## 3. PRODUCT OVERVIEW

### 3.1 Key Features

- **2K Crystal-Clear Footage:** Captures high-resolution video for detailed recordings day and night.
- **Dual-Screen Display:** Features a top display for monitoring recording status and a rear screen for direct video playback.
- **Built-in GPS:** Tracks your journey and allows route review on the camera or a computer.
- **Night Vision:** Records clear video in low-light conditions for 24/7 protection.
- **3000mAh Battery:** Provides 8-10 hours of recording at 1080P with IR and screen off.
- **Intuitive Large Button:** Enables instant recording for emergencies.
- **Dash Cam Functionality:** Supports power-on recording, even when the vehicle is off.

### 3.2 Component Identification

The WD10 camera features a robust design with accessible controls. The main lens is located on the front, surrounded by LED lights for night vision. A top display shows recording status, while a larger rear screen allows for playback and menu navigation. Control buttons are strategically placed for ease of use.

## 4. SETUP

### 4.1 Charging the Battery

Before first use, fully charge the camera's built-in 3000mAh Lithium Polymer battery. Connect the camera to a power source using the provided USB cable. Charging typically takes 3-4 hours. A full charge provides approximately 8-10 hours of recording at 1080P resolution with infrared and screen off.

# Long-Lasting 3000mAh Battery

Charging time: **3-4Hrs**

Recording time: **8-10Hrs**

## 4.2 Powering On/Off

To power on the camera, press and hold the Power button until the screen illuminates. To power off, press and hold the Power button again until the device shuts down.

## 5. OPERATING INSTRUCTIONS

### 5.1 Recording Video

Press the dedicated large record button to start video recording instantly. Press it again to stop. The dual-screen display allows you to monitor the recording status on the top screen and review footage on the rear screen.

### 5.2 Taking Photos

While in standby mode, press the Photo button to capture still images.

### 5.3 Night Vision

The WD10 camera is equipped with automatic night vision, ensuring clear recordings even in low-light or dark

conditions. This feature activates automatically to provide 24/7 surveillance.

## 5.6 Versatile Usage

The camera's design and included accessories make it suitable for various scenarios:

- **Law Enforcement:** Securely attach to uniforms for reliable evidence collection.
- **Delivery Monitoring:** Document deliveries and interactions.
- **Parking Surveillance:** Utilize dash cam mode for vehicle protection.
- **Outdoor Activities:** Capture adventures with hands-free recording.

## 6. MOUNTING OPTIONS

The WD10 camera comes with multiple mounting accessories to suit your needs:

- **Long and Short Clips:** For flexible body mounting on clothing or gear.
- **Car Mount:** Securely attaches the camera to your vehicle's windshield for dash cam use.

## 7. DATA MANAGEMENT

### 7.1 Transferring Files

Connect the camera to your computer using the provided USB cable to access and transfer recorded video and photo files. The camera is compatible with Windows and Mac for easy data management.

### 7.2 Storage

The WD10 model comes with 128GB of internal storage. Ensure regular backup of important files to prevent data loss.

## 8. SPECIFICATIONS

Feature	Detail
Product Dimensions	5 x 4 x 5 inches
Item Weight	1.37 pounds
Item Model Number	WD10
Batteries	1 Lithium Polymer batteries required. (included)
Brand	Losfom
Model Name	WD10
Connectivity Technology	USB
Special Feature	Built-In GPS, Night Vision
Video Capture Resolution	1440p (2K)
Color	Black

## 9. TROUBLESHOOTING

## 9.1 Camera Not Powering On

- Ensure the battery is fully charged. Connect to a power source and allow sufficient charging time.
- Press and hold the Power button for several seconds.

## 9.2 Poor Video Quality

- Ensure the lens is clean and free from smudges or debris.
- Check lighting conditions. Night vision should activate automatically in low light.

## 9.3 GPS Not Tracking

- Ensure the camera has a clear view of the sky for optimal GPS signal reception.
- Verify GPS settings in the camera menu.

## 9.4 Files Not Transferring to Computer

- Ensure the USB cable is securely connected to both the camera and the computer.
- Try a different USB port or cable.
- Restart both the camera and the computer.

# 10. WARRANTY AND SUPPORT

---
