## BAGAIL 6 Set Ultralight Compression Packing Cubes and Vacuum Bag XL

# BAGAIL 6 Set Ultralight Compression Packing Cubes and Vacuum Bag XL

Instruction Manual

## INTRODUCTION

---

Thank you for choosing the BAGAIL 6 Set Ultralight Compression Packing Cubes and Vacuum Bag XL. This set is designed to optimize your packing space and keep your belongings organized during travel. It includes multiple compression packing cubes for various items and a durable TPU vacuum bag for maximum space reduction. This manual provides essential information for the proper use and care of your product.

## SETUP

## 1. Unpacking and Inspection

Carefully remove all items from the packaging. Inspect each packing cube and the vacuum bag for any signs of damage or manufacturing defects. If any issues are found, please contact customer support.

## 2. Preparing the Compression Packing Cubes

Unfold each packing cube. The cubes are ready for use immediately. Ensure zippers operate smoothly.

## 3. Preparing the TPU Vacuum Bag

Unfold the TPU vacuum bag. Familiarize yourself with the main zipper seal and the one-way air valve. Ensure the valve cap is securely in place when not in use.

## 4. Preparing the Mini Pump (if included)

If your set includes a mini pump, ensure it is charged before first use. Connect the provided USB-C cable to a power source to charge. Identify the various nozzle attachments for different inflation/deflation needs.

## OPERATING INSTRUCTIONS

---

### 1. Using the Compression Packing Cubes

1. **Fill the Cube:** Fold your clothes neatly and place them inside the main compartment of the packing cube. Avoid overfilling to ensure proper compression.
2. **Close Main Zipper:** Securely close the main zipper of the cube.
3. **Compress:** Locate the secondary compression zipper. Slowly and carefully zip this zipper around the cube to reduce its volume. Apply even pressure to avoid straining the zipper.

### 2. Using the TPU Vacuum Bag for Space Saving

Follow these steps to achieve up to 90% space reduction for your items:

# How To Save Space Up To 70%

Image: A step-by-step visual guide demonstrating how to use the BAGAIL TPU vacuum bag to save space, including filling, sealing, and air removal.

1. **Fill the Bag:** Place your clothes or soft items into the vacuum bag. Do not overfill beyond the indicated line.
2. **Seal the Zipper:** Carefully slide the zipper closure across the top of the bag multiple times to ensure a complete and airtight seal.
3. **Open the Valve:** Twist the cap of the one-way air valve counter-clockwise to open it.
4. **Remove Air Manually:** Lay the bag flat. Starting from the bottom, slowly roll or press the bag to push the air out through the one-way valve. You can also use your hands to squeeze the air out.
5. **Remove Air with Mini Pump (Optional):** If using the mini pump, attach the appropriate nozzle to the pump and insert it into the valve. Turn on the pump to extract air until the bag is compressed.
6. **Close the Valve:** Once the desired compression is achieved, twist the valve cap clockwise to securely close it.

## MAINTENANCE

### Cleaning

- **Packing Cubes:** Hand wash with mild soap and cold water. Do not machine wash or tumble dry. Air dry completely before storing.
- **Vacuum Bag:** Wipe the exterior and interior with a damp cloth and mild soap. Rinse thoroughly and

air dry completely. Ensure the valve and zipper are free of debris.

- **Mini Pump:** Wipe the exterior with a dry or slightly damp cloth. Do not immerse in water.

## Storage

Store all components in a cool, dry place away from direct sunlight and extreme temperatures. Ensure all bags are completely dry before storage to prevent mold or mildew.

## TROUBLESHOOTING

- **Vacuum Bag Not Compressing:**

- Check the main zipper seal: Ensure it is completely closed and airtight. Slide the zipper multiple times to confirm.
- Check the one-way valve: Ensure the valve cap is open during air removal and securely closed afterward. Make sure no items are obstructing the valve.
- Inspect for punctures: Carefully check the bag for any small holes or tears.

- **Compression Packing Cube Zipper Stuck:**

- Do not force the zipper. Gently pull the fabric away from the zipper teeth.
- Ensure the cube is not overfilled, which can put excessive strain on the zipper.

- **Mini Pump Not Working:**

- Check battery level: Ensure the pump is fully charged.
- Check connections: Ensure the nozzle is securely attached to the pump and the valve.

## SPECIFICATIONS

Feature	Detail
Product Type	6 Set Ultralight Compression Packing Cubes & Vacuum Bag XL
Packing Cube Material	Ultralight fabric (specific blend not provided, but designed for durability)
Vacuum Bag Material	TPU (Thermoplastic Polyurethane) & Nylon
Vacuum Bag Waterproof Rating	IPX8 (Waterproof Zipper)
Vacuum Bag Dimensions (Approx.)	17.7in (45CM) H x 11.8in (30CM) W x 4.7in (12CM) D (when expanded)
Space Saving Capability	Up to 90% reduction for vacuum bag
Mini Pump Battery Capacity	1300mAh
Mini Pump Airflow	180 L/min
Mini Pump Charging Port	Type-C

# Reinforced Mixed Material

Image: Detailed view of the BAGAIL vacuum bag's reinforced mixed material (Nylon and TPU) and its approximate dimensions.

**1300mAh**

"Long-lasting battery life, no need to worry! 1300mAh battery allows you to enjoy."

**180 L/min**

"Ultra large air flow, extremely fast pumping and compression! 180 L/min, easy to solve the urgent need."

**Type-C**

"Convenient and fast, everywhere! Type-C charging port, universal convenience in your hands."

**"The king of air pressure, at the touch of a button!"**

180L/min of super-atmospheric flow, pumping and compressing, all at your fingertips.
