nania RACE I

Nania RACE I R129 i-Size Car Seat Instruction Manual

Model: RACE I

1. Introduction

The Nania RACE I R129 i-Size Car Seat is designed to provide safety and comfort for children from 76 to 150 cm in height, approximately 3 to 12 years of age. This car seat is manufactured and tested in France, and it is approved according to the UN R129 safety standard. It is intended for forward-facing use only, installed in the rear of the vehicle using the 3-point vehicle seat belt.
Key features include a 5-point harness system for children between 76 and 105 cm, an easily adjustable headrest, a reclining base for enhanced comfort during travel, and integrated side impact protection. The car seat also comes with reducer cushions for smaller children (76 to 87 cm), memory foam in the headrest, and harness pads for maximum comfort. The cover is removable and hand-washable for easy maintenance.

2. Safety Information

- **UN R129 Standard:** This car seat complies with the latest European safety standard UN R129, ensuring high safety performance.
- **Forward-Facing Use:** The Nania RACE I car seat must only be installed in a forward-facing position.
- **Vehicle Seat Belt Installation:** Always secure the car seat using the vehicle's 3-point seat belt. Follow the belt routing guides carefully.
- **Side Impact Protection:** The car seat is equipped with lateral protections to safeguard your child in the event of a side collision.
- **Harness System:** Use the integrated 5-point harness for children from 76 cm to 105 cm. Ensure the harness is snug and correctly positioned over the child's shoulders and hips.
- **Height and Weight Limits:** This car seat is suitable for children from 76 cm to 150 cm in height, with a maximum recommended weight of 40 kg.
- **Child Supervision:** Never leave a child unattended in the car seat.

3. Setup and Installation

3.1 Car Seat Overview

Familiarize yourself with the main components of your Nania RACE I car seat.

Image: Side view of the Nania RACE I car seat, highlighting its profile and structure.

3.2 Installation with 3-Point Vehicle Seat Belt

1. Place the car seat on the vehicle's rear seat in a forward-facing position.
2. Route the vehicle's 3-point seat belt through the designated belt guides on the car seat. Ensure the lap belt is low over the child's hips and the diagonal belt passes over the child's shoulder and across the chest, away from the neck.
3. Pull the vehicle seat belt tight to remove any slack, ensuring the car seat is firmly secured and does not move excessively.

3.3 Harness Adjustment (76-105 cm)

The 5-point harness height can be adjusted easily with a single hand using a handle located at the back of the seat's backrest. This allows for quick adjustment without disassembly.

Image: Diagram illustrating the 5-point harness adjustment mechanism, showing a hand operating a handle at the rear of the seat to raise or lower the harness.

3.4 Headrest Adjustment

The headrest is height-adjustable to accommodate your child's growth, ensuring optimal safety and comfort. Adjust the headrest so that the shoulder straps are at or just below your child's shoulders when using the harness, or so the vehicle seat belt passes correctly over the shoulder when using the seat belt only.

Image: Diagram showing the headrest adjustment feature, with an arrow indicating upward movement for height adjustment.

3.5 Reclining Base

The car seat features a reclining base, allowing you to slightly recline the seat for your child's naps or during long journeys, enhancing comfort.

Image: Diagram illustrating the reclining base feature of the car seat, showing the seat in both upright and reclined positions.

4. Operating and Usage

- **Securing Your Child:** For children between 76 cm and 105 cm, use the 5-point harness. Ensure the harness straps are not twisted and are adjusted snugly against your child's body.
- **Transition to Vehicle Seat Belt:** Once your child exceeds 105 cm in height, the 5-point harness should be removed, and the child should be secured directly with the vehicle's 3-point seat belt, using the car seat as a booster.
- **Reducer Cushions:** For children between 76 cm and 87 cm, use the provided reducer cushions to ensure a proper fit and enhanced comfort. Remove them as your child grows.
- **Harness Pads:** The harness pads and memory foam in the headrest contribute to your child's comfort.

5. Maintenance

- **Cleaning the Cover:** The car seat cover is removable and designed for hand washing. Follow the care instructions on the label to prevent damage.
- **Cleaning the Shell:** The plastic shell can be wiped clean with a damp cloth and mild soap. Do not use harsh chemicals or abrasive cleaners.
- **Harness Care:** Inspect the harness straps regularly for wear and tear. Clean them with a damp cloth. Do not machine wash or tumble dry harness straps.

6. Troubleshooting

If you encounter any issues during the installation or use of your Nania RACE I car seat, please review the installation steps carefully. Ensure all belts are routed correctly and tightened securely. For persistent problems or concerns, refer to the comprehensive user manual provided with the product or contact Nania customer support.

7. Specifications
