Maintenance

To maintain the appearance and longevity of your bed frame, follow these care instructions:

- **Cleaning Metal Parts:** Wipe the metal frame with a damp cloth, then dry immediately with a clean, dry cloth to prevent water spots or rust.
- **Cleaning Upholstered Parts:** For the velvet headboard and drawer fronts, gently wipe with a dry cloth. For spills or stains, use a mild fabric cleaner and blot dry. Avoid harsh chemicals.
- **Regular Inspection:** Periodically check all bolts and connections to ensure they remain tight. Retighten if necessary to maintain stability.

Troubleshooting

If you encounter any issues with your Keyluv bed frame, consider the following common solutions:

- **Squeaking Noises:** Ensure all assembly bolts are securely tightened. The bed frame is designed with plastic silent clips on the slats to minimize noise. If squeaking persists, re-check the installation of these clips.
- **Drawers Not Sliding Smoothly:** Check for any obstructions in the drawer tracks. Ensure the rollers are clean and free of debris. Verify that the drawers are correctly aligned within their designated space.
- **Instability:** Confirm that the bed frame is assembled on a flat, level surface. Re-check all connections and ensure they are tightened according to the assembly instructions.
