TOONIOOS W2-6PCS

TOONIOOS W2-6PCS Cat Fountain Filter Replacement Kit User Manual

Model: W2-6PCS

1. INTRODUCTION

This manual provides instructions for the TOONIOOS W2-6PCS Cat Fountain Filter Replacement Kit. These filters are designed to maintain clean and fresh drinking water for your pet, ensuring optimal fountain performance and your pet's health.

Compatibility: This filter kit is specifically designed for the TOONIOOS Wireless Cat Fountain (3.2L W2). Please verify your fountain model before use to ensure proper fit and function.

Image 1.1: The TOONIOOS W2-6PCS Cat Fountain Filter Replacement Kit, including six blue filter cartridges and six black sponge filters.

2. PACKAGE CONTENTS

Your TOONIOOS W2-6PCS Cat Fountain Filter Replacement Kit includes the following items:

- 6 x Activated Carbon Filters
- 6 x Sponge Filters

3. SETUP AND INSTALLATION

1. **Prepare the Filters:** Before installing, immerse and rinse each filter (both carbon and sponge) in clean water for approximately 5 minutes. This step activates the carbon and removes any loose carbon particles, ensuring optimal filtration from the first use.
2. **Remove Old Filters:** Disassemble your TOONIOOS Wireless Cat Fountain (3.2L W2) according to its specific instructions to access the filter compartments. Carefully remove the used carbon filter and sponge filter.
3. **Install New Filters:** Place a new sponge filter into the designated slot, typically around the pump intake. Then, insert a new activated carbon filter into its housing. Ensure both filters are seated correctly to prevent water bypass.

4. **Reassemble Fountain:** Reassemble your cat fountain, ensuring all components are securely in place. Fill the fountain with fresh water.

4. FILTER OPERATING PRINCIPLES

The TOONIOOS cat fountain utilizes a multi-stage filtration system to provide clean water:

- **Non-woven Fabric Layer:** This initial layer captures larger particles such as pet hair, debris, and sediment, preventing them from entering the subsequent filtration stages.
- **Activated Carbon:** The activated carbon effectively removes unpleasant odors and tastes from the water, improving palatability for your pet. It also absorbs chlorine and other organic impurities.
- **Ion-Exchange Resin:** This component works to eliminate heavy metal ions and soften the water, which can help prevent urinary tract issues in pets and reduce scale buildup in the fountain.
- **Sponge Filters:** Positioned around the pump, these sponges provide an additional layer of filtration, catching any remaining debris and protecting the pump from blockages and damage, thereby extending its lifespan.

5. MAINTENANCE AND REPLACEMENT

Regular maintenance of your cat fountain filters is crucial for optimal water quality and fountain longevity.

- **Filter Replacement Schedule:** It is recommended to replace both the activated carbon filter and the sponge filter every 2 to 4 weeks. This schedule may need to be adjusted based on the number of pets using the fountain and the water quality in your area.
- **Increased Frequency for Multiple Pets:** If you have multiple pets using the fountain, it is advisable to clean the fountain more frequently and change the filters more often than the recommended bi-weekly schedule.
- **Fountain Cleaning:** In addition to filter replacement, regularly clean all components of the cat fountain, including the water reservoir, pump, and trays, to prevent bacterial growth and maintain hygiene.

6. TROUBLESHOOTING

If you encounter issues with your cat fountain's performance, consider the following common problems related to filters:

Problem	Possible Cause	Solution
Reduced water flow from fountain.	Clogged carbon or sponge filter.	Inspect filters for debris. Replace both carbon and sponge filters if heavily soiled or if flow does not improve after cleaning.
Unpleasant odor or taste in water.	Saturated activated carbon filter.	Replace the activated carbon filter. Ensure regular filter changes as per maintenance schedule.
Water appears cloudy or contains visible particles.	Filters are no longer effective or are improperly installed.	Ensure filters are correctly seated. Replace both filters. Clean the entire fountain thoroughly.

7. PRODUCT SPECIFICATIONS

Brand	TONIOOS
Model Number	W2-6PCS
Package Dimensions	22.3 x 14 x 2 cm

Item Weight	100 grams
Material	Activated Carbon, Resin, Non-woven Fabric, Sponge
Units per Item	12 (6 Carbon Filters + 6 Sponge Filters)
Product Benefits	Eliminates impurities and contaminants, softens water quality, prevents blockages.

8. SUPPORT AND FURTHER INFORMATION
