

Tascam FR-AV2

TASCAM FR-AV2 Compact 32-Bit Float Field Recorder and Timecode Generator User Manual

1. INTRODUCTION

The TASCAM FR-AV2 is a compact and comprehensive audio recording solution designed for videographers and content creators. It combines advanced 32-bit float recording technology with built-in timecode generation, significantly enhancing efficiency and audio quality in various production environments. This device is engineered to capture pristine audio without clipping, even in unpredictable soundscapes, and offers seamless integration with industry-standard videography gear.

FR-AV2

Compact 32-bit Float Field Recorder and Timecode Generator with Mixer

The TASCAM FR-AV2 is a compact and comprehensive audio recording solution for videographers, combining enhanced 32-bit float recording with built-in timecode generation to greatly improve efficiency. Internal Timecode allows you to integrate industry-standard videography gear, with no need for an external timecode device. Wirelessly monitor your audio signals with the optional AK-BT2 Bluetooth adapter.

Figure 1.1: TASCAM FR-AV2 Compact 32-bit Float Field Recorder and Timecode Generator with Mixer.

2. KEY FEATURES

- **32-bit Float Recording:** Utilizes dual Analog-to-Digital Converters (ADCs) for a wide dynamic range, preventing audio clipping and distortion, even with unexpected volume spikes.
- **Dual XLR/TRS Combo Inputs:** Equipped with Ultra HDDA Preamps for connecting professional microphones and line-level sources, ensuring high-quality audio capture with an Equivalent Input Noise

(EIN) of -127dBu.

- **3.5mm Input:** Dedicated input for camera or external devices with plug-in power support.
- **Timecode Generation and Synchronization:** Features Timecode IN/OUT and a high-accuracy Temperature Compensated Crystal Oscillator (TCXO) for precise synchronization with cameras and other external timecode devices, including Jam-Sync.
- **High-Resolution Recording:** Supports recording formats up to 192kHz sample rate.
- **USB Audio Interface:** Functions as a 2-in/2-out USB audio interface for Mac/Windows/iOS devices, supporting 32-bit float resolution.
- **High-Capacity Storage:** Compatible with microSDXC cards up to 512GB for extended recording times.
- **Auto File Save System:** TASCAM's proprietary system automatically saves files approximately every 20 seconds to minimize data loss from unexpected power interruptions.
- **Advanced Input Processing:** Onboard low-cut filter, compressor, limiter, and noise gate for fine-tuning audio before capture.
- **Optional Bluetooth Connectivity:** With the optional AK-BT2 Bluetooth adapter, users can wirelessly monitor audio signals and control the unit via a dedicated app.

Figure 2.1: Detailed view of the TASCAM FR-AV2's inputs, controls, and optional AK-BT2 adapter.

3. SETUP

3.1. Battery Installation

The FR-AV2 requires three (3) AA batteries for operation. Ensure batteries are inserted with correct polarity as indicated inside the battery compartment. For optimal performance, use high-quality Lithium Metal AA batteries.

3.2. SD Card Installation

The unit supports microSDXC cards up to 512GB. Open the SD card slot cover and gently insert the microSDXC card until it clicks into place. To remove, push the card in slightly until it springs out.

Figure 3.1: The microSDXC card slot on the TASCAM FR-AV2, supporting high-capacity storage.

3.3. Connecting Microphones and External Devices

Connect XLR or TRS microphones/line-level sources to the dual combo inputs on the side of the unit. A 3.5mm input is available for connecting cameras or other external devices that require plug-in power.

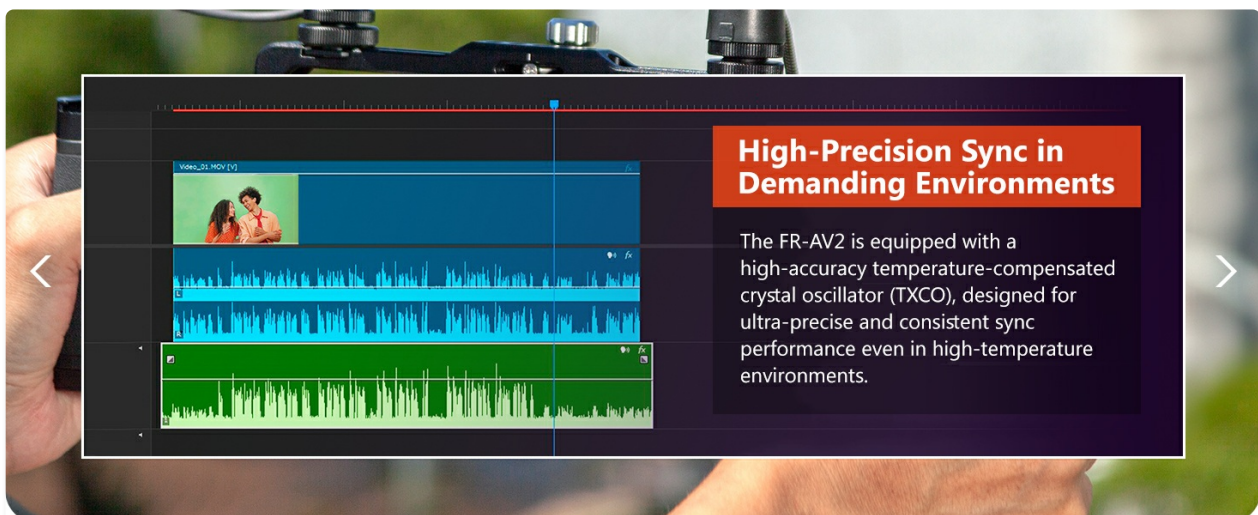

Figure 3.2: The premium XLR/TRS combo inputs and 3.5mm input on the TASCAM FR-AV2.

3.4. Powering On/Off

To power on the unit, press and hold the power button located on the side. To power off, press and hold the same button until the display shuts down.

4. OPERATING INSTRUCTIONS

4.1. Basic Recording

1. Ensure microphones or audio sources are connected and powered.
2. Press the **REC** button once to enter record-ready mode. The input levels will be displayed on the screen.
3. Adjust input gain using the menu or dedicated controls to ensure levels are within an optimal range, avoiding clipping.
4. Press the **REC** button again to start recording. The recording time will begin counting.
5. To stop recording, press the **STOP** button.

Figure 4.1: Front view of the TASCAM FR-AV2, highlighting the display and recording controls.

4.2. Monitoring Audio

Connect headphones to the 3.5mm headphone output jack. Use the dedicated volume control to adjust monitoring levels. For wireless monitoring, the optional AK-BT2 Bluetooth adapter is required.

4.3. Menu Navigation

Navigate the menu using the directional buttons and the ENTER button. The intuitive interface allows for easy adjustment of settings such as sample rate, recording source, pre-record function, and metadata.

4.4. Timecode Synchronization

The FR-AV2 can generate and read timecode via its 3.5mm IN/OUT ports. This allows for precise synchronization with DSLR cameras and other external timecode devices, simplifying post-production workflows.

Figure 4.2: The TASCAM FR-AV2 integrated into a videography setup, demonstrating timecode generation.

4.5. Using as a USB Audio Interface

Connect the FR-AV2 to a computer (Mac/Windows) or iOS device via USB-C. The unit can function as a 2-input, 2-output audio interface, supporting 32-bit float resolution for high-quality audio streaming and recording directly to your device.

Figure 4.3: The TASCAM FR-AV2 connected to a laptop, illustrating its use as a 32-bit float USB audio interface.

5. MAINTENANCE

5.1. Cleaning

Regularly wipe the unit with a soft, dry cloth to remove dust and fingerprints. Avoid using liquid cleaners or solvents, as these may damage the finish or internal components.

5.2. Firmware Updates

Periodically check the official TASCAM website for firmware updates. Keeping your device's firmware up-to-date ensures optimal performance, new features, and bug fixes. Follow the instructions provided with the firmware update carefully.

5.3. Battery Care

Remove batteries if the unit will not be used for an extended period to prevent leakage. Use fresh, high-quality

batteries for reliable operation.

5.4. SD Card Management

Regularly back up your recorded audio files from the microSDXC card to a computer or external storage. Format the SD card periodically within the device's menu to maintain optimal recording performance and prevent data corruption.

6. TROUBLESHOOTING

- **Unit does not power on:** Check battery installation and charge level. Ensure the power button is pressed and held sufficiently.
- **No audio recording:** Verify microphone connections, input gain settings, and ensure the unit is in record-ready mode before pressing REC to start. Check if the SD card is properly inserted and has sufficient free space.
- **Distorted or clipped audio:** While 32-bit float minimizes clipping, ensure input levels are not excessively high. Check microphone placement and gain settings.
- **Timecode synchronization issues:** Verify cable connections for timecode IN/OUT. Ensure external devices are correctly configured for timecode transmission/reception.
- **Cannot connect to computer via USB:** Ensure the unit is powered on and connected with a compatible USB-C cable. Check computer's device manager or sound settings to confirm recognition.

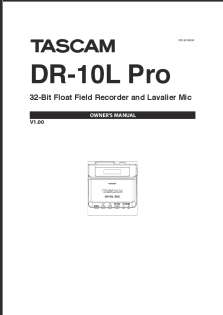

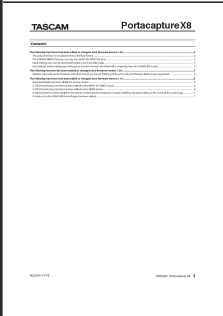

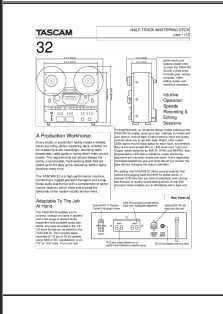

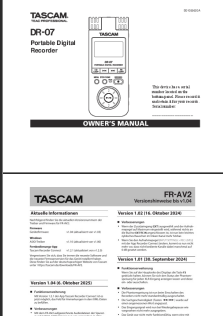

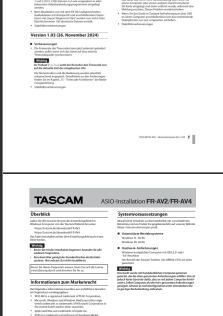

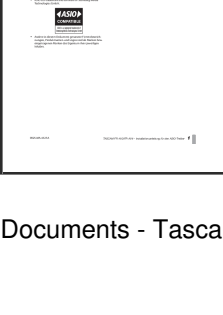

7. SPECIFICATIONS

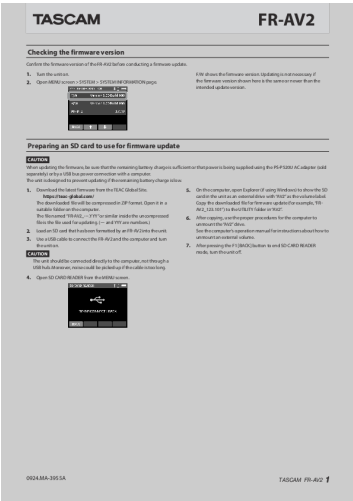

Specification	Value
Model Number	FR-AV2
Item Weight	9.5 ounces
Product Dimensions	3.9 x 3.15 x 1.57 inches
Batteries Required	3 AA batteries (Lithium Metal recommended)
Recording Formats	48k/96k/192kHz (32-bit float)
Inputs	2x XLR/TRS Combo, 1x 3.5mm (EXT/TC IN)
Outputs	1x 3.5mm (LINE/TC OUT), 1x 3.5mm (Headphone)
Storage Media	microSDXC (up to 512GB)
USB Functionality	USB Audio Interface (2-in/2-out, 32-bit float)

8. WARRANTY AND SUPPORT

For warranty information, technical support, and service inquiries, please refer to the official TASCAM website or contact your authorized TASCAM dealer. Keep your proof of purchase for warranty claims.
