MAINTENANCE

To ensure the longevity and appearance of your Zinus Florence Metal Bed Frame, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the metal frame with a dry cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish.
- **Regular Checks:** Periodically inspect all bolts and connections to ensure they are tight. Retighten if necessary to maintain stability and prevent creaking.
- **Relocation:** If moving the bed frame, disassemble it carefully to prevent damage. Do not drag the assembled frame, as this can stress the joints and legs.

TROUBLESHOOTING

Bed Frame Creaking:

If your bed frame begins to creak, it is often an indication that some connections have loosened over time.

- **Solution:** Carefully inspect all bolts and screws throughout the frame. Using the provided ratchet tool or an appropriate wrench, tighten any loose connections. Ensure the bed frame is on a level surface.

Unstable Frame:

An unstable frame can be caused by improper assembly or loose connections.

- **Solution:** Review the assembly instructions to ensure all parts are correctly installed. Tighten all bolts and ensure the frame is placed on a flat, even floor. If the issue persists, disassemble and reassemble the frame, paying close attention to each step.
