4. INSTALLATION GUIDE

Follow these steps carefully for a bubble-free and perfectly aligned installation:

1. **Clean Your Screen:** Use the provided alcohol wipe to thoroughly clean your iPhone 16 Pro Max screen. Ensure all smudges, fingerprints, and oils are removed.
2. **Dry and Dust Removal:** Use the cleaning cloth to dry the screen completely. Then, use the dust remover sticker to lift any remaining dust particles. A perfectly clean screen is crucial for a successful installation.
3. **Position the Installation Jig:** Place the installation jig onto your iPhone 16 Pro Max. The jig is designed to align the screen protector precisely.
4. **Apply the Screen Protector:** Carefully peel off the protective film from the tempered glass screen protector. Align the screen protector with the jig and gently lower it onto your phone's screen. The jig will guide it into the correct

position.

5. **Adhesion:** Once the screen protector makes contact, it will begin to adhere to the screen. Gently press down the center of the screen protector and then work your way outwards to push out any air bubbles.
6. **Remove Jig and Final Touches:** Once the screen protector is fully adhered, carefully remove the installation jig. Use the cleaning cloth to wipe down the screen protector and remove any remaining fingerprints.

5. FEATURES AND USAGE

5.1 Super Anti-Reflection Coating

The DOME AR screen protector features an advanced anti-reflection coating, significantly reducing glare from ambient light sources. This enhances screen visibility, especially in bright outdoor conditions, with a reflectivity index of just 1.07%.

5.2 Optimal 9H Hardness and Shatter-Proof Design

Constructed from high-quality tempered glass with a 9H hardness rating, this protector offers superior resistance against scratches from keys, coins, and other sharp objects. Its shatter-proof design provides reliable impact resistance, protecting your iPhone 16 Pro Max screen from drops and bumps.

5.3 Smudge-Resistant Surface (Oleophobic Coating)

An oleophobic coating is applied to the screen protector, repelling fingerprints and smudges. This keeps your screen clear and easy to clean, maintaining optimal visual clarity.

5.4 Edge-to-Edge Protection

Designed for full coverage, the screen protector provides edge-to-edge protection for your iPhone 16 Pro Max display, minimizing bezel visibility and preventing edge lifting. It is also case-friendly, ensuring compatibility with most phone cases.

6. MAINTENANCE

To maintain the clarity and effectiveness of your DOME GLASS screen protector, follow these simple maintenance tips:

- **Regular Cleaning:** Gently wipe the screen protector with a soft, lint-free cloth (like the one provided in the package) to remove fingerprints and smudges.
- **Stubborn Marks:** For more stubborn marks, lightly dampen the cleaning cloth with water or a screen-safe cleaning solution. Avoid harsh chemicals or abrasive materials, as these can damage the oleophobic coating.
- **Avoid Sharp Objects:** While the screen protector is highly scratch-resistant, avoid direct contact with extremely sharp objects to prolong its lifespan.

7. TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Bubbles After Installation:** Small bubbles can sometimes appear after installation. Most small bubbles will disappear naturally within 24-48 hours. For larger bubbles, gently lift the nearest edge of the screen protector with a fingernail or a plastic card (like a credit card) and slowly re-apply, pushing the bubble towards the edge.
- **Misalignment:** If the screen protector is significantly misaligned, it may be necessary to carefully remove it and re-install. Ensure the screen is perfectly clean before re-application.
- **Reduced Touch Sensitivity:** If you experience reduced touch sensitivity, ensure the screen protector is fully adhered without any air gaps. If the issue persists, check your phone's settings for touch sensitivity adjustments.
- **Edge Lifting:** Ensure the screen protector is properly centered and pressed down firmly during installation. If edge lifting occurs, it might be due to improper installation or a case that interferes with the protector's edges. Try a different case if necessary.
