6. Maintenance

To ensure the longevity and appearance of your Sluban White Tiger Mech, follow these simple maintenance guidelines:

7. Troubleshooting

If you encounter any issues with your Sluban White Tiger Mech, refer to the following common solutions:

Problem	Possible Cause	Solution
Pieces do not fit securely.	Incorrect piece orientation or insufficient pressure during assembly.	Ensure pieces are aligned correctly and apply firm, even pressure until they click into place. Refer to the manual's diagrams.
Joints are too loose or too tight.	Variations in manufacturing tolerances or incorrect assembly of joint components.	For loose joints, you may try disassembling and reassembling the joint, ensuring all parts are correctly seated. For tight joints, gently work the joint back and forth to loosen it. Avoid excessive force.
Missing parts.	Packaging error.	Contact Sluban customer support with your product model number and details of the missing part.
