NOX AT10 Genius 18K Alum by Agustin Tapia 2025

NOX AT10 Genius 18K Alum Padel Racket User Manual

Model: AT10 Genius 18K Alum by Agustin Tapia 2025

1. PRODUCT OVERVIEW

The NOX AT10 Genius 18K Alum Padel Racket, designed in collaboration with Agustin Tapia, is engineered for advanced players seeking a balance of control and power. This luxury teardrop-shaped padel racket incorporates cutting-edge technologies to enhance performance and player comfort.

Key Features:

- **18K Carbon Alum Construction:** Provides exceptional stability and durability, contributing to both power and control.
- **MLD Black EVA Core:** Offers a medium-hard feel for a solid and responsive ball strike.
- **Exclusive SPIN Technology:** Features dual rough finishes (3D hexagonal at the center and sand texture on the rest) to maximize spin and ball control.
- **EOS Flap Technology:** Enhances aerodynamics for faster racket movement and more precise shots.
- **NOX Custom Grip Technology & Pulse System:** Reduces vibration transmission and increases grip strength by 52%, improving comfort and reducing fatigue.
- **Smartstrap Replaceable Security Cord System:** Allows for easy customization and replacement of the wrist strap for hygiene and safety.

2. WHAT'S IN THE BOX

Your NOX AT10 Genius 18K Alum Padel Racket package includes the following items:

- NOX AT10 Genius 18K Alum Padel Racket
- Custom Grip
- Smartstrap (pre-installed or included separately)

3. SETUP

The NOX AT10 Genius 18K Alum Padel Racket comes largely pre-assembled and ready for use. Follow these steps to prepare your racket:

1. **Inspect the Racket:** Before first use, carefully inspect the racket for any visible damage or manufacturing defects.
2. **Attach Smartstrap (if not pre-installed):** If your Smartstrap is not already attached, follow the instructions provided with the strap to securely fasten it to the racket handle. Ensure it is tight enough to prevent the racket from slipping from your wrist during play.
3. **Apply Custom Grip (optional):** If you prefer a different grip feel or need to replace the existing one, apply the custom grip according to standard padel racket gripping techniques. Ensure the grip is smooth and comfortable for your hand.

4. OPERATING INSTRUCTIONS

The NOX AT10 Genius 18K Alum Padel Racket is designed for advanced padel play. Understanding its features will help you maximize your performance.

Playing with the AT10 Genius 18K Alum:

- **Power and Control:** This racket offers a high balance of power and control. Experiment with different shot types to find the optimal balance for your playing style.
- **Spin Generation:** Utilize the Exclusive SPIN technology by brushing the ball with the racket face to generate enhanced spin for slices, topspins, and volleys. The dual rough finishes are designed to grip the ball effectively.
- **Aerodynamics:** The EOS Flap technology contributes to faster swing speeds. Focus on quick racket preparation and follow-through to take advantage of the improved aerodynamics.
- **Comfort and Vibration Reduction:** The NOX Custom Grip and Pulse System work to minimize vibrations. This allows for longer play sessions with reduced arm fatigue.

5. MAINTENANCE

Proper maintenance will extend the life and performance of your NOX AT10 Genius 18K Alum Padel Racket.

Cleaning:

- Wipe the racket face and frame with a damp cloth after each use to remove dirt and sweat.
- Avoid using harsh chemicals or abrasive cleaners, as these can damage the racket's materials and finish.

Storage:

- Store your racket in a protective cover or bag to prevent scratches and impacts.
- Keep the racket in a cool, dry place, away from direct sunlight and extreme temperatures, which can affect the materials.

Grip Care:

- Regularly check your grip for wear and tear. Replace it when it becomes smooth, worn, or loses its tackiness to maintain optimal control and comfort.
- The Smartstrap can be removed and washed separately for hygiene.

6. TROUBLESHOOTING

If you encounter any issues with your NOX AT10 Genius 18K Alum Padel Racket, refer to the following common troubleshooting tips:

- **Reduced Power/Control:** Check your grip for wear. A worn grip can lead to slippage and reduced effectiveness. Also, ensure your technique is consistent.
- **Excessive Vibration:** Ensure your grip is properly applied and not worn. The Custom Grip and Pulse System are designed to minimize vibrations, but a loose or damaged grip can compromise this.
- **Racket Damage:** For any significant cracks, dents, or structural damage, discontinue use immediately and contact NOX customer support or an authorized dealer for assessment. Do not attempt to repair structural damage yourself.

7. SPECIFICATIONS
