5. MAINTENANCE

- **Cleaning the Canopy:** Clean the polyester canopy with mild soap and water. Use a soft brush or cloth to remove dirt. Rinse thoroughly and allow to air dry completely before closing or storing. Do not use harsh chemicals or abrasive cleaners.
- **Frame Care:** Wipe the aluminum frame with a damp cloth to remove dust and dirt. Periodically check all screws and bolts for tightness and tighten if necessary. The powder coating helps protect against corrosion.
- **Storage:** When not in use for extended periods or during strong winds/inclement weather, close the parasol and secure it. For long-term storage, it is recommended to use a protective cover and store it in a dry, sheltered location.
- **Winter Storage:** During winter months, disassemble the parasol and store all components indoors in a dry place to prolong its lifespan.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Parasol does not open/close smoothly.	Crank mechanism obstruction or damage.	Check for debris in the mechanism. Ensure the safety pin is disengaged when closing. Do not force the crank.
Parasol is unstable.	Base not properly weighted or placed on uneven surface.	Ensure sandbags are filled to maximum capacity (30 kg each) and correctly placed. Position the parasol on a flat, level surface.
Canopy appears loose or sags.	Not fully opened or fabric stretching.	Ensure the crank is turned until the canopy is fully taut. Minor stretching over time is normal.
