- **Cleaning:** Clean LEGO bricks and elements with a soft cloth dampened with water. For stubborn dirt, a mild soap solution can be used, followed by thorough rinsing with clear water. Do not use hot water, harsh chemicals, or abrasive materials, as these can damage the plastic.
- **Storage:** Store the set in a clean, dry place away from direct sunlight and extreme temperatures to prevent discoloration or warping of the plastic elements.
- **Handling:** Handle the assembled model with care to prevent pieces from detaching.

## TROUBLESHOOTING

---

Most issues with LEGO sets relate to assembly or missing pieces. Here are some common troubleshooting tips:

- **Missing Pieces:** If you believe a piece is missing, first double-check the packaging and surrounding area.

Sometimes small pieces can be overlooked. If a piece is genuinely missing, contact LEGO Customer Service for replacement parts.

- **Difficulty Assembling:** Refer to the pictorial building guide carefully. Ensure you are using the correct pieces for each step. The LEGO Builder app's 3D view can be particularly helpful for visualizing complex connections.
