ASHATA ASHATAbr07ho3gws

ASHATA 4G LTE Mobile WiFi Hotspot User Manual

Model: ASHATAbr07ho3gws

1. INTRODUCTION

Thank you for choosing the ASHATA 4G LTE Mobile WiFi Hotspot. This device provides high-speed 4G LTE internet access, allowing you to share a wireless connection with up to 10 devices simultaneously. Its portable design and long-lasting battery make it ideal for travel and home use. Please read this manual carefully to ensure proper setup and operation.

WIRELESS Mobile WiFi

2. PRODUCT OVERVIEW

The ASHATA 4G LTE Mobile WiFi Hotspot is a compact and efficient device designed for reliable internet connectivity. It features a color display for easy status monitoring and supports multiple security protocols for a safe browsing experience.

Key Features:

- **4G LTE Connectivity:** Enjoy high-speed internet with up to 300 Mbit/s data transfer rates.
- **Multi-User Support:** Connect up to 10 devices simultaneously, including mobile phones, tablets, laptops, and smart TVs.
- **Plug and Play:** Simple setup by inserting a SIM card and connecting to a power source.
- **Portable Design:** Compact and lightweight, perfect for travel.
- **Color Display:** Easily view network status, battery level, and connection information.
- **Security Encryption:** Supports WPA/WPA2 encryption for enhanced wireless security.

3. SETUP

Follow these steps to set up your ASHATA 4G LTE Mobile WiFi Hotspot:

1. **Insert SIM Card:** Locate the SIM card slot on the device. Carefully insert a standard Nano SIM card (not included) into the slot until it clicks into place. Ensure the SIM card is correctly oriented.
2. **Power On:** Connect the device to a power source using the provided Type-C USB cable. You can use a mobile phone charger, car charger, or a power bank. The device will automatically power on. Alternatively, press and hold the power button for a few seconds to turn it on.
3. **Initial Connection:** Once powered on, the device's color display will show the network status, battery level, and the WiFi network name (SSID) and password (KEY).

4. OPERATING INSTRUCTIONS

To use your ASHATA 4G LTE Mobile WiFi Hotspot:

1. **Connect Devices:** On your mobile phone, tablet, laptop, or other WiFi-enabled device, search for available WiFi networks. Select the SSID displayed on your hotspot's screen (e.g., "4G-MIFI-2060").
2. **Enter Password:** When prompted, enter the WiFi password (KEY) shown on the hotspot's screen (e.g., "1234567890").
3. **Access Internet:** Once connected, your device will have internet access via the 4G LTE network.
4. **Monitor Status:** The color display provides real-time information on signal strength, battery life, connected devices, and data usage.

Multi Users

10 devices can be connected at the same time

Stable connection, not easy to drop, the equipment will not heat

5. MAINTENANCE

To ensure the longevity and optimal performance of your hotspot:

- Keep the device clean and free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the device to extreme temperatures, direct sunlight, or moisture.
- Do not attempt to disassemble or repair the device yourself. Contact customer support if issues arise.
- Charge the device regularly to maintain battery health. The 3000mAh battery provides 8-10 hours of working time.

6. TROUBLESHOOTING

If you encounter problems with your ASHATA 4G LTE Mobile WiFi Hotspot, refer to the following common issues and solutions:

Problem	Possible Cause	Solution
No internet connection	SIM card not inserted correctly or not activated. No 4G signal. Data plan exhausted.	Reinsert SIM card. Check SIM card activation and data plan with your provider. Move to an area with better 4G coverage.
Device not powering on	Low battery. Faulty power cable/adapter.	Charge the device. Try a different Type-C cable and power adapter.
Cannot connect to WiFi network	Incorrect password. Device too far from hotspot.	Verify the WiFi password (KEY) on the hotspot's display. Move closer to the hotspot. Restart both the hotspot and your connecting device.

Problem	Possible Cause	Solution
Slow internet speed	Weak 4G signal. Too many connected devices. Network congestion.	Move to an area with stronger 4G signal. Disconnect unnecessary devices.

7. SPECIFICATIONS

Below are the technical specifications for the ASHATA 4G LTE Mobile WiFi Hotspot:

Feature	Specification
Brand	ASHATA
Model Name	ASHATAbr07ho3gws
Special Features	Security Encryption, Plug and Play, Mobile 4G Hotspot, Multi-device Support, Color Display
Frequency Band Class	Quad-Band
Wireless Communication Standard	802.11.be
Compatible Devices	Smart TVs, Mobile Phones, Tablets, Laptops, Computers, other devices
Recommended Applications	Travel, Home
Connectivity Technology	WLAN
Operating System	RouterOS
WLAN Type	802.11.be
Network Connection	WLAN
Security Protocol	WPA, WPA2
Data Transfer Rate	300 Megabits per second
LAN Port Bandwidth	100 Mbps
Maximum Upstream Data Transfer Rate	300 Megabits per second
WLAN Generation	802.11n
Modem Compatible	No
Connection Protocol	Wi-Fi, 4G LTE
Coverage	Europe, Africa, Southeast Asia, East Asia, Middle East
Frequency	2.6 GHz
Country of Origin	China

8. WARRANTY AND SUPPORT

For warranty information and customer support, please refer to the documentation included with your purchase or visit the official ASHATA website. If you experience any issues not covered in this manual, please contact ASHATA customer service for assistance.
