carrying bag in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Inspection:** Regularly inspect the frame, fabric, zippers, and mesh for any signs of wear, tear, or damage. Address any issues promptly to prevent further damage.

7. TROUBLESHOOTING

Here are some common issues and their potential solutions:

- **Gazebo is unstable:** Ensure all support straps are pulled taut and the center hub is fully locked. Verify that all stakes and wind ropes are securely fastened to the ground.
- **Water pooling on the roof:** This can occur during heavy rain. While the roof is waterproof, prolonged exposure to heavy rain can cause pooling. It is recommended to disassemble the gazebo during such conditions.
- **Zippers are sticking:** Apply a small amount of zipper lubricant or a graphite pencil to the zipper teeth to improve smoothness.
- **Mesh is damaged:** Small tears can often be repaired with a mesh repair kit. For larger damage, contact customer service for replacement options.
