## 4. SETUP GUIDE

Follow these steps to set up your ASHATA 4G Portable Router:

1. **Insert SIM Card:** Locate the SIM card slot on the router. Carefully insert a standard SIM card (not included) into the designated slot until it clicks into place. Ensure the SIM card is correctly oriented.
2. **Connect Power:** Connect the provided USB Type-C supply cord to the router's Type-C port and plug the other end into a compatible power source (e.g., a USB wall adapter, car charger, or power bank).
3. **Power On:** Press and hold the power button (refer to Image 4.1 for location) for a few seconds until the device powers on and the display illuminates.
4. **Initial Boot:** The router will perform an initial boot-up sequence. The display will show network status, signal strength, and battery level. Wait for the network indicator to show a stable 4G connection.

## 5. OPERATING INSTRUCTIONS

Once the router is set up and powered on, you can begin using its mobile hotspot functionality:

### 1. Connect Devices via Wi-Fi:

- On your Wi-Fi enabled device (phone, tablet, laptop), search for available Wi-Fi networks.
- Select the network name (SSID) displayed on the router's screen.
- Enter the Wi-Fi password (Key) also displayed on the router's screen when prompted.
- Your device should now be connected to the internet through the router.

2. **Monitoring Status:** The router's display provides real-time information including signal strength, battery level, number of connected users, and data usage.

3. **Charging the Router:** When the battery is low, connect the router to a power source using the Type-C cable. The battery indicator on the display will show charging status.

4. **Security Features:** The router uses WPA/WPA2 encryption to secure your wireless network. It is recommended to keep the default password or change it to a strong, unique password for optimal security.

## 10 devices online at the same time

Supports up to 8-10 devices to connect to WiFi at the same time, sharing 150Mbps WiFi network

## 6. MAINTENANCE

To ensure the longevity and optimal performance of your ASHATA 4G Portable Router, follow these maintenance guidelines:

- **Keep Dry:** Avoid exposing the device to water, moisture, or high humidity.
- **Temperature Control:** Do not expose the router to extreme temperatures (hot or cold). Operate and store it within recommended environmental conditions.
- **Cleaning:** Use a soft, dry cloth to clean the exterior of the device. Do not use liquid cleaners or aerosols.
- **Battery Care:** For optimal battery life, avoid fully discharging the battery frequently. If storing for extended periods, charge the battery to about 50% and store in a cool, dry place.
- **Avoid Physical Impact:** Protect the device from drops, bumps, and strong vibrations.

## 7. TROUBLESHOOTING

If you encounter issues with your ASHATA 4G Portable Router, refer to the following troubleshooting tips:

- **No Internet Connection:**

- Ensure the SIM card is correctly inserted and activated with a data plan.
- Check the signal strength indicator on the router's display. If signal is weak or absent, move to an area with better network coverage.
- Restart the router by turning it off and then on again.
- Verify that your connected device's Wi-Fi is enabled and connected to the correct SSID.

- **Slow Internet Speed:**

- Reduce the number of connected devices.
- Move closer to the router to improve Wi-Fi signal strength.
- Check for network congestion in your area or contact your SIM card provider.

- **Cannot Connect to Wi-Fi:**

- Ensure you are entering the correct Wi-Fi password (Key).
- Restart both the router and your connecting device.
- Check if the router's display shows any error messages.

- **Router Not Powering On:**

- Ensure the battery is charged. Connect the router to a power source using the Type-C cable.
- Verify that the power cable and adapter are functioning correctly.
